Agricultural Statistics of India

1916-17

VOLUME I—BRITISH INDIA

Report

To

THE SECRETARY TO THE GOVERNMENT OF INDIA,
DEPARTMENT OF REVENUE AND AGRICULTURE.

SIR,

I have the honour to submit the first volume of Agricultural Statistics for 1916-17. This annual volume is the thirty-third of the series started in 1886, with statistics for 1884-85. As in the previous issue, figures for twenty years are shown in the Summary table No. 1, for ten years in the provincial tables, and for two years in the district tables. A map showing the departure of cropped area and that of rainfall in 1916-17 and some additional charts as detailed in the penultimate paragraph of this report have been introduced for the first time this year under orders of the Government of India. An index has been added to the volume for easy reference.

The statistics are compiled from annual returns furnished by Local Governments and Administrations. Detailed information as to the sources from which the figures are collected in the different provinces is given in footnotes to the respective tables for each province. The statistics consist of six separate tables, namely, I—Area; II—Classification of area; III—Area under crops; IV—Live-stock, ploughs, and carts; V—Land Revenue Assessment; and VI—Transfers of property in land. The totals of the figures given in these tables are shown in a series of summary tables, to which a table on world crops is added. In addition to these, there are four appendices:—A, B, C, and D. Appendix A deals with the average yield per acre of principal crops; Appendix B shows the changes made in district and provincial boundaries; Appendix C gives the meaning of vernacular terms used in the volume; and Appendix D contains an alphabetical list of crops cultivated in India and their classification in Table III. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Indian States* as far as they are reported.

The returns for each province relate to the following dates:—

Bengal, Bihar and Orissa, Assam, Coorg, and Manpur	Year ended 31st March
Central Provinces and Berar	„ 31st May
North-West Frontier Province	„ 15th June
United Provinces, Madras, Burma, and Ajmer-Merwara	„ 30th „
Bombay	„ 31st July
Punjab and Delhi	„ 30th September

It may be noted that the statistics relating to areas irrigated (Table II) and areas under crops and specification of crops (Table III) generally include both the *khariif* and the *rabi* crops, and relate to the year closing with the harvesting of the *rabi* or spring crops.

* In Appendix A (Volume I), however, figures relating to Mysore are included.

The total area of India is 1,799,000 square miles, or 1,151,336,000 acres, with a population of 315 millions according to the census of 1911. This may be divided as follows :—

	Acres.	Population.
(1) British Provinces (including Indian States under the control of Local Governments and Administrations) .	748,965,000	267,164,000
(2) Indian States having direct political relations with the Government of India	316,400,000	44,767,000
(3) Specially administered territories in Burma (Shan States) and in the North-West Frontier Province (Tribal areas, etc.) not included under (1)	51,265,000	2,738,000
(4) British Baluchistan (including administered areas)	34,706,000	414,000
Total	<u>1,151,336,000</u>	<u>315,083,000</u>

No returns of agricultural statistics are prepared for (3) specially administered territories in Burma and in the North-West Frontier Province, nor for (4) British Baluchistan.

Table I.
Total area.

The total area of the British Provinces dealt with in this volume—748,965,000 acres or 1,170,000 square miles—includes 129,757,000 acres, with a population of some 26 millions, belonging to Feudatory and Tributary States, which are under the control of Local Governments and Administrations. These include in Burma the Môngmit State, the Hkamte Long State, and the Upper Chindwin States; in Assam, Manipur and the Khasi and Jaintia Hill States; in Bengal, Cooch Bihar and Hill Tippera; in Bihar and Orissa, the Tributary States of Orissa and Chota Nagpur; in the United Provinces, Rampur, Tehri, and Benares; in the Punjab, the Phulkian States, the States of the Bahawalpur Agency, the Jalandhar Division States, and the Simla Hill States; in the North-West Frontier Province, the Phulera and Upper Tanawal States; in Sind, the Khairpur State; in Bombay, the Gujarat States (excluding Baroda), the Konkan States, the Deccan States, the Satara Jagirs, and the Southern Mahratta States; in the Central Provinces, the Chhattisgarh States; and in Madras, the States of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur. Of these States, agricultural statistics are prepared for most of the States in the Punjab and all the States in Madras; but they are dealt with in Volume II along with the States having direct political relations with the Government of India.

Thus, by deducting 129,757,000 acres belonging to Feudatory and Tributary States from the total area of 748,965,000 acres included in British Provinces, a balance of 619,208,000 acres is left (as shown in Table I), which represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from "village papers," i.e., papers prepared by the village accountants for the purposes of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces and Berar, Madras, the Punjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The causes of this difference are: (a) while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail roads is not uniform in the two sets of returns. Substituting the area by village papers for the area by survey in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 616,160,000 acres, as against 619,208,000 acres according to the professional survey.

This area is classified, for the purposes of Agricultural Statistics, as			Table II.
			Classification of area.
	Thousand acres	Per cent	
Forests	85,166	14	shown in the margin. About 85,166,000 acres, or 14 per
Not available for cultivation	143,185	23	cent of the total, are occupied
Culturable waste other than fallow	112,308	18	by forests ; and the area not
Current fallows	45,792	8	available for cultivation, <i>i.e.</i> ,
Net area cropped	229,709	37	land absolutely barren or un-
Total	616,160	100	culturable or covered by build-

ings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 143,185,000 acres or 23 per cent. The balance, 387,809,000 acres or 63 per cent, represents the area available for cultivation. Of this, 112,308,000 acres, or 18 per cent of the total area, represent culturable waste other than fallow, *i.e.*, land available for cultivation but not taken up, and 45,792,000 acres, or 8 per cent, were kept fallow in the year of report. The net area actually cropped in the year was therefore 229,709,000 acres, or

	Proportion of cropped to total area	Population per 100 acres of cropped area

British India	37 "	105

37 per cent of the total area, as against 221,778,000 acres in the preceding year, or an increase of 3.6 per cent. The proportion of cropped to total area and the number of population per 100 acres of cropped area in each province are stated in the margin. The proportion of cropped to total area in the year of report was highest in Delhi and lowest in Burma. This net cropped area, however, excludes areas cropped more than once

in the year. If areas cropped more than once are taken as separate areas for each crop, the gross area cropped in the year of report amounts to 265,319,000 acres, as against 254,882,000 acres in the preceding year, or an increase of 4 per cent.

The term "forests" in the returns of Agricultural Statistics means "any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may, however, be excluded, and entered in the column "net area cropped." The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the Reports on the administration of the Forest Department for various reasons,* the chief amongst which are the following :—(1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, and (3) certain village lands worked by the Forest Department and returned as forest lands by that Department are not treated as forests in the returns of agricultural statistics but are included under the proper heads of cultivated or uncultivated lands as the case may be. Of the total forest area (85,166,000 acres in 1916-17) 24 per cent lies in Burma, 20 per cent in the Central Provinces and Berar, 15 per cent in the Madras Presidency, 11 per cent in the United Provinces, 10 per cent in the Bombay Presidency, and the remaining 20 per cent in other provinces.

As can naturally be expected, most of the barren and unculturable lands lies in the hilly tracts of Burma and of southern India and in the dry and deserty regions of north-western India. Of the total area "not available for cultivation" (143,185,000 acres in 1916-17) about 31 per cent lies in Burma, 16 per cent in the Madras Presidency, 10 per cent in Sind, and 9 per cent in the Punjab.

The head "culturable waste other than fallow" shows lands available for cultivation but not taken up. It includes areas such as groves not classed in the cropped area and areas under bamboos and thatching grass when not

* For detailed explanations in respect of provinces, see notes at foot of Table II, Nos. 25 to 40.

forming parts of forest areas.* Of the total culturable waste lands (112,308,000 acres in 1916-17) 22 per cent is in Burma, 14 per cent in the Punjab, 13 per cent in Assam, 12 per cent in the Central Provinces and Berar, 10 per cent in the Madras Presidency, and the remaining 29 per cent in other provinces.

Current fallows.

The maximum period for which land left uncultivated is reckoned as fallow varies in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in the Bombay Presidency, according to local laws and customs. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "culturable waste." Owing to this diversity of practice, the classification as between "culturable waste" and "current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, six years, would be treated as fallow in the Bombay Presidency, but as culturable waste in the Punjab. The total area returned as "current fallow" in 1916-17 was 45,792,000 acres, as against 51,731,000 acres in the preceding year, or a decrease of 12 per cent. The decrease may be attributed to the good rainfall.

Irrigation.

The total area irrigated in 1916-17 was 47,946,000 acres, as against 46,898,000 acres in the preceding year. Of this area 19,230,000 acres were irrigated from Government canals, 2,561,000 acres from private canals, 7,224,000 acres from tanks, 12,034,000 acres from wells, and 6,897,000 acres from other sources of irrigation. In India irrigation on an extensive scale is ordinarily resorted to in tracts where the rainfall is most precarious. In Lower Burma, Assam, Eastern Bengal, and the Malabar Coast (including the Konkan),

	Proportion of irrigated to total cropped area.
Sind	82 per cent.
Punjab	45 "
North-West Frontier Province	39 "

Bombay	3 "
Coorg	3 "
Central Provinces and Berar	2 "
Manpur	2 "

where the rainfall is ordinarily heavy, the crops hardly need the help of irrigation, unless there is an unusual scarcity of rain. Of the total area irrigated in 1916-17 25 per cent was in the Punjab, 23 per cent in the United Provinces, 21 per cent in the Madras Presidency, 10 per cent in Bihar and Orissa, 8 per cent in Sind, and the remaining 13 per cent in the other provinces. The proportion of irrigated to total cropped area in each province is stated in the margin. The proportion is highest in the driest province of Sind.

The figures in the preceding paragraph do not take into account areas cropped more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas cropped more than once as separate areas for each crop, the gross area of irrigated crops was 51,244,000 acres in 1916-17. Of this area about 86 per cent was under food crops and the remainder under non-food crops. Of the irrigated food-crop area, 10,311,000 acres were cropped with wheat, 29,781,000 acres with other cereals and pulses, and 3,723,000 acres with other food crops. These statistics of irrigated crops are in some cases defective as explained in the notes at the foot of Table II (pages 38-45).

Table III.
Area under crops.

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops, and in these cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are made on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crops by the village accountant. In the same

* For detailed explanations in respect of provinces, see notes at foot of Table II, Nos. 25 to 40.

province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains and in this case the whole area of the mixed field is assigned to food grains.

The gross area cultivated with crops was, as stated above, 265 million acres in 1916-17. The different classes of crops and the area occupied by each class are stated in the margin. Of the total cropped area food-crops occupied

	Thousand acres.	Per cent of total.
Food-grains	209,075	78.9
Condiments and spices	1,646	0.6
Sugar	2,591	1.0
Fruits and vegetables	5,798	2.2
Miscellaneous food-crops	1,091	0.4
Total food-crops	220,201	83.1
Oilseeds	14,642	5.5
Fibres	17,339	6.6
Dyes	1,281	0.5
Drugs and narcotics	2,170	0.8
Fodder crops	8,168	3.1
Miscellaneous non-food crops	1,048	0.4
Total non-food crops	44,648	16.9

about 220,201,000 acres or 83 per cent and non-food crops about 44,648,000 acres or 17 per cent. Of the food-crops food-grains (cereals and pulses) occupied as much as 209,075,000 acres† or about 79 per cent of the total cropped area and other food-crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food-crops* together) occupied some 11,126,000

acres or only 4 per cent of the total. Of non-food crops fibres such as cotton, jute, hemp, etc., occupied 17,339,000 acres or nearly 7 per cent of the total cropped area, and oilseeds occupied 14,642,000 acres or about 5 per cent. The other non-food crops *—dyes, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied some 12,667,000 acres or about 5 per cent of the total.

The area under food-grains (209,075,000 acres) showed an increase of 5,340,000 acres or 2.6 per cent as compared with the preceding year. The

	THOUSAND ACRES.		Increase (+) or Decrease (—)
	1916-17	1915-16	
Rice	81,020	78,680	+ 2,340
Wheat	25,047	23,871	+ 1,176
Barley	7,994	8,013	—19
Jawar	21,893	23,051	—1,158
Bajra	15,226	14,343	+ 883
Ragi	4,068	4,338	—270
Maize	6,547	6,735	—188
Gram	15,702	13,559	+ 2,143
Other grains and pulses	31,578	31,145	+ 433

actual increase or decrease under each kind of grain is stated in the marginal table (in thousands of acres). The monsoon during the year was particularly good; it arrived early and continued late, the distribution of rain being remarkably uniform. Of the total area shown in the table under food-grains 19 per cent was in the United

Provinces†, 14 per cent in the Madras Presidency, 13 per cent in Bihar and Orissa, 12 per cent in the Punjab, 11 per cent in Bengal, 10 per cent in the Central Provinces and Berar, 9 per cent in the Bombay Presidency, and the remaining 12 per cent in the other provinces.

The area under oilseeds (14,642,000 acres) showed an increase of 406,000 acres or nearly 3 per cent as compared with the preceding year. The

	THOUSAND ACRES.		Increase (+) or Decrease (—)
	1916-17	1915-16	
Linseed	2,550	2,451	+ 99
Sesamum	4,010	4,135	—125
Rape and mustard	4,039	4,076	—37
Other oilseeds	4,043	3,574	+ 469

actual increase or decrease under each kind of oilseeds is stated in the margin (in thousands of acres). Of the total area under oilseeds shown in this table 23 per cent was in the Madras Presidency, 16 per cent in the Central Provinces

and Berar, 13 per cent in Bihar and Orissa, 11 per cent in Bengal, 10 per cent in Burma, 9 per cent in the Punjab, 7 per cent in the Bombay Presidency,

* For a list of these crops, vide Appendix D.
† In the United Provinces, the whole of the area sown with food-grains mixed with oilseeds is shown under food-grains. The area included under food-grains, which was really sown with oilseeds (as a mixed crop), is roughly estimated to have been 4,000,000 acres in the whole province in 1916-17. Excluding this area of 4 million acres under oilseeds, the total area under food-grains in British India in 1916-17 would come to 205 million acres instead of 209 million acres.

5 per cent in the United Provinces,* and the remaining 6 per cent in other smaller provinces.

Condiments and
spices.

The total area under condiments and spices in 1916-17 was 1,646,000 acres, as against 1,522,000 acres in the preceding year, or an increase of 124,000 acres or 8 per cent. As is to be expected, spices are grown mostly in the southern parts of India: about 44 per cent of the total area under condiments and spices in 1916-17 was in the Madras Presidency.

Sugar.

The total area under sugar in 1916-17 was 2,591,000 acres, as against 2,551,000 acres in the preceding year, or an increase of 40,000 acres or 2 per cent. Of this area about 2,401,000 acres were occupied by sugarcane, as against 2,378,000 acres in the preceding year. Half of the sugarcane area was in the United Provinces, 17 per cent in the Punjab, 12 per cent in Bihar and Orissa, 8 per cent in Bengal, and 5 per cent in the Madras Presidency. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 190,000 acres as against 172,000 acres in the preceding year. About 51 per cent of this area was in the Madras Presidency and 36 per cent in Bengal.

Fibres.

Fibre crops occupied 17,339,000 acres in 1916-17 as against 14,572,000 acres in the preceding year, or an increase of 2,767,000 acres or 19 per cent. The actual increase under the several kinds of fibres is shown in the marginal table.

	THOUSAND ACRES		
	1916-17	1915-16	Increase
Cotton	13,836	11,435	+ 2,401
Jute	2,672	2,349	+ 323
Other fibres	831	788	+ 43

The area under cotton showed an increase of 21 per cent, attributed chiefly to the stimulus of high prices of cotton obtained in the preceding year. Of the total cotton area 32 per cent was in the Central Provinces and Berar,

31 per cent in the Bombay Presidency, 16 per cent in the Madras Presidency, and 8 per cent each in the Punjab and the United Provinces. The area under jute showed an increase of 14 per cent which is also attributed to the rise in prices in the preceding year. About 88 per cent of the total jute area was in Bengal and the remaining 12 per cent in the adjoining provinces of Bihar and Orissa and Assam. Other fibres also showed an increase of 5 per cent as compared with the preceding year.

Dyes.

The total area under dyes was 1,281,000 acres in 1916-17. Of this the area occupied by indigo was 765,000 acres, showing an increase of 414,000 acres or 118 per cent. Of the total indigo area 60 per cent was in the Madras Presidency, 21 per cent in the United Provinces, 11 per cent in Bihar and Orissa, and 8 per cent in the Punjab. Other dyes occupied an aggregate area of 516,000 acres.

Drugs and narcotics.

The total area under drugs and narcotics was 2,170,000 acres in 1916-17 as against 2,090,000 acres in

	THOUSAND ACRES		
	1916-17	1915-16	Increase
Opium	217	182	+ 35
Coffee	91	91	...
Tea	603	593	+ 10
Tobacco	1,031	1,027	+ 4
Other drugs and narcotics	228	197	+ 31

the preceding year or an increase of 80,000 acres. The actual increase under each kind of drugs and narcotics is stated in the marginal table, in thousands of acres.

Fodder crops.

The head "fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, lucerne, jawar, and carob or locust tree. The total area under fodder crops in 1916-17 was 8,168,000 acres, as against 7,076,000 acres in the preceding year.

Fruits and vegetables
including root crops.

The total area occupied by fruits and vegetable crops in 1916-17 was 5,798,000 acres, as against 5,698,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see Appendix D.]

* The figures shown under the several heads of oilseeds in Table III against the United Provinces of Agra and Oudh represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which are thinly sown in combination with wheat, barley, gram, and other food crops. If the areas occupied by the scattered oilseeds plants were added up, it is estimated very roughly that they would amount in 1916-17 for the whole of the United Provinces to about 4 million acres. Including this area, the total area under oilseeds in British India in 1916-17 would come to nearly 19 million acres.

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,139,000 acres. Of this, about 1,091,000 acres were occupied by miscellaneous food-crops and about 1,048,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on pages 96 to 103 and Appendix D.]

The total extent of land on which more than one crop was raised during the year was 35,611,000 acres as against 33,104,000 acres in the preceding year.

The statistics recorded in Table IV are based mainly on cattle censuses. In Burma, Manpur Pargana, and the Central Provinces and Berar the census is taken annually, while in the United Provinces, Assam, Ajmer-Merwara, the Punjab, Delhi, the North-West Frontier Province, the Bombay Presidency, the Madras Presidency, and Coorg it is taken once in five years. The last quinquennial census was taken in 1913-14 in the Punjab, the North-West Frontier Province, Delhi, and Ajmer-Merwara; in 1914-15 in the United Provinces, the Madras Presidency, Assam, and Coorg; and in 1915-16 in the Bombay Presidency. In Bengal a cattle census was taken for the first time in 1912-13, which gave the numbers of bulls and bullocks, cows, buffaloes, and young stock. [Young stock represents oxen and buffaloes not old enough for work or to produce young]. In Bihar and Orissa a census was taken in 1913-14. The figures for Bihar and Orissa prior to 1913-14, as also those for Bengal for years prior to 1912-13, are based on estimates. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. In making up the totals for British India for each year, the figures last collected in the provinces, where the census is not taken annually, are repeated year after year until the next cattle census is taken.* It would, therefore, serve no useful purpose to compare the total figures of one year with those of another, as the totals thus constituted do not really represent the number of stock in the year against which the figures are shown in the table. The animals may be divided into three classes, namely, (1) bovine, comprising bulls and bullocks, cows, buffaloes, and young stock (*i.e.*, calves and buffalo calves), (2) ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys, and camels.

	Bovine	Number in thousands			Carts
		Ovine	Others	Ploughs	
		Not available			
Bengal	25,324				
Madras	21,761	18,192	189	4,291	998
Bombay	9,206	4,038	212	1,121	618
Sind	2,179	1,616	319	278	56
United Provinces	31,741	12,676	846	5,111	859
Bihar and Orissa	20,098	6,541	203	3,221	458
Punjab	15,489	9,109	1,472	2,314	295
Burma	6,299	237	111	628	663
Central Provinces and Berar	11,894	1,756	188	1,454	898
Assam	3,576	522	15	594	40
North-West Frontier Province	1,271	1,147	211	226	5
Ajmer-Merwara	298	419	10	42	11
Delhi	148	32	13	16	8
Coorg	134	4	...	34	1
Manpur	7	1	...	1	...
Total	149,425	56,290	3,789	19,331	4,910

The total number of live-stock of each of these three classes in each province, together with the numbers of ploughs and carts, is stated in the margin (in thousands). Of the total number of live-stock of the bovine class (149 millions), which is cattle proper, the United Provinces account for 21 per cent, Bengal 17 per cent, the Madras Presidency 15 per cent, Bihar and Orissa 13 per cent, the Punjab 10 per cent, the Central Provinces and Berar and the Bombay

Presidency including Sind 8 per cent each, and the remaining provinces 8 per cent. In the case of ploughs also the United Provinces come first with 26 per cent of the total (excluding Bengal for which figures are not available), followed by Madras (22 per cent), Bihar and Orissa (17 per cent), and the Punjab (12 per cent). In the case of stock of the ovine class (sheep and goats), however, Madras accounts for 32 per cent of the total (excluding Bengal), followed by the United Provinces (23 per cent), the Punjab (16 per cent), Bihar and Orissa (12 per cent), and the Bombay Presidency including Sind (10 per cent). In the case of carts, Madras accounts for 20 per cent of the total (excluding Bengal), followed by the Central Provinces and Berar (18 per

* It has been arranged to hold a quinquennial census of live-stock in the same year in all the provinces, as far as practicable. The next such census will be taken in the cold weather of 1919-20.

	Number of cattle	
	Per 100 acres of cropped area.	Per 100 of population.
Bengal	102	57
Madras	63	53
Bombay	34	61

Table V.
Land Revenue
Assessment.

The varieties of land tenure in the different provinces are included in Table V and are given, as far as possible, under one or other of the following three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). When the revenue is assessed by the State, permanently or temporarily, on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants of smaller holdings, the tenure is known as *raiyyatwari*. Under either system there may be rent-paying subtenants. Zamindari tenure may be either *permanently settled*, i.e., where the land revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a number of years only. Village communities and raiyatwari tenures are, as a rule, temporarily settled, and the land revenue assessed on them are changeable from time to time.

The following table shows the position in the surveyed areas of the various provinces, as regards the forms of land tenure, according to the latest statistics available. The figures roughly indicate the extent to which the different systems prevail :—

Province.	In thousands of acres.			
	Raiyatwari.	Zamindari (individual proprietors or village communities).		Total.
		Permanently settled	Temporarily settled	
Bengal	...	39,211	11,269	50,480
Madras	61,286	29,852	...	91,138
Bombay	44,733	...	3,910	48,643
Sind	30,098	...	...	30,098
United Provinces	...	7,537	60,767	68,304
Bihar and Orissa	...	41,511	11,292	52,803
Punjab	...	...	56,027	56,027
Burma	109,053	...	...	109,053
Central Provinces	12,152*	...	40,450	52,602
Berar	11,375*	...	...	11,375
Assam	25,870	3,930	1,644	31,444
North-West Frontier Province	...	...	8,438	8,438
Ajmer-Merwara	...	974	797	1,771
Delhi	...	...	367	367
Coorg	1,012	...	...	1,012
Manpur	31	...	...	31
Total	295,610	123,015	194,961	613,586

It will thus be seen that about 48 per cent of the total area is held by *raiyyatwari* proprietors, while 20 per cent is held by permanently settled, and 32 per cent by temporarily settled, *zamindari* proprietors.

* Including Government forests.

The statistics for this table are collected annually in Burma, Assam, Manpur, the Punjab, Delhi, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar and Orissa, the United Provinces, Ajmer-Merwara, Bombay, Sind, Madras, and Coorg. According to the latest statistics available, the total revenue from land

	Total revenue from land (Rs.1,000)	Total popula- tion (1,000)	Revenue per head Rs. a.
Bengal	2,74,67	44,588	0 10
Madras	6,72,94	41,405	1 10
Bombay	3,28,52	15,134	2 3
Sind	1,01,80	3,513	2 14
United Provinces	6,72,83	47,172	1 7
Bihar and Orissa	1,63,07	34,490	0 8
Punjab	4,40,75	19,548	2 4
Upper Burma	1,60,75	4,113	3 15
Lower Burma	3,38,80	6,471	5 4
Central Provinces	1,13,42	10,873	1 1
Berar	85,69	3,067	2 13
Assam	82,20	6,714	1 4
North-West Frontier Province	27,79	2,255	1 4
Ajmer-Merwara	3,61	501	0 12
Delhi	3,88	413	0 15
Coorg	3,65	175	2 1
Manpur	16	7	2 6
Total	34,74,53	240,439	1 7

(excluding cesses) for the whole of British India amounts to nearly Rs35 crores. This represents the actual realisable demand* on account of the year, no account being taken of the collection of arrears for past years, nor of amounts remaining uncollected at the end of the year. The marginal table shows the total land revenue assessment, the total population, and the assessment per head of population in each province. For additional details reference should be made to the tables on pages 212—223.

The total number of transfers of property in land made during 1916-17, as recorded in Table VI, was 936,000, of which 895,000 were by private contract or gift and 41,000 by order of the court. The total area of the transfers by private contract or gift was 4,390,000 acres, and by order of the court 1,144,000 acres. These statistics are incomplete. They do not include transfers in Bengal (for which figures are not available), nor in Madras (for which the table has been discontinued from 1913-14); in Bihar and Orissa no information is available regarding transfers under orders of civil courts. As explained in the footnotes to Table VI, the figures for other provinces also are not always complete. It may be noted that voluntary transfers are those made by actual contract or gift, transfers by succession or inheritance not being taken into account: compulsory transfers are those effected through a court, civil or revenue. Transfers of land under the Land Acquisition Act and temporary transfers, such as leases, simple mortgages, and redemptions of mortgages, are excluded from this table. Mortgages with possession are treated as transfers and included in Table VI.

The Agricultural Department in each province maintains a statement of the average yield per acre of land of average quality, irrigated and unirrigated, for crops in each district. In order to test the accuracy of the standards of normal or average yield, and if necessary, to revise these, a system of crop-cutting experiments exists in all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the Provincial Agricultural Department. The results of the experiments are reported to the head of the Provincial Agricultural Department, who revises the standards in the light of these returns. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table (appendix A) shows the figures as last revised with reference to the crop-cutting experiments made up to 1916-17. As time goes on the figures become more accurate, and it may be noted that the general trend of the changes made is in an upward direction. In Bengal the yield per acre of winter rice has been raised from 983 lbs to 1,036 lbs and that of jute from 1,271 lbs to 1,300 lbs. Barley in the United Provinces has been raised from 1,100 lbs to 1,150 lbs, arhar from 750 lbs to 800 lbs, and cotton from 160 lbs to 170 lbs. In the Punjab wheat has been raised from 726 lbs to 791 lbs, sugarcane from 1,686 lbs to 1,933 lbs, and cotton from 118 lbs to 135 lbs. Cotton in Sind has been raised from 125 lbs to 170 lbs and sugarcane from

* Sums remitted on account of unoccupied lands, short crops, etc., are wholly excluded from this total amount in the case of provinces where all remissions are granted within the year to which the return relates, but in provinces where remissions are not granted or are only partially granted within the year, no deduction is made on account of remissions.

Table VI.
Transfers of property
in land.

Appendix A.
Average yield of
crops.

4,233 lbs to 8,142 lbs. In Assam the yield of autumn rice has been raised from 672 lbs to 706 lbs and that of sugarcane from 1,904 lbs to 2,016 lbs. In the North-West Frontier Province wheat has been raised from 633 lbs to 676 lbs and sugarcane from 2,430 lbs to 2,660 lbs. In a few instances the standards have been decreased. In Sind the yield of rape seed has been put at 393 lbs ; in Assam the yield of winter rice at 952 lbs, while the yield of jawar in the North-West Frontier Province is now estimated at 399 lbs.

Appendix B.
Territorial changes.

Appendices B, C, and D perhaps require little or no comment. Appendix B, which shows changes that have been made from time to time in district or provincial boundaries, will explain the variations in total areas of districts and provinces in Table I, so far as they are due to territorial changes. Appendix C explains the vernacular terms used in this volume, and Appendix D the classification in Table III of the various crops cultivated in India.

Vernacular terms and
classification of crops.

Charts.

The map, charts, and diagrams appended to the volume illustrate—

- (1) the departure of cropped area and that of rainfall in 1916-17 from the average of the preceding ten years ;
- (2) variations in rainfall as compared with normal in relation to total area cropped, food-crops area and current fallows (reversed) ;
- (3) rainfall in wheat growing tracts (in June to February) as compared with the total and unirrigated wheat area ;
- (4) total cultivable area, total uncultivable area, net area cropped, culturable waste other than fallow, and current fallows ;
- (5) total area cropped, total area under food crops, total irrigated area cropped, and total area under non-food crops ;
- (6) areas under rice, millets, wheat, oilseeds, cotton, jute and other crops ;
- (7) total area cropped and areas under different crops ;
- (8) total live-stock divided between bovine, ovine, and others, and
- (9) shares of provinces in the total area under principal crops.

For the prices of agricultural produce, reference should be made to the volume entitled "Prices and Wages in India", 33rd issue.

I have the honour to be,

SIR,

Your most obedient servant,

G. FINDLAY SHIRRAS,

Director of Statistics.

DEPARTMENT OF STATISTICS, INDIA,
Calcutta, February 20, 1919.

2. Total area cropped, area under food crops, current fallows (reversed) and variations in rainfall as compared with normal.

3. Total wheat area, unirrigated wheat area and rainfall in wheat-growing tracts (June to February).

The scale of the curves in chart No. 3 for "total wheat area" and "unirrigated wheat area" has, in order to effect a better comparison, been made much larger than that used for the curves showing "rainfall".

4. Total cultivable area, total uncultivable area, net area cropped, culturable waste other than fallow, and current fallows.

NOTE.— 1. "Total cultivable area" represents the sum of net area cropped, culturable waste, and current fallow.
 2. "Uncultivable area" includes the area under forest.

5. Total area cropped, total area under food crops, total irrigated area cropped, and total area under non-food crops.

6. Area under rice, millets, wheat, oilseeds, cotton, jute and other crops.

NOTE:—Millets represent jawar, bajra and ragi.

7. Total area cropped in 1916-17.

Total area cropped	265 million acres.
Area under food crops (black portion)	220 million acres.
Area under non-food crops (shaded portion)	45 million acres.

NOTE.—“Other food crops” are minor food-grains, condiments and spices, and miscellaneous food crops.
 “Other non-food crops” are oilseeds other than sesamum, linseed, rape and mustard; fibres other than cotton and jute; dyes; drugs and narcotics; and miscellaneous non-food crops.

8. Total livestock, divided between bovine, ovine, and others in 1916-17, as compared with the year 1907-08.

NOTE :—“Bovine” includes bulls and bullocks, cows, buffaloes, calves, and buffalo calves.
 “Ovine” includes sheep and goats.
 “Others” include horses and ponies, mules, donkeys, and camels.

9. Shares of provinces in the total area (in acres) under principal crop in 1916-17

NOTE.—In this diagram, the circles for the different crops have no relation to each other; they simply show the relative importance of each province in respect of each crop.

TABLES

Summary Tables of the Agricultural Statistics of British India

No. 1—GENERAL SUMMARY 1897-98 TO 1916-17

Classification of area

(Thousand acres)

	1897-98 (a)	1898-99 (a)	1899-00 (a)	1900-01 (a)	1901-02 (a)	1902-03 (a)	1903-04 (a)	1904-05 (a)	1905-06 (a)	1906-07 (a)

(a) Figures not available

due by the Zamindars to Government, not those due by raiyats to the Zamindars. The actual realisable demand on account of the year whether crops, etc., are excluded in the case of those provinces where all remissions are granted within the year to which the return relates, but in includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue, comprising fixed collections, ment estates, kyun tax (Burma); (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of survey and settlement charge (Bengal); (5) rents, etc., of fisheries; (6) receipts for the improvement of Government estates; (7) 12 per cent from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, huccoba tax Madras Act, II of 1864, capitation tax (Burma), petroleum well revenue, jade and amber revenue, thathameda tax (Burma), receipts from ruby land, and rents of buildings situated on such lands.

Column 8.—As in column 5, but only ordinary land revenue on fully assessed areas is entered.

(a) Includes Bihar and Orissa and excludes Eastern Bengal up to 1910 11

(b) Increase due to the adoption of the latest census figures

(c) Increase due to the adoption of settlement figures in certain districts

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The provincial areas in this column exclude Indian States in direct political relations with the Government of India, but include Feudatory or Tributary States politically controlled by Local Governments, with the exception of the Shan States in Burma and the Tribal areas in the North-West Frontier Province.

Column 3.—In this column is entered the area of any Feudatory or Tributary States included in column 2

Column 4.—Prior to 1908-09 this column showed the entire area (exclusive of Indian States) for which the statistics required for Tables II and III were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics, for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" mean "the papers prepared by the village accountants." The village papers do not in several provinces relate to the whole area included in column 5; for instance, the village returns sometimes do not include the forest areas. There are also tracts in many provinces for which no village papers exist and for which estimates have to be made to complete the statistics. In all such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts, which are calculated from village papers, are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of Table II.

Column 2 states the area as ascertained by the provincial survey department, supplemented, for tracts which have not come under the operations of that department, by areas obtained with the computing scale from the Survey of India atlas sheets of the localities concerned.

Columns 5 and 6.—The statistics for the major portion of the zamindari estates and certain raiyatwari and whole inam villages are based on estimates, owing to the absence of adequate agency for the collection of statistics in these tracts. Of the total area (89,530,706 acres) entered in column 6 for 1916-17 (page 19), 66,160,517 acres are based on actual returns and 23,370,189 acres on estimates.

Column 2 states the area as returned by the provincial revenue survey and settlement department, supplemented in the case of Indian States by the returns of the topographical survey.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (48,700,537 acres) entered in columns 5 and 6 for 1916-17 (page 21), 44,532,248 acres are based on actual returns and 4,168,289 acres on estimates.

<i>Total</i>					
1915-16	33,970,076	3,872,000		30,098,076	30,098,076
1916-17	33,975,088	3,872,000		30,103,088	30,103,088

Column 2 states the area as returned by the provincial revenue survey and settlement department, supplemented in the case of Indian States by the returns of the topographical survey. The revenue survey being incomplete in Sind, the exact area is not known: the column states the area of surveyed tracts *plus* the estimated area of unsurveyed tracts.

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (30,103,088 acres) entered in these columns for 1916-17, 29,978,180 acres are based on actual returns and 124,908 acres on estimates.

The variations in the areas shown in different years under the same item in the same province or district do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

Column 2.—“Forests” mean “any land classed or administered as forest under any legal enactment dealing with forests.” Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are these: (1) because the forest administration reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain village lands worked, and returned as forests, by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

(a) See footnote (a) on page 12

Columns 8 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only
Columns 14 to 18 state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is thus due to the inclusion in column 18 of the area irrigated at both harvests

- (a) Includes 1,750 acres in Rajshahi for which details are not available
(b) Includes 1,700 acres in Rajshahi for which details are not available
(c) Includes 26,777 acres in Purnea for which details are not available
(d) Includes 14,435 acres for which details are not available

* See explanations given in the footnotes (page 38)

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the forest administration report represent the areas of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different

(b) Includes unculturable Government waste and unculturable *banes*

(c) States the estimated area of culturable Government waste

(d) Shows (1) the estimated area of culturable *banes*, and (2) the difference between the net area cropped and the gross area of the actual holdings (exclusive of *banes*). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained

Column 2.—Includes the area cultivated within forests, and excludes the area of forests in the State of Sandur, in Bellary, not included in the village papers. As the latter is included in the Forest Administration Report, it accounts partly for the disagreement of its figures with those in this table

Column 4.—Includes areas occupied by *babul* and *casuarina* trees when they do not form parts of forest areas. Prior to 1911-12, such areas were classed under "Miscellaneous non-food crops" in Table III

Column 5.—Includes all occupied waste, that is to say, waste portions of land for which revenue is paid

Column 6.—Of the total net cropped area for 1916-17 (34,317,977 acres) stated in this column (page 52), 28,008,838 acres are based on actual returns, and 6,314,139 acres on estimates

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by throwing dams across the valleys of small rivulets and streams to intercept water during the rains

Column 13.—Of the total area irrigated in 1916-17 (9,953,050 acres, page 53) 7,493,553 acres are based on actual returns and 2,459,497 acres on estimates

NOTE.—Figures for unsurveyed villages are based on estimates.

Column 2.—Includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

Column 3.—Includes all land recorded at the survey and settlement as unculturable, although at times a very small quantity of this land is cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 6.—Of the total net cropped area (27,470,113 acres) entered in this column for 1916-17 (page 56), 26,211,366 acres are based on actual returns, and 1,258,747 acres on estimates.

<i>Total</i>								
1915-16 . .	811,341	13,931,083	6,228,667	5,873,490	3,254,495	30,098,076	2,935,438	22,437
1916-17 . .	814,710	13,908,331	5,912,863	4,845,100	4,622,084	30,103,088	3,312,237	20,031

Column 2.—The figures do not agree with those in the Forest Administration Report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision of survey, which the revenue records do.

Column 6.—Of the total net cropped area (4,622,084 acres) entered in this column for 1916-17, 4,620,094 acres are based on actual returns and 1,990 acres on estimates.

Column 2.—Includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the forest administration report which excludes these areas. This column also includes the Siwalik Range in the Dehra-Dun district.

Column 5.—The maximum period for which land left untilld is reckoned as fallow is three years.

Column 6.—Of the total net cropped area (27,394,359 acres, page 64) entered in this column for 1916-17 for the Province of Agra, 26,790,359 acres are based on actual returns and 604,000 acres on estimates.

Columns 8 to 13.—Government canals include private canals except in Dehra-Dun, Naini Tal, Budaun, and Basti for which districts separate figures for private canals have been obtained. There are very few private canals in the United Provinces.

Column 13.—Of the total area irrigated (8,261,958 acres, page 65), in the Province of Agra in 1916-17, 8,226,058 acres are based on actual returns and 35,900 acres on estimates.

Column 2.—Includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

Column 3.—This column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, and 3,896,960 acres of mountain tracts in Kangra. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4.—Includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually.

NOTE.—For tracts outside the surveyed area the figures are based on estimates framed in the best manner possible.

Column 2.—The area entered in this column is that given in the Forest Administration Report, and includes reserved forests and fuel reserves. Estimates of the forest areas in certain hill tracts are also included. The forest areas in the Shan States, which are included in the Forest Administration Report, are excluded from this table, no returns of agricultural statistics being prepared for those States.

Column 3.—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best source available.

Column 4.—Includes land thrown out of cultivation and abandoned. Groves, not classed in the cropped area, and bamboos, when not grown in forest areas, are also included in this column.

Column 5.—Includes only such land left uncultivated as is actually in the possession of cultivators. In Lower Burma (excluding the Thayetmyo district) such lands are assessed at privileged rates, but in Upper Burma and in Thayetmyo no assessment is levied on land left uncultivated.

CLASSIFICATION OF AREA (UPPER BURMA)

Column 2—Shows the areas administered by the Forest Department; but the figures differ from those in the forest administration report, because the actual area of the forest is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thekadari villages surveyed, clearance leased villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur, and Bilaspur districts this column also includes all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation.

Column 3—States areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4—States (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5—Land which has been fallow for not more than three years is reckoned as current fallow.

Column 2.—Includes the forest area administered by the Forest Department, but excludes a large area of cultivated land in the Meignat taluk in Amraoti shown as forest in the forest report.

Column 3.—Includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4.—Includes land available for cultivation but not given out.

Column 5.—Includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Column 2—The figures represent reserved forests, but exclude the areas of forest villages within the reserves which are entered under the appropriate heads of this table.

Columns 3 and 4—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good.

Column 5—Includes generally all lands which are thrown out of cultivation or not cultivated for three years, but which remain in the occupation of leaseholders. Figures for the Hills districts except the plains portion of the Garo Hills are rough estimates.

Column 6—The figures are obtained from the abstract crop statement for districts which have been cadastrally surveyed. The figures for the permanently settled estates of Sylhet and Goalpara and for the hill districts are estimates.

Column 2—Includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazára administered by the district officer and other waste lands in Peshawar.

Column 4—Includes large areas of Government waste not allotted for cultivation.

Column 5—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

(a) Variations due to untimely and deficient rain.

This table shows the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by the provincial authorities.

The variations in the areas shown in different years under the same crop in the same district do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

Column 10 (other food-grains including pulses).—Arhar (pigeon pea), barbati, lobia or chowli (asparagus), mung (green gram), kulthi (horse gram), urad (black gram), field gram, cheick (job's tear), lentils, cheena (common millet), kangni (Italian millet), kodo or varagu, kutki, (little millet), kuhudi, peas, pigeon or bottle grass, swank or shama, chickling-vetch, buck wheat, wudalu or barti.

Column 28 (other dyes).—Arnatto, chayroot, divi-divi, henna, madder, morinda, safflower, saffron.

Column 31.—In certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on tea production published separately. The principal reason is that the special report is prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are in many cases inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

Column 35 (other drugs and narcotics).—Aloes, arecanut, sweet basil, betel-vine, country borage, bogoda brinjal or nela mulaka, dhatura, purple flea-bane, isfagul, kclinj or vempali, senna, soap nut, sweet flag.

(a) Increase due to a revised classification of crops.

Column 37 (fodder crops).—Carob or locust-tree, fodder cholam, lucerne, guinea grass, oats, field vetch.

Column 38 (fruits and vegetables including root crops).—Agasi, wood apple, cashew nut, custard apple, rose apple, artichoke, arum, beans, beetroot, bilimbi, bimb, brinjal, cabbage, carrot, cassava, cauliflower, celery, chicory, citron, coconut, cress, cucumber, drumsticks or horse radish, elephantfoot, fig, garmal, cape gooseberry, country star gooseberry, goosefoot, gourd, gourd melon, grape, guava, gumberry, edible hibiscus, jack fruit, jujube, kanda, kankrol, kamranga, karola, kavali, kavathu, koorka, lettuce, mango, mau-gosteen, mankachu, marians, Indian medlar, melon, oranges, papay, parvar or patol, peach, pineapple, plantain, black plum, hog plum, pomegranate, pomelo, ponnagantikura, potato, puliyavara, sweet potato, pumpkin, radish, raspberry, roselle, sackalu, sapodilla, sebestan, sorrell, water caltrop, spinach, strawberry, manila tamarind, tomato, turnip, uchhe, yams, elephant yams.

Column 39 (miscellaneous food crops).—Amaranth, arrowroot, kirni, mahua.

Column 40 (miscellaneous non-food crops).—Chrysanthemum, dani (*nipfruticans*), dhaincha (*sesbania aculeata*), flowers, margosa or neem tree, mulberry, chaplash, thetké (grass).

(a) Variations due to a revised classification of crops.

(b) Includes 342,173 acres in Nainital and Almora for which details of crops are not available.

(c) Increase in 1915-16 is due to inclusion of area under grass and babul previously shown as "fallow" in Table II.

The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jawar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, are distributed in accordance with prescribed formulæ and entered under the crops of which they are composed.

Columns 3, 4, 5, 6, 9, and 10.—The whole of the area of the land planted with food-grains wheat, barley, etc., mixed with oilseeds is shown under food-grains in this table. The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 4,175,000 acres in the whole of the United Provinces of Agra and Oudh in 1916-17.

Columns 12, 13, and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1916-17 (for the whole of the United Provinces of Agra and Oudh) to 675,000 acres of linseed, 1,000,000 acres of sesamum, and 2,503,000 acres of rapeseed.

In Cachar accurate statistics of the area under crops other than tea are available only for the cadastrally surveyed tracts, in Sylhet only for the Jaintia Parganas and Partabgarh, and in Goalpara only for the temporarily settled tracts. The figures for the permanently settled tracts in Sylhet and Goalpara and for the unsurveyed areas in Cachar are based on estimates. In the case of jute the figures for Sylhet and Goalpara are based on a jute census taken every year for the final forecast of the crop. The figures for the five upper districts of the Assam valley represent the whole cropped area in these districts, with the exception of a small area cultivated by tribes paying house or poll tax in Lakhimpur, Sibsagar, and Kamrup. In the Garo Hills district returns of areas under different crops are available for the plains tracts only, while those for the hill portions are estimates. The figures for the other hills districts are rough estimates. Detailed statistics of the areas under different crops are not available for the Naga Hills

(a) Includes gram

Note.—Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. Oxen and buffaloes not old enough for work or to produce young are treated as "young stock".

(a) Figures not available.

(b) Included under "mules".

(c) Figures from 1908-09 to 1910-11 which are based on estimates, include Bihar and Orissa but exclude Eastern Bengal.

Table IV—continued

No. 57—LIVE-STOCK, PLOUGHS, AND CARTS IN EACH PROVINCE IN BRITISH INDIA.

PROVINCE AND YEAR OF ENU- MERATION	Bulls and bullocks	Cows	BUFFALOES		Young stock (calves and buffalo calves)	Sheep	Goats	Horses and ponies	Mules	Don- keys	Camels	Ploughs	Carts

(a) In Coorg the table is prepared quinquennially on a census taken every five years. The last census was taken in March 1915 by the circle shānbōgs, and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation, 1899. Animals in municipal towns are included.

(b) An annual census is taken on the 15th March in Manpur.

(c) The figures in columns 7 to 14 exclude Bengal (see Table IV, No. 53).

(d) Statistics based on a census taken in 1913-14. Figures for columns 6, 11, 13 and 14 were revised in 1914-15.

(e) Included under "Donkeys".

(f) Excluding Bengal.

(g) Excluding Eastern Bengal.

Note—Figures for 1912-13 are based on a cattle census taken in 1912; the figures for most of the districts, in columns 2 and 3 have, however, subsequently been revised. The census did not take into account the animals named in columns 7 to 11 nor ploughs and carts (columns 12 and 13). The figures for 1910-11 for the districts of the Presidency and Bardwan Divisions and for Darjeeling are based on estimates. The figures for 1909-10 for Faridpur are based on information collected during survey operations conducted in that district.

Note.—A census is taken every five years in Government (riyatwari) villages. The last quinquennial census was taken in 1914-15. In inam villages, there is no suitable agency for the work, and Collectors obtain information for these villages as best they can: it is not known to what extent any census is made in them. Previous to 1909-10, no information was available regarding live-stock in permanently settled (zamindari) estates and in towns and cantonments which did not form part of any revenue village; but from that year statistics based on estimates are furnished for all these tracts.

(a) Constituted in 1910-11 out of the Cuddapah and North Arcot District

Note.—The figures are collected once in five years. The last quinquennial census was taken in 1915-16. Prior to 1915-16 all animals belonging to a family were entered against the name of the head of the family even though the animals were temporarily absent from the village. Animals belonging to other villages were excluded, and those belonging to a roving grazer having no permanent residence were noted, but were not included in the village resources. In the census of 1915-16 all animals present in the village were recorded, although some of them might belong to other villages, as in the case of the population census. The figures are regularly tested by circle inspectors (kanungos). Stock statistics for the city of Bombay were collected for the first time in 1909-10.

(a) Represents figures for both East and West Khandesh.

Note.—The table is prepared quinquennially on a census in each district taken every five years. The last census, which was due in 1913-14 but could not be taken in that year owing to famine in some of the districts, was taken in 1914-15 in all the districts, except Almora, Garhwal, and the hill tracts of Naini Tal. In these latter districts the last census was taken in 1912.

Note.—The figures for years prior to 1913-14 are only estimates received from time to time on the basis of settlement records or reports of police enquiries. The figures for 1913-14 shown in the table for all the districts of the Province, except Hazaribagh, Ranchi, Palamau, and Manbhum, were arrived at by a census of live-stock held in these districts towards the end of 1913. For Hazaribagh and Ranchi (excluding the area since transferred to Palamau in the case of the Ranchi district) the figures are based on information collected during survey operations; while the figures for Palamau and Manbhum are based on police reports. Corrections were made in the figures for Hazaribagh in 1915-16.

Note.—A census for the whole province is taken every fifth year in the first week of February. The last census was taken in 1914. All cattle in cantonments and municipalities as also those belonging to Government are included.

(a) Owing to redistribution of territories consequent on the formation of the province of Delhi [vide footnote (a) on page 14] the figures for Rohtak and Gurgaon were revised in 1912-13.

(b) See footnote on page 14.

Note.—Annual returns of agricultural stock are prepared by village headmen, revenue surveyors, and *taikthuggis*, the enumeration taking place from end of February to middle of March in each year. The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities.

(a) Estimated figures

Note.—The figures are collected annually, between the 1st January and the 15th March, by the patwaris in each village for the areas in their respective charges. The total figure is recorded in the tahsil by the kanungo in a village register. The patwari takes into account all animals including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in cities, large towns, cantonments, and in forest villages are included.

Note.—A census is made annually by the village officers. All cattle belonging to one owner are entered against his name, even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

Note.—The statistics are based on a cattle census taken every five years. The census is, however, not taken simultaneously in the different districts. In the six districts of the Assam valley and in the central and eastern sections of the North-East Frontier district the last census was taken in 1915. In Cachar it was taken in 1912, in the Garo Hills (plains portion only) in 1913, and in the temporarily settled portion of Sylhet in 1910. No statistics are available for tracts other than Jaintia Parganas in Sylhet, and for the hill tracts.

(a) For Jaintia Parganas only. The figures for 1904-05 include estimates for other tracts also, but such estimates are not available for 1909-10.

(b) Excluding permanently settled tracts

(c) Constructed in 1914-15 out of Lakhimpur

(d) No information

(a) Excludes Bihar and Orissa districts constituted into a separate province.

Note.—The varieties of tenure are included as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). Areas under forests are included under the prevailing tenure of the province. In the Central Provinces and Berar, however, areas under Government forests are shown separately.

Column 3.—Areas held revenue-free or at privileged rates are deducted, but the deduction need not be made where such areas are in any case less than an entire village and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In Madras, Bombay, and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) is classed for the purposes of this column as "area not fully assessed." Area should not be entered under this head merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons.

Column 4.—This head is sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net cropped area as shown in column 6 of Table II.

(§) The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

* No details

† Includes 1,360,300 acres (in Dinajpur) for which details are not available

‡ Table made quinquennial after 1911-12

¶ Increase due to inclusion of certain Zamindari villages which were formerly included under Raiyatwari

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payments due by the zamindars to Government, not those due by raiyats to the zamindars. The actual realisable demand on account of the year is entered after excluding arrears for past years. This column includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue comprising fixed collections, revenue from canals in Sind, fluctuating collections (including nazarana), over collections (Bombay), surplus collections, collections from Government estates, kyun tax (Burma); (2) sale of Government estates, (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of summary settlement cess; (5) moturpha (house tax) collections; (6) assessment of alienated lands less quit rent; (7) recoveries on account of survey and settlement charges (Bengal); (8) rents, etc., of fisheries; (9) receipts for the improvement of Government estates; (10) 12 per cent on collections from Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of land registration fees, receipts from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, huccoba tax (Sind), malikana or allowances to excluded proprietors, fines and forfeitures of revenue Courts (except in Bengal and Assam), receipts under Madras Act II of 1864, capitation tax (Burma), petroleum well revenue, jade and amber revenue, thathamada tax (Burma), receipts from ruby mines (Burma), recoveries in India of law charges in England on account of appeals from India, miscellaneous receipts, rents of railway class C land and rents of buildings situated on such lands.

Column 6.—The population is that of the last general census.

Entry 8.—As in entry 5, but only ordinary land revenue on fully assessed areas is entered

Entry 9.—To be entry 8, divided by entry 4 (a)

Entry 10.—To be entry 8, divided by entry 4 (b)

* No details

† Includes Rs. 15,19,026 for Dinajpur for which details are not available

The table is prepared quinquennially, and the figures were last collected in 1912-13

Column 1.—The following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 4 (b) includes in certain cases fully assessed current fallows.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Land revenue assessed on fully assessed area [col. 4(a)].	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (columns 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

The table is prepared quinquennially. The figures were last collected in 1913-14

Column 3 (a).—In the case of raiyatwari tracts this column states the area of unoccupied assessed lands, of all unassessed poramboke, of minor inam lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous;" and in the case of zamindari tracts the areas of hills, poramboke, and minor inam are entered. The entire area of whole inam villages is deducted in this column

Column 3 (b).—Raiyatwari; includes the area of certain Agency tracts in Ganjam, Vizagapatam, and Godavari, and also the difference between the area by professional survey and the area according to village papers

Column 4 (a).—The figures for the raiyatwari tenures in this column are taken from village papers which differ in some cases from the resultant of preceding columns

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4 (a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Column 4 (a).—Raiyatwari; states the total occupied area as stated in village papers

Column 4 (b).—For certain districts areas actually cultivated and for certain others estimates, or actuals supplemented by estimates, are shown in this column

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts

Column 8.—Shows only the "ordinary revenue," as defined in the Civil Accounts, on area fully assessed

Column 10.—The cultivated area is, in the case of raiyatwari and zamindari lands, the net cropped area out of the area given in column 4 (a)

Column 11 states the entire population of raiyatwari and zamindari villages, respectively

This return is prepared quinquennially

Column 1.—Lands held under special tenures, such as talukdari, mehwas, udhad-jamabandi, narvadari, and bhagdari in Gujarat and khoti and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)"

Column 3 (a) includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and also the fully assessed unoccupied area

Column 3 (b) includes alienated cultivated and zamindari cultivated (estimated) land

Column 4 includes land under temporary cultivation, also pôt inâms paying full assessment

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years about 2.5 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 10.—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11 includes population of pôt inâms and the like scattered areas which cannot be distinguished from the population of the fully assessed area.

Column 12.—The incidence is based on the figures given in column 11 and those in column 8, plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

Sind { This return is prepared quinquennially
Column 3 (a) includes fallows and fully assessed unoccupied area
Column 4 excludes fallows and fully assessed unoccupied area [see note to column 3]
Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years 6·3 per cent. of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

North-West Frontier { Columns 3 (a) and 3 (b) include villages receiving frontier remissions and istamrari tenures
Column 4 (b) includes fully assessed current fallows which bore any crop in the preceding year
Column 5 shows all the items falling under the head "Land Revenue" in the Civil Accounts, including assigned revenue

The table is prepared quinquennially, and the figures were last collected in 1916-17

Column 3 (a) and 3 (b) exclude small revenue-free plots, for which details are not forthcoming

Column 5 states—(1) "ordinary revenue," comprising (a) fixed collections (including land revenue on account of resumed Gorait Jagirs), (b) fluctuating collection, (c) surplus collections, (d) collections from Government estates (including collections from Dudhi, Tarai, and Bhabar Estate and receipt from Forest Estates) (2) sale of Government estates; (3) sale-proceeds of waste lands and redemption of land tax (4) miscellaneous comprising (a) Receipt from quarries and mineral products in forest and land not under the management of the Forest Department, (b) water mills rent (c) malikanas or allowance to excluded proprietors, (d) fines and forfeitures of Revenue courts, (e) recoveries in India of law charges in England on account of appeals from India, (f) miscellaneous receipts, (i) patwari miscellaneous receipts (Revenue Record Room), (ii) mutation fees, (iii) mutation fines, (iv) sale of waste paper, (v) Partition fees, (g) Rents of Railway class "C" land and rents of building situated on such lands. On the average of the last five years about 1·68 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 6.—The total population of the province includes the population of the Benares State

No figures have been entered in columns 8 to 12 opposite "Lucknow, permanently settled," (page 237) as no portion of the permanently settled area has been fully assessed to land revenue

Column 11 includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12

Columns 13 and 14.—The figures are taken from the census reports of 1911

GRAND TOTAL		1,770,921	154,321	...	1,616,600	340,970	3,61,504	501,395

The table is prepared quinquennially, and the figures were last collected in 1915-16. The tenure in Ajmer-Merwara is all zamindari, and includes village communities in the case of temporarily settled areas

Column 1.—The khalsa area has been classed as "Zamindari and village communities (temporarily settled)" and the jagir and istamrari areas as "Zamindari (permanently settled)"

Column 4 includes in the case of the khalsa villages the assessed cultivated area, including assessed fallows

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts

† Included under Ajmer

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4 (a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area *	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

	Miscellaneous revenue	...	...	...	...	...	2,266		

The table is prepared quinquennially, and the figures were last collected in 1917

Column 1.—The following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government;

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 0.16 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Land revenue assessed on fully assessed area [col. 4 (a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (columns 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

For tracts outside the surveyed area the figures are mostly based on estimates framed in the best manner possible

Column 1.—No areas are classed as zamindari, as no system of communal assessment prevails

Column 3 (a) shows grants under Appendices I and II of the Rules under the Upper Burma Land and Revenue Regulation

Column 3 (b) includes non-State lands in districts where no land revenue rates are yet imposed and where the *thathameda* rates have not yet been adjusted.

Column 4 (a) shows figures of State and non-State lands assessed to land revenue, including current fallows which are not assessed to land revenue. This column also includes the areas of waste land grants of which the rates have been fixed in perpetuity

Column 5 states ordinary land revenue, *thathameda*, water rate rents of fisheries, and items under "Miscellaneous Land Revenue," appearing in the Civil Accounts

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4(a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Column 1—Raiyatwari includes, besides raiyatwari tenures, all unsettled Government waste and forest lands and areas in which house-tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under Zamindari (temporarily settled). Zamindari (temporarily settled) includes, besides temporarily settled Zamindari estates, fee-simple grants, wholly or partially revenue-free tenures, and grants under progressive assessment
Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts

Notes—It is optional with local Governments to enter or omit transfers of lands held by tenants. The entries under "by order of court" state not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a court. The word "court" in the entry "by order of court" should be held to include a revenue court. Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and are excluded from the table, as also are redemptions of mortgage. All temporary transfers such as leases are also excluded, but mortgage with possession is treated as a transfer and entered in the table.

(a) The statement includes all legal transfers of property (1) by voluntary action of the owners and (2) by virtue of decrees of civil, and orders of revenue, courts. Transfers ordered by courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading "by order of court." This heading also includes transfers ordered by civil courts from registered holders to decree-holders, of lands sold by civil courts in satisfaction of decrees, and of holdings sold by the revenue authorities for arrears of revenue.

(b) Transfers of property in land are not permitted in Manpur, except by sale and that only under special conditions.

(c) Not stated.

Note.—Transfers by inheritance or non-permanent transfers, such as leases or usufructuary mortgages for short periods, are excluded but mortgages with possession are included, as also all transfers made under order of a court. Transfers of *malikana* rights, that is, rights to receive a portion of the profits of an estate not amounting to proprietary rights, have been excluded. Statistics of transfers of tenant-right are not given. Transfers by gift have been included.

Note.—Transfers of property in land were not regularly registered in Upper Burma until 1st January 1914. The information is collected by revenue officers. The statement includes cases in which land has been permanently transferred by gift, sale, or other transactions, for valuable consideration. The term "court" includes a revenue office as well as a civil court.

(a) No information (b) Less than one acre (c) Details for districts not given

Note.—The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. Those against "tenants" are based on statements furnished by patwaris in which all transfers are entered, including transfers by mortgage with possession, as well as transfers by sale, but excluding transfers by inheritance. The statement does not include leases or mortgages without possession.

Note.—The information is obtained from the Registration Department. The table includes all transfers effected by sale of fields under decree of a court (including a revenue court) either in execution of the decree or for recovery of arrears of land revenue. Private sales or recognised divisions of fields necessitating a change in the name of the registered occupant are entered under "by private contract or gift," as also are mortgages with possession. Transfers due to succession, by inheritance, simple mortgages, and leases are omitted.

The column "by order of court" includes transfers occasioned by debt incurred by judgment-debtors, as also all other transfers effected by order of courts, civil and revenue

APPENDICES

APPENDIX A

THE AVERAGE YIELD PER ACRE OF PRINCIPAL CROPS IN INDIA

A provisional return of the yield of principal crops cultivated in India was first compiled in 1892, from various statistical publications available at the time, such as agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission; etc. To provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which are reported by Local Governments and Administrations at the close of each quinquennium. The returns for the quinquennium ended 31st March 1917 have been received and scrutinised. These outturns per acre are of extreme importance since these will generally be used during the present quinquennium (*i.e.*, until 31st March 1922) in estimating the production of crops, for which forecasts are prepared.

2. The estimates are prepared in the following way. The estimate given is the average outturn on average soil in a year of average character, as deduced from the information obtained from experiments made during the period under review. When, therefore, this average is multiplied by the average area sown, it is believed to give as near an approximation as possible to the outturn of the crop in an *average* year. The Department of Agriculture or Land Records of each province has at its disposal provisional standard estimates of the average yield of land of average quality (usually under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments or investigations annually made is to test the accuracy of these estimates, and to enable the head of the Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of unfavourable conditions or of exceptionally favourable conditions, which have affected the experiments reported, this would not necessarily involve the reduction or increase of the standard estimates for the district or for the province, unless there were other reasons for believing that, as estimates of average yield in an average year, they had been pitched too high or too low.

3. In 1913, on an examination of the returns of the quinquennium ending 1911-12, it was recognised that the results of experiments as conducted by the district revenue staff were generally unreliable. A change was accordingly made in the system. In 1915 the Government of India, in order to improve the returns, issued instructions to employ, as far as possible, the expert officers of the provincial Agricultural Department, for carrying out experiments on a well-ordered plan in each agricultural tract, and for the investigation of average crop outturns in the various provinces. It appears from the provincial reports that during the quinquennium under review experiments were regularly conducted by officers of the Agricultural Department in Madras, Bombay, and the United Provinces. In Bihar and Orissa crop tests by officers of the Agricultural Department were carried out on a small scale (as an experimental measure only) in a few districts. In Bengal the work was transferred from the district staff to the Agricultural Department, but owing to a reduction in the staff of the Department in consequence of financial stringency, the old system had to be reverted to. In the Punjab officers of the Agricultural Department were consulted in revising the standards, and it is stated that an improved system of conducting experiments has come into force from 1917. In Burma also new rules have been issued entrusting supervision of the experiments very largely to the Agricultural Department with effect from 1917-18. In Assam experiments were conducted according to revised rules framed in 1912 and slightly modified in 1915. In Mysore a system of checking the estimates by the results of experiments conducted by the Agricultural Department is, it is understood, to be introduced during the next quinquennium. No change in the system appears to have been made or contemplated in the remaining provinces.

4. It will thus be seen that in the majority of provinces, the orders of 1915 could not be fully carried out in the quinquennium under review. As a result of the experiments that were made, whether under the old or the new system, considerable changes have been made in the averages previously adopted, except in Bombay, Bihar and Orissa, and the Central Provinces and Berar. The changes

are generally in an upward direction. In Bengal the yield of winter rice has been raised from 983 to 1,036 lbs. and that of jute from 1,271 to 1,300 lbs. Barley in the United Provinces has been raised from 1,100 to 1,150 lbs., arhar from 750 to 800 lbs., and cotton from 160 to 170 lbs. In the Punjab wheat has been raised from 726 to 791 lbs., sugarcane from 1,686 to 1,933 lbs., and cotton from 118 to 135 lbs. Cotton in Sind has been raised from 125 to 170 lbs., and sugarcane from 4,233 to 8,142 lbs. In Assam the yield of autumn rice has been raised from 672 to 706 lbs. and that of sugarcane from 1,904 to 2,016 lbs. In the North-West Frontier Province wheat has been raised from 633 to 676 lbs., and sugarcane from 2,430 to 2,660 lbs. In a few instances the standards have been decreased. In Sind the yield of rapeseed has been put at 393 lbs.; in Assam the yield of winter rice at 952 lbs., while the yield of jawar in the North-West Frontier Province is now estimated at 399 lbs.

5. The importance of accurate standards of average outturn cannot be exaggerated, since, as already noted, under the present system the estimates of yield in crop reports are based on these standards, and a small error of even one lb. per acre may make a difference of thousands of tons in the estimated yield of a province. It has also to be remembered that the result of a single experiment, if not conducted with proper care, may vitiate the average for the district as well as for the province, since the district figure is calculated by averaging the outturns obtained from all the selected experiments in the district, and the provincial average is estimated by multiplying each district outturn by the area under the crop in each district and dividing the sum of the total outturns thus arrived at by the total area under the crop in the province. It is, therefore, extremely necessary that the instructions issued by the Government of India in 1915, referred to above, should be carried out to the fullest extent, as early as possible, where this has not already been done.

6. The statement below compares the average outturns of the major crops in the different provinces. The relative importance of each province in respect of each crop has also been shown by percentages representing the proportion of the total area under each crop in British India cultivated in each province. Tea has been included in this statement, although this crop is not dealt with in the quinquennial returns, the average outturns having been calculated from the special returns of tea production for the five years ending 1916.

(a) Irrigated. (b) Unirrigated.

The outturns of maize in Assam, of sugarcane in Sind, and of cotton in Ajmer-Merwara appear to be too high, as compared with other provinces, although the areas cultivated are insignificant. On the other hand, the outturns of linseed in the Central Provinces and of sesamum in the Central Provinces and Burma appear to be too low in spite of extensive areas being cultivated with the crops in these provinces.

7. In the following paragraphs the leading features of the provincial reports are summarised :—

Bengal.—In 1915 the work of conducting crop cutting experiments in Bengal was partially transferred from the district offices to the Agricultural Department, but owing, as already noted, to a reduction made in the staff of demonstrators attached to the Agricultural Department in consequence of financial stringency, the old system had to be reverted to. This transfer and retransfer of the work from the district staff to the Agricultural Department and back led to some confusion and resulted in fewer experiments being made in some districts than would otherwise have been undertaken. Nevertheless the total number of experiments made during the quinquennium under review with staple crops (rice, wheat, gram, linseed, rape and mustard, sesamum, sugarcane, and jute) was a record of 3,671, as against 2,814 in the previous quinquennium; and these experiments afforded sufficient data for a general revision of the standards previously adopted for the province. The average yield has been raised in the case of rice, sugarcane, and jute; while it has been reduced in the case of wheat, gram, rape and mustard and also linseed. The important changes are the increase of the yield of winter rice from 983 to 1,036 lbs. of autumn rice from 807 to 871 lbs., and of jute from 1,271 lbs. to 1,300 lbs., and the reduction of the yield of wheat from 861 to 698 lbs. The returns do not distinguish between irrigated and unirrigated crops, the irrigated area being relatively very small in the province. A few experiments were also made with certain less important crops such as barley, maize, peas, *khesary*, *mung*, sunn hemp, and tobacco; but the data obtained were not sufficient to warrant the deduction of average yields per acre for the whole province.

Madras.—During the quinquennium under review experiments in Madras were conducted by the Agricultural Department, and it is stated that they may be taken as being on the whole more accurate than those conducted in former years by the officers of the Revenue Department. On the other hand, these are much fewer in number and in many cases are too few to admit of the results being accepted as a representative figure for any tract. It is further stated that the figures reported in the previous quinquennial returns, which were solely based on crop cutting experiments, have never been adopted in Madras for the purpose of calculating outturns in crop forecasts, season and crop reports, etc. For this purpose there exists a separate set of standards, which have been fixed and modified from time to time by the Board of Revenue, in consultation with the Director of Agriculture, on a consideration of the tabulated results of crop cutting experiments, the results obtained on Government farms, and, in the case of cotton, of the figures of total crop exported from certain areas. These standard figures have been reported (rightly) in the present return. The Director of Agriculture, however, remarks that these figures are in need of revision in many cases and that he has now under consideration, this important question. For the above reason, no useful comparison can be made between the present and the previous figures, especially as a distinction was made between irrigated and unirrigated crops in the previous figures, whereas the present figures are averages for irrigated and unirrigated crops taken together, except in the case of sugarcane which is always an irrigated crop.

Bombay.—In Bombay the estimates of 1897 were prepared with great care, and the results of the experiments made in the two quinquennia ending 1901-02 and 1906-07 were not considered sufficiently reliable to justify any revision. In the quinquennium ending 1911-12, the system of crop cutting experiments conducted by the district staff was abolished, and a system of more scientifically conducted experiments on Government farms by officers of the Agricultural Department was substituted; but the results obtained on Government farms were too meagre to justify any revision of the provincial averages, although a few changes were made with great caution in the district figures. In the quinquennium under review a few changes have been made in the district figures, as a result of the experience gained by the Agricultural Department; and it is believed that the changes are in the right direction, although the matter is largely one of guess work. The only change made in the provincial averages is a very slight increase of the yield of cotton, namely, from 100 to 102 lbs., all other figures remaining unchanged. It is stated

that endeavours will be made during the next quinquennium to test other figures upon which it has not yet been possible to offer any definite opinion.

Sind.—The figures reported from Sind in the previous quinquennia were not the average outturns worked out from the yield of crops raised on different classes of lands and under various modes of irrigation, but were mostly the actual results of individual experiments (or mean figures where more experiments than one were made) by the settlement or divisional officers. The present return has also been prepared from similar data, but a distinction has been made between irrigated and unirrigated crops. The Commissioner remarks that in order to work out correct averages, a large number of experiments would be necessary for each crop under different modes of irrigation, and the aggregate cultivation under each mode of irrigation on different classes of lands would also have to be taken into account; but as these statistics are not yet available on a sufficiently large scale, there is no alternative but to accept the figures now communicated by the collectors. As compared with the previous figures the present estimates show an increase in the case of wheat, barley, gram, sugarcane, and cotton, and a decrease in the case of jawar, bajra, sesamum, and rapeseed. The most important changes are the increase of the average yield of barley from 1,076 to 1,279 lbs., that of gram from 476 to 604 lbs. of sugarcane from 4,233 to 8,142 lbs., and of cotton from 125 to 170 lbs.; and the decrease of the yield of jawar from 1,396 to 866 lbs., of bajra from 971 to 624 lbs., and that of rapeseed from 602 to 393 lbs. The Commissioner states that it is not possible to explain these wide variations except that the increase in the case of sugarcane and cotton can be ascribed to a more regular supply of water following the many improvements in the canals. The figure for sugarcane (8,142 lbs.) seems, however, to be extremely high. It is further stated that instructions have been issued to district officers to collect in future the data of outturn of normal (12-anna) crops raised on different classes of irrigation and to work out on a uniform system the average for the district by taking into account the area under each mode of irrigation.

United Provinces.—In the quinquennium under review experiments in the United Provinces were made regularly by officers of the Agricultural Department and some by settlement officers, in addition to those conducted by district officers. The results of these experiments have not necessitated a change in the previous standards except for barley, jawar, arhar, and cotton. The yield of barley has been raised from 1,100 to 1,150 lbs., that of arhar from 750 to 800 lbs., and that of cotton from 160 to 170 lbs. The yield of jawar on the other hand, has been reduced from 650 to 600 lbs.

Bihar and Orissa.—In accordance with the Government of India Circular of 1915, referred to above, the execution of crop tests by officers of the Agricultural Department of Bihar and Orissa was started in that year as an experimental measure, and experiments were carried out on a small scale in seven districts as supplementary to those conducted by district officers. The crop tests conducted by the Departmental officers are stated to have shown better results than those conducted by district officers; but the information obtained by the small staff of the Department is not yet of sufficient volume to serve as an effective check on the figures returned by district officers. The experiments conducted by district officers, on the other hand, were, as usual, unreliable owing mainly to carelessness in the selection of typical plots, and the results of these experiments do not, therefore, justify any modification of the provisional standards previously adopted for the province on the basis of the estimates of 1892. In the consolidated tables for British India these unrevised standards have therefore been retained in the statement of provincial averages (Table No. 1), but in the detailed statement of district figures, the average outturns based upon the experiments conducted during the quinquennium under review have been shown for each district, irrigated and unirrigated crops being classified separately. The provincial Director remarks that the district officers' figures should be supplemented by the results of a larger number of experiments made by the trained staff of the Agricultural Department under the new system, before the present provincial standards can be safely revised.

Punjab.—The revision of 1912 in the Punjab was made on the basis of the overcautious estimates of settlement officers, and it was remarked

that the yields then fixed were in consequence too low. The results of the experiments made in the quinquennium under review have confirmed that opinion, and in the present revision these yields, as also the cautious estimates of settlement officers, have been regarded as minima. In consultation with district and settlement officers and the Principal of the Agricultural College and other officers of the Department of Agriculture, increases have been made where the results of crop experiments indicate that enhancement is required, provided that the number of experiments has been sufficient. The system of conducting crop experiments has been revised and greatly improved, but unfortunately the new system came into force only with the spring harvest of 1917, at least so far as experiments conducted by district officers were concerned. The present revision shows that a general increase in the provincial averages has taken place. The notable increases are in the yield of rice from 688 to 782 lbs., of wheat from 726 to 791 lbs., of barley from 716 to 809 lbs., of maize from 908 to 1,040 lbs., of sugarcane from 1,686 to 1,933 lbs., and of cotton from 118 to 135 lbs. The Punjab Government remarks "that the present normal yields, though possibly slightly on the low side, are fairly reasonable, and that though it is no doubt difficult to determine how far the results of particular crops in particular harvests vary from the normal, the estimates at least for the main crops are steadily becoming accurate."

Burma.—In the quinquennium under review crop cuttings in Burma were as usual carried out for the most part under the supervision of sub-divisional and township officers, with occasional assistance from the Superintendent of Land Records and the subordinate Land Records staff. On a consideration of the results of these experiments and of those made in the previous quinquennia, no change has been made in the previous provincial estimate for rice in Lower Burma; but in the case of Upper Burma the estimates for all crops now reported exhibit considerable variations. The Director of Agriculture remarks that whatever be the value of the Lower Burma figures, in Upper Burma the number of experiments remains too small to justify confidence in the estimates. In order to show the main products only, the following deductions have, as usual, been made from the gross outturn of the crops, namely, for rice and jawar 33 per cent., and for cotton 70 per cent. The Local Government issued orders in 1916, in accordance with which new rules have been prescribed changing the whole system with effect from 1917-18, and entrusting supervision of the experiments very largely to the Agricultural Department. The results of the new system will be reported in the next return. It may be noted that the average outturns hitherto ascertained by the Director of Agriculture on the basis of crop cutting experiments have never been utilized for the purposes of estimating yields in crop forecasts, season and crop reports, etc., for which there exists a distinct set of normal outturns framed and revised from time to time by the Commissioner of Settlements and Land Records, Burma, mainly on the basis of settlement records. These normal outturns, which are published in the provincial Season and Crop Report, have been shown in the appended Table (No. 8) of district averages underneath the figures of crop cutting experiments reported by the Director of Agriculture, and have also been taken into account in calculating the averages for British India in Table No. 1. It is very desirable that one set of standard outturns should be framed, and revised or verified from time to time, on a consideration of data available from all sources and in consultation with the expert officers of the provincial Agricultural Department.

Central Provinces and Berar.—In the revision of 1912 experiments in the Central Provinces and Berar were selected with great care and due attention was paid to seasonal peculiarities and to classes of soil. In the quinquennium under review, as a result of a large number of experiments made with the rice crop in the Nagpur division slight changes have been made in the figures for that crop for the districts of that division. It has not, however, been considered necessary or advisable to make any change in the provincial averages for any crop.

Assam.—In consequence of the reformation of the province of Assam revised rules for the conduct of crop cuttings were framed in 1912, which were slightly modified in 1915. In accordance with the revised rules experiments were

conducted on all the crops of the province, for which forecasts are made and also on certain other crops, such as, *matikalai* (*phaseolus radiatus*), maize, and potato. The number of experiments made was much larger than in the preceding quinquennium, and their results are stated to have been on the whole satisfactory. The only district in which no experiments were made is the Naga Hills where the staff is stated to be inadequate for the purpose. As a result of the experiments made, the averages have been revised in most cases, the most important changes being the reduction of the yield of winter rice from 1,008 to 952 lbs., and the increase of the yield of autumn rice from 672 to 706 lbs., and that of sugarcane from 1,904 to 2,016 lbs. In the case of cotton a deduction varying between 40 and 50 per cent has been made in order to obtain the yield of lint.

North-West Frontier Province.—In the quinquennium under review experiments in the North-West Frontier Province were made by the district staff (Sub-divisional Officers, Tahsildars, and Naib-Tahsildars) in the two selected districts of Peshawar and Dera Ismail Khan. The results obtained from these experiments have been carefully scrutinized by the Revenue Commissioner, and, in cases where the figures were excessive, especially in Dera Ismail Khan, they have been modified after comparison with the settlement results when the experiments were conducted and worked out under the Settlement Officer's own supervision. For the other districts the averages previously adopted on the basis of experiments framed by Settlement Officers have been repeated. The provincial averages have been raised for all the crops except rice, jawar, and maize. The important changes are the increase of the yield of wheat from 633 to 676 lbs., of barley from 876 to 907 lbs., and of sugarcane from 2,430 to 2,660 lbs., and the reduction of jawar from 436 to 399 lbs.

Ajmer-Merwara.—The figures reported by Ajmer-Merwara are based mainly on the results obtained in 1916-17. The yield of jawar, maize, and cotton has been raised, and that of barley lowered; the most important changes being the increase of the yield of jawar from 137 to 322 lbs. and that of cotton from 170 to 291 lbs. The reported yield of unginned cotton has been reduced by two-thirds to obtain the yield of cleaned cotton (lint), but the figure still appears to be high. It is remarked by the Commissioner that the results of crop experiments, as they are at present conducted in Ajmer-Merwara, are of little, if any, value as a basis for estimating the average yield of any crop on average soil in a year of average character.

Delhi.—The return received from Delhi relates to the new province as constituted in 1912. The reported figures do not call for any special remark.

Coorg.—The only experiments made in Coorg have, as usual, been on rice. The average yield has been slightly lowered from 1,483 to 1,425 lbs. which is still very high in comparison with the reported yield of other provinces. The comparatively high yield of rice in Coorg was ascribed, in the previous return, partly to special attention being paid to rice cultivation since the decline of the coffee industry, and partly to the rice lands of Coorg being watered by hill streams which contain much manurial matter. The slight decrease in the present return is stated to be probably due to the selection of the crop and not to a decline in the productive capacity of the soil or bad years.

Mysore.—As a result of the experiments made in the Mysore State during the quinquennium under review, the averages for all the crops, except sugarcane, have been raised, the most important increases being in the outturns of rice (from 841 to 1,185 lbs.), ragi (from 581 to 728 lbs.), and cotton (from 79 to 122 lbs.). The yield of sugarcane has been reduced from 3,138 to 2,559 lbs. The present figures are based only on experiments conducted by the Revenue Department. It is stated that arrangements have been made for checking the figures by the results of experiments conducted by the Agricultural Department, and the Darbar hope in future to be able to furnish more accurate statistics.

AVERAGE YIELD OF CROPS

NOTE.—(1) Average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, adding the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.

(2) The superseded figures of the previous quinquennia have been inserted merely to show the trend of the revision made in each period.

* The estimates for Bihar and Orissa are the standards adopted provisionally by the Agricultural Department of the province, which are partly based on the information collected in 1892. The results of the experiments for the period ending 1916-17, as recorded in table No. 6, are not considered sufficiently reliable to justify a revision of the provincial estimates.

† The averages for Burma for 1916-17 are based on the normal outturns per acre given in the Season and Crop Report of Burma for 1916-17.

(a) As constituted before 1906

(b) As constituted before 1912

						No. 1239, dated 22nd July 1916

- (a) There is no proper cultivation in the area, hence there is no land revenue.
(b) The area represent reserved forests, hence no revenue.
(c) The land transferred is chiefly occupied by P. W. D. Inspection bungalow, etc., and does not bring any revenue.

APPENDIX C

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA

- Agasi, agati, or avati* (*Sesbania grandiflora*)—A vegetable crop.
- Ajmud* (*Carum Roxburghianum*)—A kind of spice.
- Ajwan* (*Carum copticum*)—A kind of spice, "Bishop's weed."
- Akurkura or jevandi* (*Chrysanthemum coronarium*)—A non-food crop.
- Amada or mamidi allam* (*Curcuma amada*)—A condiment.
- Ampazham* (*spondius magnifera*)—The hog plum.
- Arhar* (*Cajanus indicus*)—The pigeon pea.
- Arunelli* (*Phyllanthus distichus*)—Country star gooseberry.
- Bajra* (*Pennisetum typhoideum*)—The spiked millet.
- Bané* (Coorg)—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Barbati* (*Vigna catjang*)—Asparagus, a food grain.
- Barti* (see Wudalu).
- Bel* (*Ægle Marmelos*)—A fruit.
- Bhagdari* (see Narvadari).
- Bilimbi* (*Averrhoa Bilimbi*)—A fruit.
- Bimb* (*Cephalandra indica*)—A fruit.
- Chaplash* (*Artocarpus Chaplasha*)—A tree grown mainly for timber.
- Chayroot* (*Oldenlandia umbellata*)—A dye.
- Cheena* (*Panicum miliaceum*)—The common millet.
- Cheik* (*Coix lachryma-jobi*)—A food grain, "Job's Tear."
- Chikkudukayalu* (*Dolichos lablab*)—The Indian or popat bean.
- Cholam* (see jawar).
- Cholanathu* (*Andropogon sorghum*)—Fodder jawar.
- Chowli* (see Barbati).
- Cumbu* (see Bajra).
- Dani* (*Nipa fruticans*)—A soboliferous palm, the leaves of which are used for thatching purposes, also for matting.
- Dhaincha* (*Sesbania aculeata*)—A plant cultivated mainly for green manure.
- Dhatu* (*Datura alba*)—A drug.
- Dividivi* (*Cæsalpinia coriaria*)—A dye.
- Gajar*—Carrot.
- Garmal* (*Coleus barbatus*)—A fruit.
- Gondli* (see Kutki).
- Gorait* (United Provinces)—Village watchman.
- Henna* (*Lawsonia alba*)—A dye.
- Inám* (Madras)—Alienated villages or lands granted rent-free. *Whole inám* villages are entire villages held on such tenure; *minor ináms* are portions of villages, generally a number of fields, held on *inám* tenure.
- Isfagul* (*Plantago ovata*)—A drug.
- Istamrári* (Punjab, Ajmer-Merwara)—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- Izáfat* (Bombay)—A form of service tenure.
- Izára* (Berar)—Land leased under the waste-land rules on stipulated terms.
- Jagtr* (Berar)—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
- (Ajmer-Merwara)—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay)—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg)—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jambo or naval*—Black plum.
- Jamma* (Coorg)—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government, if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

APPENDIX C—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

- Jawar* (*Sorghum vulgare*)—The great millet.
- Jenugulu*—Asparagus.
- Jingili* (*Sesamum indicum*)—An oilseed.
- Jira*—Caraway.
- Jodi* (Madras)—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.
- Kalparyu*—Kidney bean.
- Kangni* (*Panicum Italicum*)—Italian millet.
- Kamranga* (*Averrhoa Carambola*)—A fruit.
- Kanda* (*Dracontium*)—A vegetable crop.
- Kankrol* (*Momordica cochinchinensis*)—A vegetable crop.
- Karola* (*Momordica Charantia*)—A vegetable crop.
- Karuwapilai* (*Murraya Konigii*)—A condiment.
- Kavali* (*Sterculia urens*)—The Indian katura, a fruit.
- Kavathu* (*Dioscorea alata*)—A tuber used as a food stuff.
- Kodo* or *Kutki* (*Paspalum Scrobiculatum*)—A kind of millet.
- Khalsa* (Bombay)—Government occupancy or raiyatwari tenure.
- (Central Provinces)—Areas settled on malguzari or thekadari tenure, in contradistinction to zamindari.
- (Berar, Ajmer-Merwara)—Land paying full revenue to Government.
- Khatedar* (Berar)—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.
- Khiraj* (Assam)—Land assessed to full revenue.
- Khoti* (Bombay)—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.
- Kirni* (*Mimusops hexandra*)—A large tree cultivated chiefly in north-western India. It produces an olive-shaped yellow berry which is eaten chiefly during times of scarcity, and in the hot weather.
- Korai*—The Indian matting sedge.
- Kolinji* (*Tephrosia purpurea*)—A drug.
- Koorka* (*Strobilanthes*)—A vegetable crop.
- Kuhudi* (*Panicum trypheron*)—A food grain.
- Kulthi* (*Dolichos biflorus*)—Horse gram.
- Kutki* (see Kodo).
- Kwin* (Burma)—An area averaging about one square mile selected as a survey unit on account of some natural features or administrative boundaries.
- Lakhiraj* (Assam)—Revenue-free land.
- Lobia* (see Barbat).
- Madder* (*Rubia tinctorum* and *R. cordifolia*)—A dye.
- Mahalkari* (Bombay)—A revenue and police officer in charge of a sub-division of a taluk.
- Makhan sim*—The sword bean.
- Malguzari* (Central Provinces)—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.
- Mamiatdar* (Bombay)—The chief revenue and police officer (native) in charge of a taluk.
- Mankachu* (*Alocasia indica*)—A root crop.
- Marua* (*Elusine coracana*)—A kind of millet.
- Marukkolundu* (*Artemisia vulgaris*)—The Indian worm wood.
- Mehwasi* (Bombay)—A proprietary tenure assessable to revenue at a lump sum.
- Muafi* (Manpur)—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.
- Mung* (*Phaseolus Mungo*)—Green gram.

APPENDIX C—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued.

- Munsarim* (Berar).—A head native revenue officer.
- Narvadari, Bhagdari* (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.
- Neerali* (*Gynocordia odorata*).—An oilseed.
- Neem or Margosa* (*Melia azadirachta*).—A non-food crop.
- Nela mulaka* (*Solanum xanthocarpum*).—The bogoda brinjal, a drug.
- Nisfkhiraj* (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Palampat* (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.
- Odamula* (*Ochalandra Rheedii*).—A reed.
- Ol or zaminkand*.—The elephant foot, a root crop.
- Panchayat* (Bengal).—A committee of five respectable persons nominated or appointed by local officers of Government in a village or group of villages for the settlement of petty disputes among the people and for dealing with other small local matters, such as caste, occupation, sanitation, etc.
- Papay* (*Carica papaya*).—A fruit.
- Parpattigar* (Coorg).—A revenue officer in charge of a sub-division of a taluk.
- Parvar* (see Patol).
- Patel* (Coorg).—Village headman appointed by Government.
- Patol* (*Trichosanthes dioica*).—A vegetable crop.
- Peshkash* (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.
- Pimakottai or pouna*.—The mast wood.
- Ponnagantikura* (*Alternanthera sessilis*).—A vegetable crop.
- Poramboke* (Madras).—Lands reserved for public or village communal purposes.
- Pôt inâms* (Bombay).—Lands sub-alienated in alienated villages.
- Pôt kharâb* (Berar).—The unculturable area included in a survey number.
- Puliyavara* (*Oxalis corniculata*).—A vegetable crop.
- Ragi* (see Marua).
- Rajawatwari*.—State lands leased to cultivators for a fixed term. A form of tenure in which the settlement of revenue is made by Government with each individual occupant or cultivator of the land for a given term, without the intervention of a third party.
- Randhuni* (see Ajmud).
- Sabai grass* (*Ischæmum Augustifolium*).—A fibre plant.
- Sank-alu* (*Pachyrhizus angulatus*).—A root crop.
- Sapodilla* (*Achras Sapota*).—A fruit.
- Sebestan* (*Cordia Myxa*).—A fruit.
- Shanbóg* (Coorg).—A village accountant appointed by Government.
- Shrotriem* (Madras).—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Siris tree or vagai* (*Albizzia Lebbek*).—A non-food crop.
- Sorrell* (*Rumex vesicarius*).—A vegetable crop.
- Sother*.—Radish.
- Swank* (*Panicum frumentaceum*).—A food grain.
- Talukdari* (Bombay).—A form of proprietary right in force in the northern districts of Bombay.
- Tejpat* (*Cinnamomum Tamala* and *C. obtusifolium*).—A spice.
- Thathameda* (Upper Burma).—Household tax.
- Thattan payara* (see Barbatl).
- Thekadar* (Central Provinces).—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- Thugyi* (Burma).—A village headman.
- Thetke grass* (*Imperata arundinacea*).—A small perennial grass used chiefly for thatching purposes.

APPENDIX C—*concluded*VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—*concluded*

Til (*Sesamum indicum*).—An oilseed.

Uchhe (*Momordica muricata*).—A vegetable crop.

Udai (*Acacia eburnea*).—A thorny tree used as fuel or for fencing purposes.

Udhad-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.

Umblī (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Unda (*Pongamia glabra*).—An oil seed.

Urad (*Phaseolus radiatus*).—Black gram.

Wudalu or barti (*Panicum flavidum*).—A food grain.

Zamindar (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Zamindari.—An estate held on a fixed assessment under a deed of permanent ownership granted by Government.

APPENDIX D

ALPHABETICAL LIST OF CROPS CULTIVATED IN INDIA AND THEIR CLASSIFICATION

Al (<i>see</i> <i>Morinda</i>)		
Aloes	<i>Aloe vera</i>	35. Drugs and Narcotics— others.
Alya (<i>see</i> <i>Cress</i>)		
Amada or Mamidi allam	<i>Curcuma Amada</i>	18. Condiments and spices.
Amaranths	<i>Amarantus</i>	39. Misc. food crops.
Ampazham (<i>see</i> <i>Plum</i>)		
Anise seed	<i>Pimpinella Anisum</i>	18. Condiments and spices.
Apple, wood	<i>Feronia elephantum</i>	38. Fruits and Vegetables including root crops.
„ Rose	<i>Eugenia Jambos</i>	38. " " "
„ Custard	<i>Anona squamosa</i> and <i>A. reticulata</i>	38. " " "
Areca nut or Betel nut	<i>Areca Catechu</i>	35. Drugs and Narcotics— others.
Arhar or pigeon pea	<i>Cajanus indicus</i>	10. Other food grains, etc.
Arnatto or Arnotto	<i>Bixa Orellana</i>	28. Dyes—others.
Arrowroot, West Indian	<i>Maranta arundinacea</i>	39. Misc. food crops.
„ Wild or East Indian	<i>Curcuma augustifolia</i>	39. " " "
Artichoke	<i>Cynara Scolymus</i> or <i>Centaurea Cardunculus</i>	38. Fruits and Vegetables including root crops.
Arum (edible), Kachu or Kachalu	<i>Colocasia Antiquorum</i>	38. " " "
Arunelli (<i>see</i> <i>Gooseberry</i> , country star)		
Bajra (<i>see</i> <i>Millet</i>)		
Barbati, Lobia, Jungulu, Thattan-payara or Chowli (<i>Asparagus</i>)	<i>Vigna Catjang</i>	10. Other food grains, etc.
Barley	<i>Hordeum vulgare</i>	4. Barley.
Barti (<i>see</i> <i>Wudalu</i>)		
Basil, sweet	<i>Ocimum Basilicum</i>	35. Drugs and Narcotics— others.
Beans	<i>Phaseolus lunatus</i>	38. Fruits and Vegetables including root crops.
„ <i>Asparagus</i> (<i>see</i> <i>Barbati</i>)		
„ Sword or Makhan Sim	<i>Canavalia ensiformis</i> , <i>C. gladiata</i>	38. Fruits and Vegetables including root crops.
„ French	<i>Phaseolus vulgaris</i>	38. " " "
„ Goa	<i>Psophocarpus tetragonolobus</i>	38. " " "
„ Indian, Chikkudikayalu, or Popat	<i>Dolichos lablab</i>	38. " " "
„ Kidney, Moth, or Kalpayaru	<i>Phaseolus aconitifolius</i>	38. " " "
„ Soy	<i>Glycine hispida</i>	38. " " "
Beetroot	<i>Beta vulgaris</i>	38. " " "
Bel	<i>Ægle Marmelos</i>	38. " " "
Betel vine	<i>Piper Betle</i>	35. Drugs and Narcotics— others.
„ nut (<i>see</i> <i>Arecanut</i>)		
Bhindi (<i>see</i> <i>Hibiscus</i> , edible)		
Bilimbi	<i>Averrhoa Bilimbi</i>	38. Fruits and Vegetables including root crops.
Bimb	<i>Cephalandra indica</i>	38. " " "
Bishop's weed (<i>see</i> <i>Ajwan</i>)		
Borage, country	<i>Coleus aromaticus</i>	35. Drugs and Narcotics— others.
Brinjal	<i>Solanum Melongena</i> , <i>S. longum</i>	38. Fruits and Vegetables including root crops.
„ bogoda or nela mulaka	<i>Solanum xanthocarpum</i>	35. Drugs and Narcotics— others.
Buck wheat (<i>see</i> <i>Wheat</i>)		

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Cabbage	<i>Brassica oleracea</i>	38. Fruits and Vegetables including root crops.
Caraway or Jira	<i>Carum Carui</i>	18. Condiments and spices.
„ Black or Shahjira	<i>Carum Bulbocastanum</i>	18. „ „ „
Cardamom Aromatic	<i>Amomum aromaticum</i>	18. „ „ „
„ greater	„ <i>subulatum</i>	18. „ „ „
„ lesser	<i>Elettaria Cardamomum</i>	18. „ „ „
Carob or Locust tree	<i>Ceratonia Siliqua</i>	37. Fodder crops.
Carrot or Gajar	<i>Daucus Carota</i>	38. Fruits and Vegetables including root crops.
Cashew nut	<i>Anacardium occidentale</i>	38. „ „ „
Cassava	<i>Manihot utilissima</i> and <i>M. palmata</i>	38. „ „ „
Castor	<i>Ricinus communis</i>	16. Oilseeds—others.
Cauliflower	<i>Brassica oleracea</i>	38. Fruits and Vegetables including root crops.
Celery	<i>Apium graveolens</i>	38. „ „ „
Chaplash (<i>see</i> Sam tree)		
Chayroot	<i>Oldenlandia umbellata</i>	28. Dyes—others.
Cheena (<i>see</i> Millet)		
Cheik (<i>see</i> Job's Tear)		
Chicory	<i>Cichorium Intybus</i>	38. Fruits and Vegetables including root crops.
Chickling Vetch (<i>see</i> Vetch)		
Chillies	<i>Capsicum sp.</i>	18. Condiments and spices.
Chikkudukayalu (<i>see</i> Beans, Indian)		
Cholum (<i>see</i> Millet)		
Cholanathu (fodder Cholum)	<i>Andropogon Sorghum</i>	37. Fodder crops.
Chowli (<i>see</i> Barbati)		
Chrysanthemum, Akurkura, or Jevandi	<i>Chrysanthemum corona-</i> <i>rium.</i>	40. Miscellaneous non-food crops.
Cinchona	<i>Cinchona sp.</i>	33. Cinchona.
Cinnamon	<i>Cinnamomum zeylanicum</i>	18. Condiments and spices.
Citron or lime or lemon	<i>Citrus medica</i>	38. Fruits and Vegetables including root crops.
Cloves	<i>Eugenia caryophyllata</i> or <i>Caryophyllus aromaticus.</i>	18. Condiments and spices.
Coconut	<i>Cocos nucifera</i>	38. Fruits and Vegetables including root crops.
Coffee	<i>Coffea arabica</i>	30. Coffee.
Coriander	<i>Coriandrum sativum</i>	18. Condiments and spices.
Cotton	<i>Gossypium sp.</i>	21. Cotton.
Cress	<i>Lepidium sativum</i>	38. Fruits and Vegetables including root crops.
Cucumber	<i>Cucumis sativus</i>	38. „ „ „
Cumbu (<i>see</i> Millet)		
Cumin	<i>Cuminum Cyminum</i>	18. Condiments and spices.
Custard Apple (<i>see</i> Apple)		
Dani	<i>Nipa fruticans</i>	40. Miscellaneous non-food crops.
Date palm (<i>see</i> Palm)		
Dhaincha	<i>Sesbania aculeata</i>	40. Miscellaneous non-food crops.
Dhatura	<i>Datura alba</i>	35. Drugs and Narcotics—others.
Dill or Sowa	<i>Peucedanum graveolens</i>	16. Oilseeds—others.
Dividivi	<i>Cæsalpinia coriara</i>	28. Dyes—others.
Drumsticks or Horse-radish	<i>Moringa pterygosperma</i>	38. Fruits and Vegetables including root crops.
Elephant foot, Zaminkand or Ól	<i>Amorphophallus campanu-</i> <i>latus.</i>	38. „ „ „
Elephant yam	<i>Tryphonium trilobatum</i>	38. „ „ „
Fennel	<i>Fœniculum vulgare</i>	18. Condiments and spices.

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Fenugreek	Trigonella fœnum grœcum .	18. Condiments and spices.
Field Vetch (<i>see</i> Vetch)		
Fig	Ficus Carica	38. Fruits and Vegetables including root crops.
Flea-bane, purple	Vernonia anthelmintica .	35. Drugs and Narcotics— others.
Flowers		40. Miscellaneous non-food crops.
Gajar (<i>see</i> Carrot)		
Garlic	Allium sativum	18. Condiments and spices.
Garmal	Coleus barbatus	38. Fruits and Vegetables including root crops.
Gawar (<i>see</i> Vetch)		
Ginger	Zingiber officinale	18. Condiments and spices
Goa bean (<i>see</i> Bean)		
Gondli (<i>see</i> Millet)		
Gooseberry, Cape—or tepari	Physalis peruviana	38. Fruits and Vegetables including root crops.
„ Country star or Arunelli	Phyllanthus distichus	38. „ „ „
Goose foot	Chenopodium album	38. Fruits and Vegetables including root crops.
Gourd, Snake	Trichosanthes anguina	38. „ „ „
„ Bottle	Lagenaria vulgaris	38. „ „ „
„ Towel	Luffa acutangula	38. „ „ „
Gourd, Red or melon pumpkin	Cucurbita maxima	38. „ „ „
Gourd Melon, white	Benincasa cerifera	38. „ „ „
Gram	Cicer arietinum	9. Gram.
„ Field	Phaseolus trilobus	10. Other food grains, etc.
„ Green or Mung	Phaseolus Mungo	10. „ „ „
„ Horse or Kulthi	Dolichos biflorus	10. „ „ „
„ Black or Urad (Mati kalai)	Phaseolus radiatus	10. „ „ „
Grape	Vitis vinifera	38. Fruits and Vegetables including root crops.
Groundnut	Arachis hypogœa	15. Groundnut.
Guava	Psidium Guajava	38. Fruits and Vegetables including root crops.
Guinea grass	Panicum maximum	37. Fodder crops.
Gumberry	Cordia Rothii	38. Fruits and Vegetables including root crops.
Hemp, Indian, or Ganja	Cannabis sativa	34. Indian Hemp.
„ Sunn	Crotalaria juncea	23. Fibres—others.
„ Deccan	Hibiscus cannabinus	23. „ „
„ Sisal	Agave sisalana	23. „ „
Henna	Lawsonia alba	28. Dyes—others.
Hibiscus, edible or bhindi	Hibiscus esculentus	38. Fruits and Vegetables including root crops.
Horse-radish (<i>see</i> Drumsticks)		
Indian Hemp (<i>see</i> Hemp)		
Indian worm wood (<i>see</i> Marukkolundu)		
Indigo	Indigofera sumatrana and I. arrecta.	27. Indigo.
Isfagul	Plantago ovata	35. Drugs and Narcotics— others.
Jack fruit	Artocarpus integrifolia	38. Fruits and Vegetables including root crops.
Jambootree (<i>see</i> Plum, black)		
Jawar (<i>see</i> Millet)		
Jenugulu (<i>see</i> Barbati)		
Jevandi (<i>see</i> Chrysanthemum)		
Jinjili (<i>see</i> Sesamum)		
Jira (<i>see</i> Caraway)		
Job's Tear or Cheik	Coix lachryma-jobi	10. Other food grains, etc.

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Jujube	Zizyphus Jujuba	38. Fruits and Vegetables including root crops.
Jute	Corchorus sp.	22. Jute.
Kachu or Kachalu (<i>see</i> Arum)		
Kakri (<i>see</i> Melon)		
Kalpayaru (<i>see</i> Beans, Kidney)		
Kamranga	Averrhoa Carambola	38. Fruits and Vegetables including root crops.
Kanda	Dracontium	38. Ditto. ditto.
Kangni (<i>see</i> Millet)		
Kankrol	Momordica cochinchinensis	38. Fruits and Vegetables including root crops.
Kaon (<i>see</i> Millet)		
Kapok	Eriodendron anfractuosum	23. Fibres—others.
Karola	Momordica Charantia	38. Fruits and Vegetables including root crops.
Karuvapilai	Murraya Koenigii	18. Condiments and spices.
Kavali or Indian Katura	Sterculia urens	38. Fruits and Vegetable including root crops.
Kavathu, pannikkavathu, pallakavathu, kolkavathu	Dioscorea alata	38. Ditto. ditto.
Kharbuja (<i>see</i> Melon)		
Khesari (<i>see</i> Vetch)		
Khurfa (<i>see</i> Purslane)		
Kidney bean (<i>see</i> Bean)		
Kirni	Mimusops hexandra	39. Miscellaneous food crops.
Kodo (<i>see</i> Millet)		
Korai (<i>see</i> Matting sedge, Indian)		
Kokam (<i>see</i> Mangosteen)		
Kolinji or vempali	Tephrosia purpurea	35. Drugs and Narcotics—others.
Koorka	Strobilanthes	38. Fruits and Vegetables including root crops.
Kuhudi	Panicum trypheron	10. Other food grains, etc.
Kulthi (<i>see</i> Gram)		
Kutki (<i>see</i> Millet)		
Lemon (<i>see</i> Citron)		
Lentils	Lens esculenta or Ervam lens	10. Other food grains, etc.
Lettuce	Lactuca Scariola	38. Fruits and Vegetables including root crops.
Lime (<i>see</i> Citron)		
Linseed	Linum usitatissimum	12. Linseed.
Lobia (<i>see</i> Barbatil)		
Locust tree (<i>see</i> Carob)		
Lucerne	Medicago sativa	37. Fodder crops.
Madder	Rubia tinctorum and R. cordifolia.	28. Dyes—others
Mahua	Bassia latifolia and B. longifolia.	39. Miscellaneous food crops.
Maize	Zea Mays	8. Maize.
Makhan Sim (<i>see</i> Beans, Sword)		
Mango	Mangifera indica	38. Fruits and Vegetables including root crops.
Mangosteen or Kokam	Garcinia indica	38. " " "
Mankachu	Alocasia indica	38. " " "
Margosa or Neem tree	Melia azadirachta	40. Miscellaneous non-food crops.
Marians	Bouea burmanica	38. Fruits and Vegetables including root crops.
Marjoram	Origanum vulgare	18. Condiments and spices.
Marua (<i>see</i> Millet)		
Marukkolundu or Indian wormwood	Artemisia vulgaris	40. Miscellaneous non-food crops.

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Mast wood	Calophyllum inophyllum .	16. Oilseeds—others.
Mati kalai (<i>see</i> Black gram)		
Matting sedge, Indian or Korai	Cyperus corymbosus, C. tegetum.	23. Fibres—others.
Medlar, Indian	Vangueria edulis	38. Fruits and Vegetables including root crops.
Melon, Kharbuja	Cucumis Melo	38. " " "
" Kakri	Cucumis Melo var. momordica	38. " " "
" Musk	Cucurbita moschata	38. " " "
" Water	Citrullus vulgaris	38. " " "
" White Gourd (<i>see</i> Gourd)		
Metha (Fenugreek)	Trigonella fœnum-græcum	18. Condiments and spices.
Millet, Common or Cheena	Panicum miliaceum	10. Other food grains, etc.
" Great or jawar or cholum	Sorghum vulgare	5. Cholum or Jawar.
" Italian, Kangni, or Kaon	Panicum Italicum or Setaria italica	10. Other food grains, etc.
" Kodo or Varagu	Paspalum scrobiculatum	10. " "
" Little, Kutki, or Gondli	Panicum miliare	10. " "
" Marua or Ragi	Elusine Coracana	7. Ragi or marua.
" Spiked, Bajra or Cumbu	Pennisetum typhoidum	6. Cumbu or Bajra.
Mint or Pudina	Mentha arvensis	18. Condiments and spices.
Morinda or Al	Morinda tinctoria	28. Dyes—others.
Moth (<i>see</i> Bean)		
Mulberry	Morus indica	40. Miscellaneous non-food crops.
Mung (<i>see</i> Gram)		
Mustard	Brassica sp.	14. Rape and Mustard.
Naval (<i>see</i> Plum, black)		
Neerali	Gynocordia odorata	16. Oilseeds—others.
Neem tree (<i>see</i> Margosa)		
Niger Seed or Sorguja	Guizotia abyssinica	16. Oilseeds—others.
Nutmeg	Myristica fragrans	18. Condiments and spices.
Oats	Avena sativa	37. Fodder crops.
Odamula (reeds)	Ochalandra Rheedii	40. Miscellaneous non-food crops.
Ol (<i>see</i> Elephant foot)		
Onion	Allium Cepa	18. Condiments and spices.
Opium	Papaver somniferum	29. Opium.
Orache, garden (<i>see</i> spinach)		
Oranges	Citrus Aurantium	38. Fruits and Vegetables including root crops.
Palm, Date	Phoenix sylvestris	20. Sugar—others.
" Palmyra	Borassus flabellifer	20. " "
Papay	Carica papaya	38. Fruits and Vegetables including root crops.
Parvar or Patol	Trichosanthes dioica	38. " " "
Peach	Prunus persica	38. " " "
Peas	Pisum sativum or Pisum arvense.	10. Other food grains, etc.
Peanut (<i>see</i> Groundnut)		
Pepper	Piper or Capsicum	18. Condiments and spices.
" Black	Piper nigrum	18. " " "
" Long	Piper longum	18. " " "
Pigeon or bottle grass	Setaria glauca	10. Other food grains, etc.
Pigeon pea (<i>see</i> Arhar)		
Pimakottai, Pouna (<i>see</i> Mastwood)		
Pine apple	Ananas sativa	38. Fruits and Vegetables including root crops.
Plantain	Musa sapientum	38. " " "
Plum, black, Jambo tree or Naval	Eugenia Jambolana	38. " " "
" Hog, or Ampazham	Spondias mangifera	38. " " "
Poi (<i>see</i> Spinach)		

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Pomegranate	<i>Punica granatum</i> . . .	38. Fruits and Vegetables including root crops.
Pomelo	<i>Citrus decumana</i> . . .	38. " " "
Ponnagantikura	<i>Alternanthera sessilis</i> . . .	38. " " "
Potato	<i>Solanum tuberosum</i> . . .	38. " " "
„ Sweet	<i>Ipomoea Batatas, Batatas edulis.</i>	38. " " "
Pudina (<i>see</i> Mint)		
Puliyavara	<i>Oxalis corniculata</i> . . .	38. Fruits and Vegetables including root crops.
Pumpkin	<i>Cucurbita pepo</i> . . .	38. " " "
Pumpkin Melon (<i>see</i> Gourd, red)		
Radish or Sother	<i>Raphanus sativus</i> . . .	38. Fruits and Vegetables including root crops.
Ragi (<i>see</i> Millet)		
Randhuni (<i>see</i> Ajmud)		
Rapeseed	<i>Brassica sp.</i> . . .	14. Rape and Mustard.
Raspberry	<i>Rubus lasiocarpus</i> . . .	38. Fruits and Vegetables including root crops.
Rhea	<i>Boehmeria nivea</i> . . .	23. Fibres—others.
Rice	<i>Oryza sativa</i> . . .	2. Rice.
Rose apple (<i>see</i> Apple)		
Roselle	<i>Hibiscus subdariffa</i> . . .	38. Fruits and Vegetables including root crops.
Rubber (India)	<i>Hevea brasiliensis, manihot Glaziovii.</i>	40. Miscellaneous non-food crops.
Sabai grass	<i>Ischomum augustifolium</i> . . .	23. Fibres—others.
Safflower	<i>Carthamus tinctorius</i> . . .	28. Dyes—others.
Saffron	<i>Crocus sativus</i> . . .	28. " " "
Sage	<i>Salvia officinalis</i> . . .	18. Condiments and spices.
Sam tree or Chaplash	<i>Artocarpus Chaplasha</i> . . .	40. Miscellaneous non-food crops.
Sank-alu	<i>Pachyrhizus angulatus</i>	38. Fruits and Vegetables including root crops.
Sapodilla	<i>Achras Sapota</i> . . .	38. " " "
Sawan (<i>see</i> Swank)		
Sebestan	<i>Cordia myxa</i> . . .	38. Fruits and Vegetables including root crops.
Senna	<i>Cassia angustifolia and C. ovata.</i>	35. Drugs and Narcotics—others.
Sesamum, til or jinjili	<i>Sesamum indicum</i> . . .	13. Sesamum.
Shahjira (<i>see</i> Caraway, black)		
Shama (<i>see</i> Swank)		
Singhara or water caltrop	<i>Trapa bispinosa</i> . . .	38. Fruits and Vegetables including root crops.
Siris tree or vagai	<i>Albizia Lebbek</i> . . .	40. Miscellaneous non-food crops.
Sisal hemp (<i>see</i> Hemp)		
Soapnut or Kumkudu-Kaya	<i>Sapindus trifoliatus</i> . . .	35. Drugs and Narcotics—others.
Sorguja (<i>see</i> Niger seed)		
Sorrell	<i>Rumex vesicarius</i> . . .	38. Fruits and Vegetables including root crops.
Sowa (<i>see</i> Dill)		
Sother (<i>see</i> Radish)		
Soy bean (<i>see</i> Bean)		
Spelt wheat (<i>see</i> Wheat)		
Spinach	<i>Spinacea oleracea</i> . . .	38. Fruits and Vegetables including root crops.
„ Indian or poi	<i>Basella alba</i> . . .	38. " " "
„ Mountain, or Garden Orache	<i>Atriplex hortensis</i> . . .	38. " " "
Strawberry	<i>Fragaria vesca</i> . . .	38. " " "
Sugarcane	<i>Saccharum officinarum</i> . . .	19. Sugarcane.

APPENDIX D—concluded

ALPHABETICAL LIST OF CROPS—concl'd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Sunflower	Helianthus Annuus	16. Oilseeds—others.
Swallow-wort	Calotropis sp.	23. Fibres—others.
Swank, Sawan, or Shama	Panicum frumentaceum	10. Other food grains, etc.
Sweet flag	Acorus Calamus	35. Drugs and Narcotics—others.
Sweet potato (<i>see</i> Potato)		
Tamarind	Tamarindus indica	18. Condiments and spices.
„ Manila	Pithecolobium dulce	38. Fruits and Vegetables including root crops.
Taramira	Eruca sativa	14. Rape and Mustard.
Tea	Camellia Thea	31. Tea.
Tejpat	Cinnamomum Tamala and C. obtusifolium.	18. Condiments and spices.
Tepari (<i>see</i> Gooseberry)		
Thattan-payara (<i>see</i> Barbati)		
Thetkè (grass)	Imperata arundinacea	40. Miscellaneous non-food crops.
Til (<i>see</i> Sesamum)		
Tobacco	Nicotiana Tabacum and N. Rustica.	32. Tobacco.
Tomato	Lycopersicum esculentum	38. Fruits and Vegetables including root crops.
Tori, Toria	Brassica Napus	14. Rape and Mustard.
Turmeric	Curcuma longa	18. Condiments and spices.
Turnip	Brassica Rapa	38. Fruits and Vegetables including root crops.
Uchhe	Momordica muricata	38. „ „ „
Udai	Acacia eburnea	40. Miscellaneous non-food crops.
Unda	Pongamia glabra	16. Oilseeds—others.
Urad (<i>see</i> Gram)		
Varagu (<i>see</i> Millet)		
Vagai (<i>see</i> Siris tree)		
Vempali (<i>see</i> Kolinji)		
Vetch, Field or gawar	Cyamopsis psoralioiðes	37. Fodder crops.
„ Chickling or khesari	Lathyrus sativus	10. Other food grains, etc.
Water caltrop (<i>see</i> Singhara)		
„ melon (<i>see</i> Melon)		
Wheat	Triticum sativum	3. Wheat.
„ Buck	Fagopyrum esculentum	10. Other food grains, etc.
„ Spelt	Triticum sativum var Spelta.	3. Wheat.
Wood apple (<i>see</i> Apple)		
Wudalu or barti	Panicum flavidum	10. Other food grains, etc.
Yams	Dioscorea sp.	38. Fruits and Vegetables including root crops.
Zaminkand (<i>see</i> Elephant foot)

Agricultural Statistics of India

1916-17

VOLUME II—INDIAN STATES

Report

To

THE SECRETARY TO THE GOVERNMENT OF INDIA,
DEPARTMENT OF REVENUE AND AGRICULTURE.

SIR,

I have the honour to submit the second volume of Agricultural Statistics for 1916-17. It deals with the Agricultural Statistics of Indian States. As in the four previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle as far as reported in each of the years 1905-06 to 1916-17 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes as additions have been made in the number of reporting States from time to time. Explanatory notes have been inserted at the foot of the tables. Two charts and an index for easy reference have been added to the volume. It should be noted that, for the reasons explained below, the agricultural statistics of Indian States are incomplete and are of far less accuracy than those of British Provinces published in Volume I. The question of the improvement of the statistics of Indian States has been taken up by the Government of India, and it is expected that more complete and accurate statistics for them will be available in the near future. As one-third of the area of India is under these States, the importance of their statistics in the all-India returns can scarcely be over-estimated.

The total area of Indian States is approximately 497,000,000 acres (777,000 square miles), with a population of 72 millions according to the census of 1911. These are divided for the purposes of agricultural statistics into two main classes, namely, (1) States under the control of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States under the control of Local Governments and Administrations.*—The total area of these States is 181,022,000 acres, with a population of some 27 millions. They are divided into the following main groups:—

	Area Thousand acres	Population Thousands
Bombay and Sind States	40,877	7,412
Madras States	6,790	4,812
Punjab States	24,511	4,213
Bihar and Orissa States	18,335	3,945
Central Provinces States	19,960	2,117
Burma States (including Shan States)	38,402	1,540

	Area Thousand acres	Population Thousands
North-West Frontier Province States (including tribal areas)	16,380	1,379
United Provinces States	4,345	832
Bengal States	3,452	823
Assam States	7,970	346
Total	181,022	27,419

The total areas of all these States (with the exception of the Shan States in Burma and the tribal areas in the North-West Frontier Province) are included in the areas of the several British Provinces stated in column 2 of table I of Volume I (British India), but are shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. Of these States, agricultural statistics are at present available only for the following twenty-eight States in the Madras Presidency and the Punjab, and are dealt with in this volume :—

	Area Thousand acres	Population Thousands
<i>Madras States—</i>		
Travancore	4,868	3,429
Cochin	903	918
Pudukkottai	754	412
Banganapalle	163	39
Sandur	102	14
<i>Punjab States—</i>		
Patiala	3,795	1,408
Jind	853	272
Nabha	620	249
Bahawalpur	12,700	781
Sirmur (Nahan)	631	139
Kalsia	122	56
Pataudi	34	20
Loharu	143	19
Dujana	57	25
Kapurthala	417	268
Malerkotla	107	71
Faridkot	412	130
Simla Hill States (comprising Bashahr, Jubbal, Theog, Kumbarsain, Khaneti, Bilaspur, Baghal, Ghund, Mehlog, Baghat, and Madhan)	3,231	276
Total	29,912	8,526

(2) *States having direct political relations with the Government of India.*—
These are divided into the following main groups :—

	Area Thousand acres	Population Thousands
Hyderabad	52,927	13,375
Baroda	5,236	2,033
Mysore	18,868	5,806
Kashmir	54,036	3,158
Rajputana States	82,552	10,530
Central India States	49,515	9,357
Baluchistan (Native)	51,462	420
Sikkim	1,804	88
Total	316,400	44,767

No agricultural statistics are available for Hyderabad,* Baroda, Baluchistan (Native), or Sikkim. Of the remainder, returns are received only from the following eighteen States :—

	Area Thousand acres	Population Thousands
Mysore	18,868	5,806
Kashmir	54,036	3,158
<i>Rajputana States—</i>		
Jaipur	9,971	2,637
Bikaner	14,922	701
Marwar	22,410	2,058
Tonk	1,634	303
Alwar	2,037	792
Kishangarh	549	87
Bharatpur	1,263	559
Jhalawar	527	96
Kotah	3,638	639
<i>Central India States—</i>		
Gwalior	16,511	3,102
Indore	6,080	1,008
Bhopal	4,657	730
Rajgarh	613	127
Narsingarh	469	110
Barwani	754	109
Nagod	324	75
Total	159,263	22,097

The total area of all the forty-six reporting States thus amounts to 189,175,000 acres, with a population of nearly 31 millions. These States, therefore, represent 38 per cent of the total area, and 43 per cent of the total population, of all the Indian States.

The dates from which the returns of agricultural statistics have been prepared in these forty-six reporting States are as follows :—

Mysore	1886-87
Jaipur	1892-93
Gwalior	1896-97
Bikaner, Marwar, Tonk	1898-99
Alwar, Bharatpur, Kishangarh, Jhalawar, Kotah	1900-01
Indore, Rajgarh, Narsingarh, Nagod, Patiala, Jind, Nabha, Bahawalpur	1907-08
Pudukkottai, Banganapalle, Sandur, Cochin, Travancore, Bhopal, Barwani, Sirmur, Kalsia, Pataudi, Loharu, Dujana, Kapurthala, Malerkotla, Faridkot, Simla Hill States (11 in number)	1908-09
Kashmir	1910-11

The returns for the different States relate to the years ending the dates stated below, so far as information is now available :—

Bikaner, Sandur, Banganapalle	year ended 31st March
Indore	„ in June
Mysore, Gwalior, Nagod, Pudukkottai, Rajgarh, Barwani	„ 30th June
Travancore, Cochin	„ in August
Jaipur	„ 31st August
Kishangarh	„ 15th September
Marwar, Kotah, Jhalawar, Bhopal	„ 30th September
Tonk, Narsingarh, Bharatpur, Alwar	„ 31st October

* Arrangements are being made by His Exalted Highness the Nizam's Government to prepare agricultural statistics for the Hyderabad State. The statistics for this State, when prepared, will fill the biggest gap in the Agricultural Statistics of Indian States.

Table I,
Total area.

From the total area of all the forty-six reporting States (189,175,000 acres), deduction must be made for 107,515,000 acres for which statistics are not available. These comprise chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures. The net area actually covered by these statistics is, therefore, only 81,660,000 acres by professional survey,* or 81,775,000 acres according to village papers.*

Table II,
Classification of area.

This area is classified, for the purposes of agricultural statistics, as shown in the margin. About 9,791,000 acres, or 12 per cent of the total, are occupied by forests; and the area not available for cultivation, that is, land absolutely barren, or unculturable, or covered by buildings, water, and roads, or otherwise appropriated to

uses other than agriculture, amounts to 18,957,000 acres or 23·2 per cent. The balance, 53,027,000 acres or 64·8 per cent, represents the area available for cultivation. Of this, 13,973,000 acres, or 17·1 per cent of the total area, represent culturable waste, *i.e.*, land available for cultivation but not taken up, and 5,641,000 acres, or 6·9 per cent, were kept fallow in the year under report. The net area actually cropped in the year was thus 33,413,000 acres (40·8 per cent of the total area), which shows an increase of 3,907,000 acres as compared with the previous year. This net cropped area, however, excludes areas cropped more than once in the year. If areas cropped more than once are taken as separate areas for each crop, the gross area cropped in the year of report amounts to 36,530,000 acres, as against 31,570,000 acres in the preceding year, or an increase of 15·7 per cent.

Irrigation.

The total area irrigated in the reporting States in 1916-17 was 6,565,000 acres as against 6,218,000 acres in the preceding year. Of this, 2,214,000 acres were irrigated from Government canals, 721,000 acres from private canals, 865,000 acres from tanks, 1,339,000 acres from wells, and the remaining 1,426,000 acres from other sources of irrigation. These figures, however, do not take into account areas cropped more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas cropped more than once are counted as separate areas for each crop, the gross area of irrigated crops amounts to 7,094,000 acres, against 6,611,000 acres in the preceding year. Of this area, 6,156,000 acres were under food crops.

Table III,
Area under crops.

The gross area cultivated with crops in the reporting States was, as stated above, 36 million acres in 1916-17 as against 31 million acres in the preceding year, or an increase of 16 per cent. The different classes of crops and the area occupied by each, so far as details are available, are stated in the margin. Of the total cropped area, food crops occupied about 30,250,000 acres or 84 per cent and non-food crops about 5,949,000 acres or 16 per cent. Of the food-crops, food grains (cereals and pulses) occupied as much as 27,724,000 acres, or 77 per cent of the total cropped area, and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops) together occupied some 2,526,000 acres, or only 7 per cent of the total. Of the non-

food crops, oilseeds occupied 1,988,000 acres or 5·5 per cent of the total cropped area, fibres such as cotton, hemp, etc., 1,645,000 acres or 4·6 per cent, and fodder crops 1,371,000 acres or 3·8 per cent. The other non-food crops—dyes, drugs and narcotics (tobacco, tea, coffee, opium, etc.), and miscellaneous non-food crops—together covered some 945,000 acres or 2·5 per cent of the total.

* For explanation of the terms "professional survey" and "village papers," see footnotes to Table I (page 6) of this Volume and the Report prefixed to Volume I.

Thousand acres			
1915-16	1916-17	Increase	
Rice	2,540	2,760	220
Wheat	3,682	4,349	667
Barley	873	965	92
Jawar	4,746	4,947	201
Bajra	2,548	3,232	684
Ragi	2,252	2,405	153
Maize	1,120	1,214	94
Gram	2,980	4,002	1,022
Other grains and pulses	3,163	3,850	687

The area under oilseeds (linseed, sesamum, rapeseed, mustard, etc.) increased by 219,000 acres or 12 per cent, that under fibres (cotton, hemp, etc.), by 518,000 acres or 46 per cent, that under drugs and narcotics by 8,000 acres or 3 per cent, that under condiments and spices increased by 37,000 acres or 14 per cent, and that under fruits and vegetables by 133,000 acres or 24 per cent. On the other hand, the area under sugar shows a decrease of 2,000 acres or 2 per cent.

The total extent of land on which more than one crop was raised during the year was 3,118,000 acres as against 2,064,000 acres in the preceding year.

Tables IV, V, and VI are very incomplete, as figures for these tables are not furnished by many of the reporting States. Table IV is prepared by only twenty States, namely, Mysore, Pudukkottai, Banganapalle, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bhara tpur, Jhalawar, Tonk, and Kotah. According to the latest statistics, the total number of live-stock of the bovine class (bulls and bullocks, cows, buffaloes, and calves) in these twenty States is 14,801,000, that of the ovine class (sheep and goats) 9,448,000, and that of horses and ponies, mules and donkeys, and camels 451,000. The numbers of ploughs and carts are 2,072,000 and 577,000, respectively.

Table V (Land revenue) is prepared by eighteen States, namely, Mysore, Pudukkottai, Banganapalle, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Bikaner, Marwar, Jaipur, Alwar, Bharatpur, Jhalawar, Tonk, and Kotah; and Table VI (Transfers of land) is prepared by only five States, namely, Mysore, Banganapalle, Cochin, Barwani, and Alwar.

The Appendix explains vernacular terms used in this volume, and the charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area cropped in 1916-17 with shares of food and non-food crops.

I have the honour to be,

SIR,

Your most obedient Servant,

DEPARTMENT OF STATISTICS, }
Calcutta, April 23, 1919 . }

G. FINDLAY SHIRRAS,
Director of Statistics.

Note.—The entries in this table regarding classification of area and areas under food and non-food crops comprise figures for Mysore, Jaipur, Gwalior, Bikaner, Marwar, Tonk, Alwar, Kishangarh, Bharatpur, Jhalawar, and Kotah from 1905-06; to which were added those for Indore, Rajgarh, Narsingarh, Nagod, Patiala, Jind, Nabha, and Bahawalpur from 1907-08; for Pudukkottai, Banganapalle, Sandur, Cochin, Travancore, Bhopal, Barwani, Sirmur, Kalsia, Pataudi, Loharu, Dujana, Kapurthala, Malerkotla, Faridkot, and the Simla Hill States from 1908-09, and for Kashmir from 1910-11.

* The entries regarding cattle comprise Mysore, Jaipur, Gwalior, Bikaner, Marwar, Tonk, Alwar, Kishangarh, Bharatpur, Jhalawar, and Kotah from 1905-06; to which were added those for Indore, Rajgarh, and Narsingarh from 1907-08; for Bhopal, Barwani, and Nagod from 1908-09; for Banganapalle and Cochin from 1910-11; and for Pudukkottai from 1916-17. Detailed figures for the States for five years are given in Table IV (pages 86-88).

(a) Excluding areas for which no returns are available

(b) Condiments and spices, fruits and vegetables, and miscellaneous food crops

(c) Cinchona, Indian hemp, other dyes, other drugs and narcotics, and miscellaneous non-food crops

(d) The total of food crops and non-food crops shown here does not agree with the total area cropped shown in Summary Table No. 4 for the reason stated in the footnote to that table (page 5)

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In States where there has been no professional survey, the figures are based on the best information available.

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and III are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and III is correspondingly increased.

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" means "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns.

(a) Previous year's figure repeated [vide footnote (a) on page 14]

(b) Column 3 states the area of unsurveyed forests.

See explanations given in the footnotes (page 6)

(a) Column 3 states the areas of jagir and other alienated lands

(b) Column 2.—As there has been no revenue survey so far, this column states the area of the State according to the best information available. Column 3 states the areas of jagir and muafi villages, the boundaries of which have been demarcated, but for which the statistics required for other tables are not available. Columns 4 and 5.—In the absence of any revenue survey data, the figures in column 5 are repeated in column 4

(c) Returns for 1910-11 not having been received, the figures for 1909-10 have been repeated

(d) Column 3 states the area held by jagirdars and udakdars, as well as the muafi plots in khalsa villages for which no separate record is maintained

(a) Column 2 states the area of the State according to Settlement records

(b) Statistics are furnished by eleven States of this group, namely, Bashahr, Jubbah, Theog, Kumbarsain, Khaneti, Bilaspur, Baghal, Ghund, Mehlog, Baghat, and Madhan, the last two but one from 1910-11 and the last one from 1911-12. These represent about 86 per cent of the aggregate area of all the States comprised in the group. The returns, however, relate only to the settled portions of the reporting States, except Bilaspur, Baghal, and Mehlog, for which complete returns have been received. Column 2 states the area of the settled portions of the States named above, except Bilaspur, Baghal, and Mehlog, for which the whole area is included

(c) See footnote (e) on page 12

(a) Column 2 states the area of the State as ascertained by revenue survey. Column 3 exhibits the area of jodi, kayam-gutta, and sarvamanayam villages, and jagirs for which the statistics required for the other tables are not available at present. Column 5.—The figures in column 4 are repeated

(b) Column 3 states the estimated areas of jagir, muafi, ubari, tanka, istamrar and such other villages as are still unsurveyed

(c) Column 2 states the whole area of the State, excluding the areas covered by the Indore Residency, the Mhow Cantonment and the Hirasur Thakurats. Column 3 states the areas of jagir, istamrar, and forest villages, and also of some of the outbandi villages

(d) Column 3 states the areas of jagir and such other villages as are still unsurveyed; it also includes the areas which formerly were parts of jagir villages, but which, after the completion of the settlement operations, either lapsed to or were resumed by the State

(e) Column 3 states the areas of jagir and such other villages as are still unsurveyed. It also includes the area of those khalsa villages which have not yet been regularly assessed; these are chiefly the latest acquisition to khalsa under the law of escheat. Columns 4 and 5.—The area by village papers does not differ from the area by survey, for, although differences occur under the different classes of soil, the total area of each village is the same in both cases

(a) Column 2 states only the khalsa area, forming about one-third of the whole area of the State. The whole area of the State according to the Census of 1911 is 9,970,560 acres, which is shown in table No. 5. Column 3 states the area of detached revenue-free plots situated in khalsa villages

(b) Column 3 states the area of jagir villages

(c) Columns 2 and 4 state the area of the State according to the professional survey of 1855. Column 5 states the area of the State according to the settlement records

(d) Column 3 states the area of entire jagir and muafi villages, which have not yet been surveyed, and the detached revenue-free plots situated in khalsa villages

(e) Column 2 states the whole area of the State according to the Census of 1911. Column 3 states the areas of Bhadarwa and Punch, certain unsettled areas and frontier tracts which are not directly looked after by the Revenue Department of the State, and also certain other areas for which returns are not available. Columns 4 and 5 entirely exclude the area of Bhadarwa (Jagir) and Punch and Frontier Ilagas

(f) Details not available

TABLE II.

CLASSIFICATION OF THE AREA (IN ACRES) OF EACH STATE.

Table II

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture

Column 4 includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column

Columns 8 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only

(a) The statistics collected in 1908-09 have been repeated up to 1912-13, as fresh information could not be collected owing to pressure of work connected with the revenue settlement of the State

(b) Column 2 states the area of reserved forests within surveyed villages

(c) Includes 8,215 acres in coffee estates

See explanations given in the footnotes (page 14)

(a) Column 2 states the areas of forests left unassessed. Forests in this State not having been demarcated, figures in columns 3 and 4 also include same forest areas. Column 4 states areas of land left uncultivated for over three years, of *bir* (grass lands) and of pasture lands. Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is three years

Column 2 states the areas of state and district forests and of plantations.

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be.

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of arcount the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained, although it cannot be large.

(a) Included in column 3

Bharatpur—Column 2 includes grass preserves (locally called the State *Rundhs*) and hills. Column 4 includes areas out of cultivation or which have not been cultivated for the last four years or upwards, but excludes State grass preserves (*Rundhs*). Column 5—the maximum period for which land thrown out of cultivation is reckoned as fallow is three years. Column 8 includes area irrigated from the Bareta Bund, constructed by the State Public Works Department

Note—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by higher authorities

(a) See footnote (a) on page 49

(b) Includes millets, maize and grams

(c) In Travancore no accounts are kept regarding the area under each crop, and the figures shown in this table, are based on very rough estimates. Steps are being taken by the Darbar to introduce an improved system according to which accurate figures will be available in some cases.

Note.—Animals in towns, cities, and cantonments are included where it is possible to secure their enumeration. Oxen and buffaloes not old enough for work or to produce young ones are classed as "young stock."

(a) A cattle census is taken by the patwaris every year after the kharif crop inspection in November. Animals in towns are included

(b) No information.

Note.—Until 1898-99 statistics were collected every year by the shanbog and patel of each village by enquiry or inspection. Since that year a census is taken every five years as nearly as possible simultaneously throughout the State. The last census was taken in January 1916. Stock in municipalities are included

*No information

Entry 2 (a) —Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (head 10). Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons

Entry 3.—This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste

Entry 4.—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those by the raiyats to the zamindars. The actual realisable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts

Entry 5.—The population in entry 5 is that of the last general census

†Narsingarh.—Item 1 states the net area by revenue survey as shown in column 4 of Table I. Item 2 (a) includes forest areas (column 2 of Table II) and unculturable (column 3 of Table II) and culturable land not possessed by any cultivator. Item 2 (b) states the area of minor muafis. Item 3 (b) includes fallow lands left uncultivated for three years or less as full cultivation rate is assessed on them

See explanations given in the footnotes (page 98)

* These are *khalsa* or state lands only. The whole area of the State according to the census of 1901 is stated in Table I—No. 5

† Not reported

** *Alwar*.—The classes of tenure are zamindari and village communities, the former comprising *zamindari-bil-ijmal* and the latter *pattidari* and *bhaiyachara*. Item 1 states the area by village papers (column 5 of Table I). Item 2 (a) shows areas covered with forests (column 2 of Table II) which are wholly revenue-free.

†† *Jhalawar*.—The whole area stated in this table is classed as “Khatedari” and “Watendari” equivalent to “raiyyatwari” and “zamindari” respectively. Item 1 excludes entire villages held by jagirdars and udakdars

§ See explanation given in footnote (page 105)

* No information

Column 2 states the net area by survey (column 4 of Table I)

Column 4 (a) includes area not fully assessed which cannot be separated from area fully assessed

Column 5 states "Land Revenue" as defined in the Civil Accounts, and includes cesses which cannot be separated from the land revenue

Column 8 states only ordinary land revenue with cesses

Columns 9 and 10.—The figures in these columns represent the incidence of land revenue on areas both fully and partially assessed

Column 11 includes population of area not fully assessed which cannot be separated from that of fully assessed area

Column 1.—The State area leased to cultivators for a fixed term is returned as *raiayatwari*. The area leased out on condition of proprietary rights being given to lessees if they reclaimed land within a fixed term is returned as *zamindari—temporarily settled*; and the rest of the area (*i.e.*, the area remaining after deduction of the *raiayatwari* and the temporarily-settled *zamindari* areas from the total area), is entered as *zamindari—permanently settled*.

Column 3 includes *muafi*, *chauth*, and *istimrar* areas.

Column 6.—The population stated is that of the last census.

Column 11 shows the total population in cases where separate figures for areas fully and not fully assessed are not available.

Note.—It is optional with the local authorities to enter or omit transfers of lands held by tenants. The following rules have been prescribed for the preparation of this return:—(1) Changes of entry due to succession, partitions, or simple mortgages are not really transfers and should be excluded from the table, as also should redemptions of mortgage. (2) All temporary transfers, such as leases, should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table. (3) All transfers made by order of a Court should also be included in the table. (4) The word "Court" in the entry "by order of court" should be held to include a revenue Court.

(a) Mysore.—Only permanent transfers are included as by sale or gift, in which the parties concerned apply for and obtain transfers of revenue registry in the village accounts from which the table is compiled. Thus, changes of registry under orders of civil and revenue courts as well as those effected in consequence of the sale of land for arrears of Government revenue are included.

(b) Alwar.—Transfers by mortgage with possession, sale, and gift, both of proprietary and of occupancy rights, whether by order of court or by private contract, are shown in this table. Property confiscated by order of a criminal court, and holdings transferred by order of a civil or revenue court in satisfaction of money decrees or arrears of land revenue respectively are thus included.

APPENDIX

Vernacular terms used in the Explanatory Notes.

- Bhaiyachara* (Alwar).—Villages held by a number of families, by possession without reference to shares.
- Bir* (Narsingarh).—Grass lands.
- Bunds* (Alwar).—Embankments.
- Chauth* (Bharatpur).—Land paying one-fourth of the rental.
- Ilakas* (*Ilagas*).—An Estate or Dependency, a property.
- Inám* (Mysore).—Wholly or partially revenue-free tenure; *minor ináms* are plots of inám lands situated in a village, whether Government or inám.
- Istamrár* (Gwalior, Indore, Bharatpur).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- (Alwar).—A tenure which, though favourably assessed, is charged with a permanently fixed quit-rent.
- (Bharatpur).—Land paying a reduced permanently fixed *jama* (assessment).
- Jagir* (Mysore, Gwalior, Kishangarh, Kotah, Narsingarh).—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Indore, Barwani).—Land granted revenue-free on condition of military service or as a charitable endowment or in recognition of good services rendered to the State.
- (Bikaner).—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Alwar).—Assignment of land revenue, with or without condition of military service and payment of commutation dues, granted in recognition of meritorious services to relations of the ruling chief or other high officials of the State.
- (Kishangarh).—Land granted revenue-free on condition of military service either actually rendered or fulfilled by a rateable money contribution.
- Jagirdar* (Jhalawar).—Holder of jagir land.
- Jodi* (Mysore).—A whole inám village paying quite-rent to Government.
- Kayamgutta* (Mysore).—A whole village granted by the State on fixed money-rent.
- Khalsa* (Gwalior, Jaipur, Bikaner, Marwar, Bharatpur).—Land paying full revenue to the State.
- Khatedari* (Jhalawar).—Same as *raiyatwari*.
- Muafi* (Gwalior, Alwar, Kotah, Bharatpur, Kishangarh).—Land granted free of revenue.
- Out-bandi* (Indore).—Assessment of revenue calculated at a fixed rate per plough.
- Patel* (Mysore).—Village headman appointed by Government.
- Pattidari* (Alwar).—Villages held by a number of families, by shares, ancestral or customary.
- Patwari* (Narsingarh).—Village revenue officer or accountant.
- Raiyatwari* (Bharatpur).—State area leased to cultivators for a fixed term.
- Rundhs* (Bharatpur).—State grass preserves.
- Sarvamanayam* (Mysore).—An inám village, wholly revenue-free.
- Shanbóg* (Mysore).—A village accountant appointed by Government.
- Tanka* (Gwalior).—Estate held by certain families who were in power when the country was annexed and who were left in possession of their estates on payment of a fixed annual tribute, or *tanka*, bearing but a small proportion to the annual assets.
- Ubari* (Gwalior).—Land held at an abatement of the full land revenue.
- Udakdar* (Jhalawar).—Holder of a Ubári estate.
- Watendari* (Jhalawar).—Same as *Zamindari*.
- Zamindari* (Bharatpur).—Estate on a fixed assessment under a deed of permanent ownership granted by the State.
- Zamindari-bil-ijmal* (Alwar).—Villages held jointly by a body of owners.

Agricultural Statistics of India

1917-18

VOLUME I—BRITISH INDIA

Report

To

THE SECRETARY TO THE GOVERNMENT OF INDIA,
DEPARTMENT OF REVENUE AND AGRICULTURE.

SIR,

I have the honour to submit the first volume of Agricultural Statistics for 1917-18. This annual volume is the thirty-fourth of the series started in 1886 with statistics for 1884-85. As in the previous issue, figures for twenty years are shown in Summary table No. 1, for ten years in the provincial tables, and for two years in the district tables. A map showing the departure from the normal of cropped area and that of rainfall in 1917-18 and other charts as detailed in the penultimate paragraph of this report, with an index for easy reference, have been added to the volume.

The statistics are compiled from annual returns furnished by Local Governments and Administrations. Detailed information as to the sources from which the figures are collected in the different provinces is given in footnotes to the respective tables for each province. The statistics consist of six separate tables, namely, I—Area; II—Classification of area; III—Area under crops; IV—Live-stock, ploughs, and carts; V—Land Revenue Assessment; and VI—Transfers of property in land. The totals of the figures given in these tables are shown in a series of summary tables, to which a table on world crops is added. In addition to these, there are four appendices, namely, Appendix A dealing with the average yield per acre of principal crops; Appendix B showing the changes made in district and provincial boundaries; Appendix C giving the meaning of vernacular terms used in the volume; and Appendix D containing an alphabetical list of crops cultivated in India and their classification in Table III. This volume, it may be noted, deals with the agricultural statistics of British Provinces, while Volume II deals with those of Indian States* as far as they are reported.

The returns for each province relate to the following dates:—

Bengal, Bihar and Orissa, Assam, Coorg, and Manpur	Year ended 31st March
Central Provinces and Berar	„ 31st May
North-West Frontier Province	„ 15th June
United Provinces, Madras, Burma, and Ajmer-Merwara	„ 30th „
Bombay	„ 31st July
Punjab and Delhi	„ 30th September

It may be noted that the statistics relating to areas irrigated (Table II) and areas under crops and specification of crops (Table III) generally include both the *kharif* and the *rabi* crops, and relate to the year closing with the harvesting of the *rabi* or spring crops.

* In Appendix A (Volume I), however, figures relating to Mysore are shown separately.

The total area of India is 1,800,000 square miles, or 1,152,501,000 acres, with a population of 315 millions according to the census of 1911. This may be divided as follows :—

	Acres.	Population.
(1) British Provinces (including Indian States within the political jurisdiction of Local Governments and Administrations)	750,130,000	267,164,000
(2) Indian States having direct political relations with the Government of India	316,400,000	44,767,000
(3) Specially administered territories in Burma (Shan States) and in the North-West Frontier Province (Tribal areas, etc.) not included under (1)	51,265,000	2,738,000
(4) British Baluchistan (including administered areas)	34,706,000	414,000
Total	1,152,501,000	315,083,000

No returns of agricultural statistics are prepared for (3) specially administered territories in Burma and in the North-West Frontier Province, nor for (4) British Baluchistan.

Table I.
Total area.

The total area of the British Provinces dealt with in this volume—750,130,000 acres or 1,172,000 square miles—includes 129,795,000 acres, with a population of some 26 millions, belonging to Indian States, which are within the political jurisdiction of Local Governments and Administrations. These include in Burma the Môngmit State, the Hkamte Long State, and the Upper Chindwin States; in Assam, Manipur and the Khasi and Jaintia Hill States; in Bengal, Cooch Bihar and Hill Tippera; in Bihar and Orissa, the Tributary States of Orissa and Chota Nagpur; in the United Provinces, Rampur, Tehri, and Benares; in the Punjab, the Phulkian States, the States of the Bahawalpur Agency, the Jalandhar Division States, and the Simla Hill States; in the North-West Frontier Province, the Phulera and Upper Tanawal States; in Sind, the Khairpur State; in Bombay, the Gujarat States (excluding Baroda), the Konkan States, the Deccan States, the Satara Jagirs, and the Southern Mahratta States; in the Central Provinces, the Chhattisgarh States; and in Madras, the States of Travancore, Cochin, Pudukkottai, Banganapalle, and Sandur. Of these States, agricultural statistics are prepared for most of the States in the Punjab and all the States in Madras; but they are dealt with in Volume II along with the States having direct political relations with the Government of India.

Thus, by deducting 129,795,000 acres belonging to Indian States from the total area of 750,130,000 acres included in British Provinces, a balance of 620,335,000 acres is left (as shown in Table I), which represents the area of British territory according to professional survey. The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The agricultural statistics are, however, prepared in a number of provinces or parts of provinces from “village papers,” *i.e.*, papers prepared by the village accountants for the purposes of assessment and collection of land revenue. The area given in the village papers of the United Provinces, the Central Provinces and Berar, Madras, the Punjab, and the North-West Frontier Province differs to some extent from the area ascertained by professional survey. The causes of this difference are: (a) while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas, and (b) the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and rail roads is not uniform in the two sets of returns. Substituting the area by village papers for the area by survey in respect of provinces and tracts where the two sets of returns differ, the actual area of British territory for which statistics are given in this volume is 617,507,000 acres, as against 620,335,000 acres according to the professional survey.

This area is, for the purposes of Agricultural Statistics, classified as			Table II. Classification of area.	
	Thousand acres	Per cent	shown in the margin. About	
Forests	86,925	14	86,925,000 acres, or 14 per	
Not available for cultivation	142,783	23	cent of the total, are occupied	
Culturable waste other than fallow	111,485	18	by forests; and the area not	
Current fallows	48,466	8	available for cultivation, i.e.,	
Net area cropped	227,848	37	land absolutely barren or un-	
Total	617,507	100	culturable or covered by build-	

ings, water, and roads, or otherwise appropriated to uses other than agriculture, amounts to 142,783,000 acres or 23 per cent. The balance, 387,799,000 acres or 63 per cent, represents the area available for cultivation. Of this, 111,485,000 acres, or 18 per cent of the total area, represent culturable waste other than fallow, i.e., land available for cultivation but not taken up, and 48,466,000 acres, or 8 per cent, were kept fallow in the year of report. The net area actually cropped in the year was therefore 227,848,000 acres, or

	Proportion of cropped to total area	Population per 100 acres of cropped area	37 per cent of the total area, as against 229,620,000 acres in the preceding year, or a decrease of 0·8 per cent. The proportion of cropped to total area and the number of population per 100 acres of cropped area in each province are stated in the margin. The proportion of cropped to total area in the year of report was highest in Bom- bay and lowest in Burma. This net cropped area, however, ex- cludes areas cropped more than

Bengal	48 "	182	
Punjab	44 "	72	
Central Provinces and Berar	38 "	58	
Madras	37 "	122	
North-West Frontier Province	30 "	89	
Manpur	23 "	100	
Ajmer-Merwara	21 "	137	
Assam	19 "	114	
Sind	15 "	79	
Coorg	14 "	122	
Burma	13 "	71	
British India	37 "	105	

once in the year. If areas cropped more than once are taken as separate areas for each crop, the gross area cropped in the year of report amounts to 264,817,000 acres, as against 264,949,000 acres in the preceding year.

The term "forests" in the returns of Agricultural Statistics means Forests. "any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may, however, be excluded, and entered in the column "net area cropped." The forest areas returned in the Agricultural Statistics do not agree in most cases with those stated in the Reports on the administration of the Forest Department for various reasons,* the chief amongst which are the following :—(1) the forest administration reports and the returns of agricultural statistics relate in many cases to different periods, (2) the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics include, in addition, forest areas administered by district officers, and (3) certain village lands worked by the Forest Department and returned as forest lands by that Department are not treated as forests in the returns of agricultural statistics but are included under the proper heads of cultivated or uncultivated lands as the case may be. Of the total forest area (86,925,000 acres in 1917-18) 24 per cent lies in Burma, 19 per cent in the Central Provinces and Berar, 15 per cent in the Madras Presidency, 11 per cent in the United Provinces, 10 per cent in the Bombay Presidency, and the remaining 21 per cent in other provinces.

As can naturally be expected, most of the barren and unculturable lands lies Area not available
for cultivation. in the hilly tracts of Burma and of southern India and in the dry and deserty regions of north-western India. Of the total area "not available for cultivation" (142,783,000 acres in 1917-18), about 31 per cent lies in Burma, 15 per cent in the Madras Presidency, 10 per cent in Sind, and 9 per cent in the Punjab.

The head "culturable waste other than fallow" shows lands available for Culturable waste
other than fallow. cultivation but not taken up. It includes areas such as groves not classed in the cropped area and also areas under bamboos and thatching grass when not

* For detailed explanations in respect of provinces, see notes at foot of Table II, Nos. 25 to 40.

forming parts of forest areas.* Of the total culturable waste land (111,485,000 acres in 1917-18), 23 per cent is in Burma, 14 per cent in the Punjab, 13 per cent in Assam, 12 per cent in the Central Provinces and Berar, 10 per cent in the Madras Presidency, and the remaining 28 per cent in other provinces.

Current fallows. The maximum period for which land left uncultivated is reckoned as fallow varies in the different provinces, from two years in the Punjab and the North-West Frontier Province to ten years in the Bombay Presidency, according to local laws and customs. After this period the land, if still left uncultivated, is treated as abandoned and included under the head "culturable waste." Owing to this diversity of practice, the classification as between "culturable waste" and "current fallows" is of doubtful statistical accuracy; a plot of land, for instance, left uncultivated for, say, six years, would be treated as fallow in the Bombay Presidency, but as culturable waste in the Punjab. The total area returned as "current fallow" in 1917-18 was 48,466,000 acres, as against 45,493,000 acres in the preceding year, or an increase of 7 per cent.

Irrigation. The total area irrigated in 1917-18 was 45,867,000 acres, as against 48,004,000 acres in the preceding year. Of this area 18,783,000 acres were irrigated from Government canals, 2,601,000 acres from private canals, 6,564,000 acres from tanks, 11,139,000 acres from wells, and 6,780,000 acres from other sources of irrigation. In India irrigation on an extensive scale is ordinarily resorted to in tracts where the rainfall is most precarious. In Lower Burma, Assam, Eastern Bengal, and the Malabar Coast (including the Konkan),

	Proportion of irrigated to total cropped area.	
Sind	73 per cent.	where the rainfall is ordinarily heavy,
Punjab	42 "	the crops hardly need the help of

Bengal	10 "	Orissa, 7 per cent in Sind, and the
Burma	8 "	remaining 13 per cent in the other pro-
Bombay	4 "	vinces. The proportion of irrigated to
Assam	3 "	total cropped area in each province is
Coorg	3 "	stated in the margin. The proportion is
Central Provinces and Berar	2 "	highest in the driest province of Sind.
Manpur	2 "	

The figures in the preceding paragraph do not take into account areas cropped more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. Counting areas cropped more than once as separate areas for each crop, the gross area of irrigated crops was 50,015,000 acres in 1917-18. Of this area about 84 per cent was under food crops and the remainder under non-food crops. Of the irrigated food-crop area, 9,792,000 acres were cropped with wheat, 29,265,000 acres with other cereals and pulses, and 2,968,000 acres with other food crops. These statistics of irrigated crops are in some cases defective as explained in the notes at the foot of Table II (pages 38-45).

Table III.
Area under crops

The areas cultivated with the different crops represent the areas actually sown, whether the crop comes to maturity or not, except in cases where fields, owing to the failure of the first sowings, have been devoted to other crops, and in these cases the area first sown is omitted. In cases where two or more crops are grown together on the same field, an estimate is made of the area covered by each, and the areas so estimated are separately returned under the respective crop headings. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by the provincial authorities. In certain tracts, where the village staff does not exist, estimates are made on the best available information. An exception to the above rule is, however, made in the United Provinces, where the area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statements, is assigned to the principal crops by the village accountant. In the same

* For detailed explanations in respect of provinces, see notes at foot of Table II, Nos. 25 to 40.

province this procedure is also followed in the case of oilseeds thinly sown in combination with food-grains and in this case the whole area of the mixed field is assigned to food grains.

The gross area cultivated with crops was, as stated above, 265 million acres in 1917-18. The different classes of crops and the area occupied by each class are stated in the margin. Of the total cropped area food-crops occupied

	Thousand acres.	Per cent of total.
Food-grains	207,437	78.4
Condiments and spices	1,543	0.6
Sugar	2,993	1.1
Fruits and vegetables	5,680	2.2
Miscellaneous food-crops	1,107	0.4
Total food-crops	218,760	82.7
Oilseeds	14,108	5.3
Fibres	18,991	7.2
Dyes and Tanning materials	1,313	0.5
Drugs and narcotics	2,163	0.8
Fodder crops	8,194	3.1
Miscellaneous non-food crops	946	0.4
Total non-food crops	45,715	17.3

about 218,760,000 acres or 83 per cent and non-food crops about 45,715,000 acres or 17 per cent. Of the food-crops food-grains (cereals and pulses) occupied as much as 207,437,000 acres,† or about 78 per cent of the total cropped area, and other food-crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food-crops* together) occupied some 11,323,000

acres or only 4 per cent of the total. Of non-food crops fibres such as cotton, jute, hemp, etc., occupied 18,991,000 acres or nearly 7 per cent of the total cropped area, and oilseeds occupied 14,108,000 acres or about 5 per cent. The other non-food crops *—dyes and tanning materials, drugs and narcotics (tobacco, tea, coffee, opium, etc.), fodder crops, and miscellaneous non-food crops together—occupied some 12,616,000 acres or about 5 per cent of the total.

The area under food-grains (207,437,000 acres) showed a decrease of 1,336,000 acres or 0.6 per cent as compared with the preceding year. The

	THOUSAND ACRES.		Increase (+) or Decrease (—)
	1917-18	1916-17	
Rice	80,668	80,988	—320
Wheat	26,428	25,044	+ 1,384
Barley	8,505	7,972	+ 533
Jawar	21,118	21,892	—774
Bajra	12,699	15,228	—2,529
Ragi	4,265	4,072	+ 193
Maize	6,486	6,544	—58
Gram	16,724	15,699	+ 1,025
Other grains and pulses	30,544	31,334	—790

actual increase or decrease under each kind of grain is stated in the marginal table (in thousands of acres). The heavy and continuous rains of the monsoon of 1917 adversely affected some of the autumn crop, but provided a good seed-bed for the spring crops. Of the total area shown in the table under food-grains 19 per cent was in the United

Provinces,† 14 per cent in the Madras Presidency, 13 per cent in Bihar and Orissa, 12 per cent in the Punjab, 11 per cent in Bengal, 9 per cent each in the Central Provinces and Berar and the Bombay Presidency, and the remaining 13 per cent in the other provinces.

The area under oilseeds (14,108,000 acres) showed a decrease of 527,000 acres or nearly 4 per cent as compared with the preceding year. The

	THOUSAND ACRES.		Increase (+) or Decrease (—)
	1917-18	1916-17	
Linseed	2,781	2,558	+ 223
Sesamum	3,374	4,014	—640
Rape and mustard	4,359	4,011	+ 348
Other oilseeds	3,594	4,052	—458

actual increase or decrease under each kind of oilseeds is stated in the margin (in thousands of acres). Of the total area under oilseeds shown in this table 21 per cent was in the Madras Presidency, 15 per cent each in the Central Pro-

vinces and Berar, and Bihar and Orissa, 11 per cent in Bengal, 10 per cent each in Burma and the Punjab, 6 per cent in the Bombay Presidency,

* For a list of these crops, vide Appendix D.
† In the United Provinces, the whole of the area sown with food-grains mixed with oilseeds is shown under food-grains. The area included under food-grains, which was really sown with oilseeds (as a mixed crop), is roughly estimated to have been 4,000,000 acres in the whole province in 1917-18. Excluding this area of 4 million acres under oilseeds, the total area under food-grains in British India in 1917-18 would come to 208 million acres instead of 207 million acres.

5 per cent in the United Provinces,* and the remaining 7 per cent in other smaller provinces.

Condiments and
spices.

The total area under condiments and spices in 1917-18 was 1,543,000 acres, as against 1,629,000 acres in the preceding year, or a decrease of 86,000 acres or 5 per cent. As is to be expected, spices are grown mostly in the southern parts of India: the Madras Presidency alone accounted for about 45 per cent of the total area under condiments and spices in 1917-18.

Sugar.

The total area under sugar in 1917-18 was 2,993,000 acres, as against 2,615,000 acres in the preceding year, or an increase of 378,000 acres or 14 per cent. Of this area about 2,808,000 acres were occupied by sugarcane, as against 2,422,000 acres in the preceding year. 52 per cent of the sugarcane area was in the United Provinces, 18 per cent in the Punjab, 9 per cent in Bihar and Orissa, 7 per cent in Bengal, and 5 per cent in the Madras Presidency. The other sugar-yielding plants, namely, date palm and palmyra palm, occupied a total area of 185,000 acres as against 193,000 acres in the preceding year. About 50 per cent of this area was in the Madras Presidency and 36 per cent in Bengal.

Fibres.

Fibre crops occupied 18,991,000 acres in 1917-18 as against 17,339,000 acres in the preceding year, or an increase of 1,652,000 acres or 10 per cent. The actual increase under the several kinds of fibres is shown in the marginal table.

	THOUSAND ACRES		
	1917-18	1916-17	Increase
Cotton	15,403	13,837	+ 1,566
Jute	2,700	2,671	+ 29
Other fibres	888	831	+ 57

The area under cotton showed an increase of 11 per cent, attributed chiefly to the stimulus of high prices of cotton obtained in the preceding year. Of the total cotton area 29 per cent each was in the Central Provinces

and Berar and the Bombay Presidency, 18 per cent in the Madras Presidency, 11 per cent in the Punjab, and 8 per cent in the United Provinces. The area under jute showed an increase of 1 per cent which is also attributed to the rise in prices in the preceding year. About 88 per cent of the total jute area was in Bengal and the remaining 12 per cent in the adjoining provinces of Bihar and Orissa and Assam. Other fibres also showed an increase of 7 per cent as compared with the preceding year.

Dyes and Tanning
materials.

The total area under dyes and tanning materials was 1,313,000 acres in 1917-18. Of this the area under indigo was 701,000 acres, showing a decrease of 64,000 acres or 8 per cent. Of the total indigo area 46 per cent was in the Madras Presidency, 27 per cent in the United Provinces, 13 per cent in the Punjab, and 12 per cent in Bihar and Orissa. Other dyes and tanning materials occupied an aggregate area of 612,000 acres.

Drugs and narcotics.

The total area under drugs and narcotics was 2,163,000 acres in 1917-18, as against 2,181,000 acres in the preceding year, or a decrease of 18,000 acres. The actual increase or decrease under each kind of drugs and narcotics is stated in the marginal table, in thousands of acres.

	THOUSAND ACRES		
	1917-18	1916-17	Increase (+) or decrease (-)
Opium	221	217	+ 4
Coffee	95	91	+ 4
Tea	619	603	+ 16
Tobacco	1,015	1,041	- 26
Other drugs and narcotics	213	229	- 16

Fodder crops.

The head "fodder crops" shows only those crops which are used exclusively as fodder in normal times. These are oats, field vetch, guinea grass, lucerne, fodder jawar, and carob or locust tree. The total area under fodder crops in 1917-18 was 8,194,000 acres, as against 8,173,000 acres in the preceding year.

Fruits and vegetables
including root crops.

The total area occupied by fruits and vegetable crops in 1917-18 was 5,680,000 acres, as against 5,650,000 acres in the preceding year. [For the names of the fruits and vegetable crops cultivated in India, see Appendix D.]

*The figures shown under the several heads of oilseeds in Table III against the United Provinces of Agra and Oudh represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop, excluding the oilseeds which are thinly sown in combination with wheat, barley, gram, and other food crops. If the areas occupied by the scattered oilseeds plants were added up, it is estimated very roughly that they would amount in 1917-18 for the whole of the United Provinces to about 4 million acres. Including this area, the total area under oilseeds in British India in 1917-18 would come to 18 million acres.

The total area occupied by miscellaneous crops, that is, crops not classified under any of the heads specified above, was 2,053,000 acres. Of this, about 1,107,000 acres were occupied by miscellaneous food-crops and about 946,000 acres by miscellaneous non-food crops. [For the names of the crops included under these heads, see footnotes on pages 96 to 103 and Appendix D.]

The total extent of land on which more than one crop was cultivated during the year was 36,969,000 acres as against 35,329,000 acres in the preceding year.

The statistics recorded in Table IV are based mainly on cattle censuses. In Burma, Manpur Pargana, and the Central Provinces and Berar the census is taken annually, while in the United Provinces, Assam, Ajmer-Merwara, the Punjab, Delhi, the North-West Frontier Province, the Bombay Presidency, the Madras Presidency, and Coorg it is taken once in five years. The last quinquennial census was taken in 1913-14 in the Punjab, the North-West Frontier Province, Delhi, and Ajmer-Merwara; in 1914-15 in the United Provinces, the Madras Presidency, Assam, and Coorg; and in 1915-16 in the Bombay Presidency. In Bengal a cattle census was taken for the first time in 1912-13, which gave the numbers of bulls and bullocks, cows, buffaloes, and young stock. [Young stock represents oxen and buffaloes not old enough for work or to produce young]. In Bihar and Orissa a census was taken in 1913-14. The figures for Bihar and Orissa prior to 1913-14, as also those for Bengal for years prior to 1912-13, are based on estimates. Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. In making up the totals for British India for each year, the figures last collected in the provinces, where the census is not taken annually, are repeated year after year until the next cattle census is taken.* It would, therefore, serve no useful purpose to compare the total figures for one year with those for another, as the totals thus constituted do not really represent the number of stock in the year against which the figures are shown in the table. The animals may be divided into three classes, namely, (1) bovine, comprising bulls and bullocks, cows, buffaloes, and young stock (*i.e.*, calves and buffalo calves), (2) ovine, comprising sheep and goats, and (3) others, comprising horses and ponies, mules, donkeys, and camels.

	Number in thousands				
	Bovine	Ovine	Others	Ploughs	Carts
Bengal	25,324	Not available			
Madras	21,761	18,192	189	4,291	998
Bombay	9,206	4,038	212	1,121	613
Sind	2,179	1,616	319	278	56
United Provinces	31,741	12,676	846	5,111	859
Bihar and Orissa	20,022	6,587	204	3,234	453
Punjab	15,439	9,109	1,472	2,314	295
Burma	6,146	237	105	626	664
Central Provinces and Berar	11,811	1,481	190	1,432	883
Assam	3,576	521	15	594	40
North-West Frontier Province	1,271	1,147	211	226	5
Ajmer-Merwara	298	419	10	41	11
Delhi	148	32	13	16	8
Coorg	134	4	...	34	1
Manpur	6	1	...	1	...
Total	149,112	56,060	3,783	19,319	4,896

The total number of live-stock of each of these three classes in each province, together with the numbers of ploughs and carts, is stated in the margin (in thousands). Of the total number of live-stock of the bovine class (149 millions), which is cattle proper, the United Provinces account for 21 per cent, Bengal 17 per cent, the Madras Presidency 15 per cent, Bihar and Orissa 13 per cent, the Punjab 10 per cent, the Central Provinces and Berar and the Bombay Presidency including Sind 8 per cent each, and the remaining provinces 8 per cent. In the case of ploughs also the United Provinces come first with 26 per cent of the total (excluding Bengal for which figures are not available), followed by Madras (22 per cent), Bihar and Orissa (17 per cent), and the Punjab (12 per cent). In the case of stock of the ovine class (sheep and goats), however, Madras accounts for 32 per cent of the total (excluding Bengal), followed by the United Provinces (23 per cent), the Punjab (16 per cent), Bihar and Orissa (12 per cent), and the Bombay Presidency including Sind (10 per cent). In the case of carts, Madras is responsible for 20 per cent of the total (excluding Bengal), followed by the Central Provinces and Berar

* It has been arranged to hold a quinquennial census of live-stock in all the provinces, as far as practicable in the year 1919-20, and the results will be published as soon as data are available:

(18 per cent), the United Provinces (17 per cent), the Bombay Presidency includ-

Table V.
Land Revenue
Assessment.

The varieties of land tenure in the different provinces are included in Table V and are given, as far as possible, under one or other of the following three heads, namely, (1) raiyatwari, (2) zamindari and village communities (temporarily settled), and (3) zamindari (permanently settled). When the revenue is assessed by the State, permanently or temporarily, on an individual or community owning an estate, and occupying a position identical with or analogous to that of a landlord, the tenure is known as *zamindari* or village community; when the revenue is assessed on individuals who are the actual occupants, or are accepted as representing the occupants of smaller holdings, the tenure is known as *raiyyatwari*. Under either system there may be rent-paying subtenants. Zamindari tenure may be either *permanently settled*, i.e., where the land revenue has been fixed in perpetuity, or *temporarily settled*, i.e., where the land revenue is fixed for a number of years only. Village communities and raiyatwari tenures are, as a rule, temporarily settled, and the land revenue assessed on them are changeable from time to time.

The following table shows the position in the surveyed areas of the various provinces, as regards the forms of land tenure, according to the latest statistics available. The figures roughly indicate the extent to which the different systems prevail :—

Province.	In thousands of acres.			
	Raiyatwari.	Zamindari (individual proprietors or village communities).		Total
		Permanently settled	Temporarily settled	
Bengal	...	39,303	11,152	50,455
Madras	61,285	29,852	...	91,137
Bombay	44,733	...	3,910	48,643
Sind	30,098	...	...	30,098
United Provinces	...	7,537	60,767	68,304
Bihar and Orissa	...	41,511	11,292	52,803
Punjab	...	...	56,397	56,397
Burma	110,193	...	...	110,193
Central Provinces	12,138*	...	40,450	52,588
Berar	11,375*	...	...	11,375
Assam	25,725	3,930	1,650	31,305
North-West Frontier Province	...	...	8,438	8,438
Ajmer-Merwara	...	974	797	1,771
Delhi	...	...	368	368
Coorg	1,012	...	...	1,012
Manpur	31	...	...	31
Total	296,590	123,107	195,221	614,918

It will thus be seen that about 48 per cent of the total area is held by *raiyyatwari* proprietors, while 20 per cent is held by permanently settled and 32 per cent by temporarily settled, *zamindari* proprietors.

* Including Government forests.

The statistics for this table are collected annually in Burma, Assam, Manpur, the Punjab, Delhi, the North-West Frontier Province, and the Central Provinces and Berar, and quinquennially in Bengal, Bihar and Orissa, the United Provinces, Ajmer-Merwara, Bombay, Sind, Madras, and Coorg. According to the latest statistics available, the total revenue from land

	Total revenue from land (Rs.1,000)	Total popula- tion (1,000)	Revenue per head Rs. a.
Bengal	2,93,56	44,588	0 10
Madras	6,72,94	41,405	1 10
Bombay	3,28,52	15,134	2 3
Sind	1,01,80	3,513	2 14
United Provinces	6,72,83	47,172	1 7
Bihar and Orissa	1,63,07	34,490	0 8
Punjab	4,61,14	19,554	2 6
Upper Burma	1,64,20	4,113	4 0
Lower Burma	3,45,36	6,471	5 5
Central Provinces	1,16,50	10,873	1 1
Berar	86,01	3,067	2 13
Assam	83,60	6,714	1 4
North-West Frontier Province	28,01	2,255	1 4
Ajmer-Merwara	3,61	501	0 11
Delhi	3,60	413	0 14
Coorg	3,80	175	2 3
Manpur	16	7	2 6
Total	35,28,71	240,445	1 7

(excluding cesses) for the whole of British India amounts to Rs35 crores. This represents the actual realisable demand* on account of the year, no account being taken of the collection of arrears for past years, nor of amounts remaining uncollected at the end of the year. The marginal table shows the total land revenue assessment, the total population, and the assessment per head of population in each province. For additional details reference should be made to the tables No. 73 on pages 212—223.

The total number of transfers of property in land made during 1917-18, as recorded in Table VI, was 933,000, of which 893,000 were by private contract or gift and 40,000 by order of the court. The total area of the transfers by private contract or gift was 4,263,000 acres, and by order of the court 649,000 acres. These statistics are incomplete. They do not include transfers in Bengal (for which figures are not available), nor in Madras (for which the table has been discontinued from 1913-14); in Bihar and Orissa no information is available regarding transfers under orders of civil courts. As explained in the footnotes to Table VI, the figures for other provinces also are not always complete. It may be noted that voluntary transfers are those made by actual contract or gift, transfers by succession or inheritance not being taken into account: compulsory transfers are those effected through a court, civil or revenue. Transfers of land under the Land Acquisition Act and temporary transfers, such as leases, simple mortgages, and redemptions of mortgages, are excluded from this table. Mortgages with possession are treated as transfers and included in Table VI.

The Agricultural Department in each province maintains a statement of the average yield per acre of land of average quality, irrigated and unirrigated, for crops in each district. In order to test the accuracy of the standards of normal or average yield, and if necessary, to revise these, a system of crop-cutting experiments exists in all the provinces. Under this system plots of land of average quality are selected, and the crops grown on them are cut and weighed in the presence of responsible officers of the district staff or of the Provincial Agricultural Department. The results of the experiments are reported to the head of the Provincial Agricultural Department, who revises the standards in the light of these returns. This revision is ordinarily made once in five years, although crop-cutting experiments are usually carried out for the principal crops each year. The table in Appendix A shows the figures as last revised with reference to the crop-cutting experiments made up to 1916-17. As time goes on the figures become more accurate, and it may be noted that the general trend of the changes made is in an upward direction. In Bengal the yield per acre of winter rice has been increased from 983 lbs to 1,036 lbs and that of jute from 1,271 lbs to 1,300 lbs. Barley in the United Provinces has been raised from 1,100 lbs to 1,150 lbs, arhar from 750 lbs to 800 lbs, and cotton from 160 lbs to 170 lbs. In the Punjab the yield per acre of wheat has been raised from 726 lbs to 791 lbs, of sugarcane from 1,686 lbs to 1,933 lbs, and of cotton from 118 lbs to 135 lbs. Cotton in Sind has been raised from

* Sums remitted on account of unoccupied lands, short crops, etc., are wholly excluded from this total amount in the case of provinces where all remissions are granted within the year to which the return relates, but in provinces where remissions are not granted or are only partially granted within the year, no deduction is made on account of remissions.

125 lbs to 170 lbs and sugarcane from 4,233 lbs to 8,142 lbs. In Assam the yield of autumn rice has been increased from 672 lbs to 706 lbs and that of sugarcane from 1,904 lbs to 2,016 lbs. In the North-West Frontier Province wheat has been raised from 633 lbs to 676 lbs and sugarcane from 2,430 lbs to 2,660 lbs. In a few instances the standards have been decreased. In Sind the yield of rape seed has been put at 393 lbs ; in Assam the yield of winter rice at 952 lbs, while the yield of jāwar in the North-West Frontier Province is now estimated at 399 lbs.

Appendix B.
Territorial changes.

Appendix C.
Vernacular terms.
Appendix D.
Classification of crops.
Charts.

Appendices B, C, and D perhaps require little or no comment. Appendix B, which shows changes that have been made from time to time in district or provincial boundaries, will explain the variations in total areas of districts and provinces in Table I, so far as they are due to territorial changes. Appendix C explains the vernacular terms used in this volume, and Appendix D the classification in Table III of the various crops cultivated in India.

The map, charts, and diagrams appended to the volume illustrate—

- (1) the departure of cropped area and that of rainfall in 1917-18 from the average of the preceding ten years ;
- (2) variations in rainfall as compared with normal in relation to total area cropped, food-crops area and current fallows (reversed) ;
- (3) rainfall in wheat-growing tracts (in June to February) as compared with the total and unirrigated wheat areas ;
- (4) total cultivable area, total uncultivable area, net area cropped, culturable waste other than fallow, and current fallows ;
- (5) total area cropped, total area under food crops, total irrigated area cropped, and total area under non-food crops ;
- (6) area under rice, wheat, millets, oilseeds, cotton, jute, and other crops ;
- (7) total area cropped and area under different crops ;
- (8) total live-stock divided between bovine, ovine, and others, and
- (9) shares of provinces in the total area under principal crops.

For the prices of agricultural produce, reference should be made to the volume entitled "Prices and Wages in India", 34th issue.

I have the honour to be,

SIR,

Your most obedient servant,

D. N. GHOSH,

Offg. Director of Statistics.

DEPARTMENT OF STATISTICS, INDIA,
Calcutta, February 26, 1920.

2. Total area cropped, area under food crops, current fallows (reversed) and variations in rainfall as compared with normal.

3. Total wheat area, unirrigated wheat area and rainfall in wheat-growing tracts (June to February).

The scale of the curves in Chart No. 3 for "total wheat area" and "unirrigated wheat area" has, in order to effect a better comparison, been made much larger than that used for the curves showing "rainfall".

4. Total cultivable area, total uncultivable area, net area cropped, culturable waste other than fallow and current fallows.

Note.—1. "Total cultivable area" represents the sum of net area cropped, culturable waste, and current fallows.
2. "Uncultivable area" includes the area under forest.

5. Total area cropped, total area under food crops, total irrigated area cropped, and total area under non-food crops.

6. Area under rice, wheat, millets, oilseeds, cotton, jute, and other crops.

NOTE.—Millets represent jawar, bajra and ragi.

7. Total area cropped in 1917-18.

Total area cropped	265 million acres.
Area under food crops (unshaded portion)	219 million acres.
Area under non-food crops (shaded portion)	46 million acres.

NOTE.—“Other food crops” are minor food-grains, condiments and spices, and miscellaneous food crops.
“Other non-food crops” are oilseeds other than sesamum, linseed, rape and mustard; fibres other than cotton and jute; dyes; drugs and narcotics; and miscellaneous non-food crops.

8. Total livestock, divided between bovine, ovine, and others in 1917-18, as compared with the year 1908-09.

NOTE.—“Bovine” includes bulls and bullocks, cows, buffaloes, calves, and buffalo calves.
“Ovine” includes sheep and goats.
“Others” include horses and ponies, mules, donkeys, and camels.

9. Shares of provinces in the total area (in acres) under principal crops in 1917-18

NOTE.—In this diagram, the circles for the different crops have no relation to each other; they simply show the relative importance of each province in respect of each crop.

TABLES

Summary Tables of the Agricultural Statistics of British India

No. 1—GENERAL SUMMARY, 1898-99 TO 1917-18

Classification of area

(Thousand acres)

(a) Not including the territory occupied by the enemy

(b) Excluding the Isle of Man and the Channel Islands

* Including figures for Indian States, namely, 3,275,000 acres for rice, 9,211,000 acres for wheat, 1,337,000 acres for barley, 1,101,000 acres for maize, 9,846,000 acres for cotton, and 978,000 acres for linseed. The figures for rice, barley, maize and linseed for Indian States are, however, not complete, as returns for those crops are not furnished by a number of States.

7*

Note.—The figures for foreign countries have been taken from the Bulletins of Agricultural and Commercial Statistics published by the International Institute of Agriculture, Rome

1917-18	33,967,272	3,872,000		30,095,272	30,095,272

(a) Includes Bihar and Orissa and excludes Eastern Bengal up to 1910-11

(b) Increase due to the adoption of the latest census figures

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in the Southern Presidencies. The provincial areas in this column exclude Indian States in direct political relations with the Government of India, but include Feudatory or Tributary States politically controlled by Local Governments, with the exception of the Shan States in Burma and the Tribal areas in the North-West Frontier Province.

Column 3.—In this column is entered the area of any Feudatory or Tributary States included in column 2

Column 4.—Prior to 1908-09 this column showed the entire area (exclusive of Indian States) for which the statistics required for Tables II and III were not forthcoming in whole or in part. This area comprised chiefly estates held in permanent settlement or on privileged tenure, which were not surveyed or which possessed no agency for the annual collection of agricultural statistics. But arrangements have since been made to prepare statistics, for the whole of this area, based either on regular returns or on estimates as has been found practicable. There is therefore no longer any unreturned area to be shown in this column.

Columns 5 and 6.—Column 5 is a check on the accuracy of column 6. In the latter "village papers" mean "the papers prepared by the village accountants." The village papers do not in several provinces relate to the whole area included in column 5; for instance, the village returns sometimes do not include the forest areas. There are also tracts in many provinces for which no village papers exist and for which estimates have to be made to complete the statistics. In all such cases, column 6 must be taken to be the total area corrected by the village papers in respect of the areas for which such papers exist. The areas of provinces and districts, which are calculated from village papers, are necessarily somewhat different from those given by the Survey Department, (a) because, while the survey area of a district or province is calculated in block, the area by village papers represents the added total of field and village areas; and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads, is not uniform in the two sets of returns. In provinces where no village papers exist, the figures in column 5 have been repeated in column 6. In that case they represent the area of which the details are stated in columns 2 to 6 of Table II.

Column 2 states the area as ascertained by the provincial survey department, supplemented, for tracts which have not come under the operations of that department, by areas obtained with the computing scale from the Survey of India Atlas sheets of the localities concerned.

Columns 5 and 6.—The statistics for the major portion of the zamindari estates and certain raiyatwari and whole inam villages are based on estimates, owing to the absence of adequate agency for the collection of statistics in these tracts. Of the total area (89,699,386 acres) entered in column 6 for 1917-18 (page 19), 66,155,054 acres are based on actual returns and 23,544,332 acres on estimates.

Column 2 states the area as returned by the provincial Revenue Survey and Settlement department, supplemented in the case of Indian States by the returns of the topographical survey

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (48,700,555 acres) entered in columns 5 and 6 for 1917-18 (page 21), 44,734,568 acres are based on actual returns and 3,965,987 acres on estimates

<i>Total</i>					
1916-17	33,975,088	3,872,000		30,103,088	30,103,088
1917-18	33,967,272	3,872,000		30,095,272	30,095,272

Column 2 states the area as returned by the provincial Revenue Survey and Settlement department, supplemented in the case of Indian States by the returns of the topographical survey. The revenue survey being incomplete in Sind, the exact area is not known: the column states the area of surveyed tracts *plus* the estimated area of unsurveyed tracts

Columns 5 and 6.—The figures of column 5 are repeated in column 6, because the areas in village papers are derived from the revenue survey records. The figures for all unsurveyed villages are based on estimates. Of the total area (30,095,272 acres) entered in these columns for 1917-18, 29,970,364 acres are based on actual returns and 124,908 acres on estimates

Columns 2, 5 and 6.—Where there has been no professional survey of the district, estimates framed in the best manner possible are accepted, subject to revision from time to time as surveys extend. Approximate figures for the Chin Hills and for the Kachin Hills (in the Bhamo, Myitkyina, and Katha districts) have been included from 1906-07 and for the Pakokku Hill Tracts from 1907-08. Of the total area (54,990,976 acres) entered in columns 5 and 6 for 1917-18 for Upper Burma (page 30), 14,539,588 acres are based on actual survey and 40,451,388 acres on estimates.

The variations in the areas shown in different years under the same item in the same province or district do not necessarily represent an actual increase or decrease on the area in question. In many cases a revised classification or the correction of a faulty estimate is responsible for the change.

Column 2.—“Forests” mean “any land classed or administered as forest under any legal enactment dealing with forests.” Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped). The forest areas do not agree in most cases with those stated in the reports on the administration of the Forest Department for various reasons, the chief amongst which are these: (1) because the forest Administration Reports and the statements of agricultural statistics relate in many cases to different periods, (2) because the administration reports relate exclusively to forests worked by the Forest Department, while the tables of agricultural statistics exhibit in addition forest areas administered by district officers, and (3) because, on the other hand, certain village lands worked and returned as forests, by the Forest Department are not treated as forests in the returns of agricultural statistics and are therefore excluded from this column.

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture.

Column 4 includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column.

(a) See footnote (a) on page 12

Columns 8 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only.
Columns 14 to 18 state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop. The excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13) is thus due to the inclusion in column 18 of the area irrigated at both harvests.

(a) Includes 1,700 acres in Rajshahi for which details are not available

(b) Includes 26,777 acres in Purnea for which details are not available

* See explanations given in the footnotes (page 38)

(a) Includes reserved and protected forests only. The management of the latter having been transferred to the revenue authorities, the figures shown in the forest administration report represent the areas of reserved forests, which slightly differ from those adopted for this table because the periods embraced are different

(b) Includes unculturable Government waste and unculturable *banés*

(c) States the estimated area of culturable Government waste

(d) Shows (1) the estimated area of culturable *banés*, and (2) the difference between the net area cropped and the gross area of the actual holdings (exclusive of *banés*). It thus includes the unculturable lands within the actual holdings, the area of which cannot be ascertained

Column 2.—Includes the area cultivated within forests, and excludes the area of forests in the State of Sandur, in Bellary, not included in the village papers. As the latter is included in the Forest Administration Report, it accounts partly for the disagreement of its figures with those in this table

Column 4.—Includes areas occupied by *babul* and *casuarina* trees when they do not form parts of forest areas. Prior to 1911-12, such areas were classed under "Miscellaneous non-food crops" in Table III

Column 5.—Includes all occupied waste, that is to say, waste portions of land for which revenue is paid

Column 6.—Of the total net cropped area for 1917-18 (34,056,060 acres) stated in this column (page 52), 27,612,295 acres are based on actual returns, and 6,443,765 acres on estimates

Column 10.—The term "tanks" refers to a particular kind of dammed reservoirs. These reservoirs are formed by throwing dams across the valleys of small rivulets and streams to intercept water during the rains

Column 13.—Of the total area irrigated in 1917-18 (9,523,953 acres, page 53) 7,546,893 acres are based on actual returns and 1,977,060 acres on estimates

NOTE.—Figures for unsurveyed villages are based on estimates.

Column 2.—Includes land administered by the Forest Department whether formally declared forest under an Act or not, and differs from the area stated in the forest reports, because in certain localities, where the settlement is incomplete, the original areas are still returned by the Forest Department, while revised areas are returned in this table; also because the revenue records do not always state the most recent revisions.

Column 3.—Includes all land recorded at the survey and settlement as unculturable, although at times a very small quantity of this land is cultivated.

Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is ten years.

Column 6.—Of the total net cropped area (27,300,259 acres) entered in this column for 1917-18 (page 56), 26,052,794 acres are based on actual returns and 1,247,465 acres on estimates.

Column 2.—The figures do not agree with those in the Forest Administration Report, because the revenue records do not state the most recent alterations of area due to erosion by the Indus which the forest report does, and because, on the other hand, the forest report does not always exhibit the most recent alteration of area effected by the revision of survey, which the revenue records do.

Column 6.—Of the total net cropped area (4,467,884 acres) entered in this column for 1917-18, 4,463,852 acres are based on actual returns and 4,032 acres on estimates.

Column 2.—Includes forest areas administered by the district officers of some districts. Hence the figures do not agree with those in the forest administration report which excludes these areas. This column also includes the Siwalik Range in the Dehra-Dun district.

Column 5.—The maximum period for which land left untilld is reckoned as fallow is three years.

Column 6.—Of the total net cropped area (27,085,984 acres, page 64) entered in this column for 1917-18 for the Province of Agra, 26,481,984 acres are based on actual returns and 604,000 acres on estimates.

Column 2-18.—See explanations given as footnote on page 22 for Saharanpur.

Columns 8 to 13.—Government canals include private canals except in Dehra-Dun, Naini Tal, Budaun, and Basti for which districts separate figures for private canals have been obtained. There are very few private canals in the United Provinces.

Column 13.—Of the total area irrigated (8,143,993 acres, page 65), in the Province of Agra in 1917-18, 8,108,093 acres are based on actual returns and 35,900 acres on estimates.

Column 2.—Includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality.

Column 3.—This column includes 23,680 acres of river beds in Gurgaon, 15,360 acres of mountain tracts in Simla, and 3,896,960 acres of mountain tracts in Kangra. These areas are not accounted for in the village papers, and the figures are based more or less on estimates.

Column 4.—Includes large areas of Government waste not allotted for cultivation.

Column 5.—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In certain districts in the south-west of the province, however, the classification is amended annually.

NOTE.—For tracts outside the surveyed area the figures are based on estimates framed in the best manner possible.
Column 2.—The area entered in this column is that given in the Forest Administration Report, and includes reserved forests and fuel reserves. Estimates of the forest areas in certain hill tracts are also included. The forest areas in the Shan States, which are included in the Forest Administration Report, are excluded from this table, no returns of agricultural statistics being prepared for those States.
Column 3.—In settled tracts the unculturable area is taken from settlement registers, but in unsettled tracts it is obtained from the best source available.
Column 4.—Includes land thrown out of cultivation and abandoned. Groves, not classed in the cropped area, and bamboos when not grown in forest areas, are also included in this column.
Column 5.—Includes only such land left uncultivated as is actually in the possession of cultivators. In Lower Burma (excluding the Thayetmyo district) such lands are assessed at privileged rates, but in Upper Burma and in Thayetmyo no assessment is levied on land left uncultivated.

Column 2—Shows the areas administered by the Forest Department; but the figures differ from those in the Forest Administration report, because the actual area of the forest is not known owing to incomplete survey, also because excisions made have not yet been taken note of in the forest registers, and because in many cases raiyatwari villages settled, thekadari villages surveyed, clearance leased villages earned in proprietary rights, and villages purchased under the waste-land sale rules, have not as yet been finally disforested and struck off the forest registers. In the case of the Chanda, Drug, Raipur, and Bilaspur districts this column also includes all areas in the zamindars' estates which fall outside the surveyed villages of those estates. These areas are almost wholly under forest and include only a negligible proportion of sparse and shifting cultivation.

Column 3.—States areas covered with water, hill, or rock, and land occupied by buildings and roads.

Column 4.—States (1) the waste area within holdings (including fallows of more than three years), (2) land under tree forest which is not administered under any Act dealing with forests, (3) land under scrub jungle or grass, and (4) groves not included in holdings.

Column 5.—Land which has been fallow for not more than three years is reckoned as current fallow.

Column 2.—Includes the forest area administered by the Forest Department, but excludes a large area of cultivated land in the Melghat taluk in Amraoti shown as forest in the forest report.

Column 3.—Includes village sites, tanks, and land taken up for public purposes or devoted to uses other than agriculture; it also includes unculturable portions of culturable fields.

Column 4.—Includes land available for cultivation but not given out.

Column 5.—Includes occupied culturable land left fallow for private reasons, such as grazing, rotation, etc.

Column 2.—The figures represent reserved forests, but exclude the areas of forest villages within the reserves which are entered under the appropriate heads of this table.

Columns 3 and 4.—The figures for unsurveyed tracts in Cachar and for permanently settled tracts in Sylhet are based on estimates. In the Assam Valley unsurveyed waste is divided into culturable and unculturable on the assumption that their proportion in the surveyed area holds good.

Column 5.—Includes generally all lands which are thrown out of cultivation or not cultivated for three years, but which remain in the occupation of leaseholders. Figures for the Hills districts except the plains portion of the Garo Hills are rough estimates.

Column 6.—The figures are obtained from the abstract crop statement for districts which have been cadastrally surveyed. The figures for the permanently settled estates of Sylhet and Goalpara and for the hill districts are estimates.

Column 2—Includes all lands specially allotted to forest growth under the control of Government or any Local Board or Municipality, and protected village waste in Hazara administered by the district officer and other waste lands in Peshawar.

Column 4—Includes large areas of Government waste not allotted for cultivation

Column 5—The maximum period for which land is reckoned as fallow is two years; but, as a change in classification is not generally made until the year for quadrennial statements comes round, the old classification may be retained from one to three years longer than the prescribed period. In Dera Ismail Khan classification is amended according to area of each class of soil actually cultivated each year.

(a) Variations due to untimely and deficient rain.

NOTE—This table shows the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulae prescribed by the provincial authorities.

The variations in the areas shown in different years under the same crop in the same district do not in all cases represent an actual increase or decrease in the area under that crop. In certain cases a revised classification or the correction of a faulty estimate is responsible for the change.

Column 10 (other food-grains including pulses).—Arhar (pigeon pea), barbat, lobia or chowli (asparagus), mung (green gram), kulthi (horse gram), urad (black gram), field gram, cheick (job's tear), lentils, cheena (common millet), kungni (Italian millet), kodo or varagu, kutki (little millet), kuhudi, peas, pigeon or bottle grass, swank or shama, chickling vetch, buck wheat, wudalu or barti.

(a) See footnote (a) on page 12.

Column 28 (other dyes).—Aratto, chayroot, divi-divi, henna, madder, morinda, safflower, saffron.

Column 31.—In certain cases, notably in Madras, the areas stated under "Tea" differ from those given in the special report on tea production published separately. The principal reason is that the special report is prepared from returns received from managers and owners of estates; and these returns, especially in Southern India, are in many cases inaccurate and defective. Minor discrepancies are also due to the fact that the figures in this table deal with the agricultural year; while those in the special report deal with the calendar year.

Column 35 (other drugs and narcotics).—Aloes, arecanut, sweet basil, betel-vine, country borage, bogoda brinjal or nela mulaka, dhatura, purple flea-bane, isfagul, kclinj or rempali, senna, soap nut, sweet flag.

(a) Increase due to a revised classification of crops.

Column 37 (fodder crops).—Carob or locust-tree, fodder cholam, lucerne, guinea grass, oats, field vetch.

Column 38 (fruits and vegetables including root crops).—Agasi, wood apple, cashew nut, custard apple, rose apple, artichoke, arum, beans, beetroot, bilimbi, bimb, brinjal, cabbage, carrot, cassava, cauliflower, celery, chicory, citron, coconut, cress, cucumber, drumsticks or horse radish, elephantfoot, fig, garmal, cape gooseberry, country star gooseberry, goosefoot, gourd, gourd melon, grapes, guava, gumberry, edible hibiscus, jack fruit, jujube, kanda, kankrol, kamranga, karola, kavali, kavathu, koorka, lettuce, mango, man-gosteen, mankachu, marians, Indian medlar, melon, oranges, papay, parvar or patol, peach, pineapple, plantain, black plum, hog plum, pomegranate, pomelo, ponnagantikura, potato, puliyavara, sweet potato, pumpkin, radish, raspberry, rosello, sankalu, sapodilla, sebestan, sorrell, water caltrop, spinach, strawberry, manila tamarind, tomato, turnip, uchhe, yams, elephant yams.

Column 39 (miscellaneous food crops).—Amaranth, arrowroot, kirni, mahua.

Column 40 (miscellaneous non-food crops).—Chrysanthemum, dani (*nip fruticans*), dhaincha (*sesbania aculeata*), flowers, margosa or neem tree, mulberry, chaplash, thetké (grass).

(a) Variations due to a revised classification of crops.

(b) Includes 342,173 acres in Nainital and Almora for which details of crops are not available.

(c) Increase in 1915-16 is due to inclusion of area under grass and babul previously shown as "fallow" in Table II.

AREA UNDER CROPS

Column 37 (fodder crops).—States the areas sown with grass and crops solely for fodder. Lands left waste for grazing and on which grass grows spontaneously are not included in this column.

* Shows crops that in normal times are used only as fodder.

NOTE.—The area sown with unimportant mixed crops, for which no separate heading is provided in the provincial crop statement⁸ is assigned to the principal crop by the village accountant. The areas of important mixed crops, namely, wheat and barley, wheat and gram, barley and gram, jawar and arhar, bajra and arhar, and cotton and arhar, for which separate headings are provided in the crop statements, are distributed in accordance with prescribed formulæ and entered under the crops of which they are composed.

Columns 3, 4, 5, 6, 9, and 10.—The whole of the area of the land planted with food-grains wheat, barley, etc., mixed with oilseeds is shown under food-grains in this table.—The area shown under food-grains which was really planted with oilseeds (as a mixed crop) is roughly estimated to have been 4,360,000 acres in the whole of the United Provinces of Agra and Oudh in, 1917-18.

Columns 2 to 24.—See explanations given as footnotes on page 22 for Saharanpur.

Columns 12, 13, and 14.—The figures shown in these columns represent areas under "pure" oilseeds, i.e., oilseeds sown unmixed with any other crop. Besides these, the oilseeds are thinly sown in combination with wheat, barley, gram, and other crops. If the areas occupied by the scattered plants were added up, it is estimated very roughly that they would amount in 1917-18 (for the whole of the United Provinces of Agra and Oudh) to 695,000 acres of linseed, 850,000 acres of sesamum, and 2,815,000 acres of rapeseed.

* See explanation given in the footnote (page 126)

NOTE.—There is no agency for the collection of statistics in Almora, Garhwal, and the hill tracts of Naini Tal. Estimates have, however, been made for Garhwal and included in the table

Owing to settlement operations figures for the kharif (autumn) and rabi (spring) crops for the whole of Gorakhpur District and those for all crops for a portion of the Basti district are not available; hence previous year's figures have been repeated.

NOTE—The information is received from district officers who in their turn obtain figures from the district Land Records staffs in the case of the temporarily-settled areas and from Zamindars in the case of the permanently-settled portion of Goalpāra, with the exception in the latter district of jute, the estimate for which is compiled by the village Chāukidari Panchayats. In the permanently-settled part of Sylhet the figures for jute are those submitted after actual inspection by the village Chāukidari Panchayats. The figures for tea are reported by the garden managers, while for all other crops estimates have been framed by the district officers from the actual areas in the surveyed parts, applied to the rest of the districts. The figures for the hill districts are rough estimates which are revised quinquennially except for cotton for which estimates have to be made annually for the cotton forecast.

(a) Includes gram

Note.—Live-stock in cities and cantonments are included wherever it is possible to secure their enumeration. Oxen and buffaloes not old enough for work or to produce young are treated as "young stock".

(a) Figures not available.

(b) Included under "mules".

(c) Figures from 1908-09 to 1910-11, which are based on estimates, include Bihar and Orissa but exclude Eastern Bengal

Table IV—continued

No. 57—LIVE-STOCK, PLOUGHS, AND CARTS IN EACH PROVINCE IN BRITISH INDIA.

PROVINCE AND YEAR OF ENU- MERATION	Bulls and bullocks	Cows	BUFFALOES		Young stock (calves and buffalo calves)	Sheep	Goats	Horses and ponies	Mules	Don- keys	Camels	Ploughs	Carts

(a) In Coorg the table is prepared quinquennially on a census taken every five years. The last census was taken in March 1915 by the circle shāmbōgs, and the particulars entered in a register maintained under Rule 73 of the Rules framed under the Coorg Land and Revenue Regulation, 1899. Animals in municipal towns are included.

(b) An annual census is taken on the 15th March in Manpur.

(c) The figures in columns 7 to 14 exclude Bengal (see Table IV, No. 58).

(d) Statistics based on a census taken in 1913-14. Figures for columns 6, 11, 13 and 14 were revised in 1914-15

(e) Included under "Donkeys".

(f) Excluding Eastern Bengal.

Note—Figures for 1912-13 are based on a cattle census taken in 1912; the figures for most of the districts, in columns 2 and 3 have, however, subsequently been revised. The census did not take into account the animals named in columns 7 to 11 nor ploughs and carts (columns 12 and 13). The figures for 1910-11 for the districts of the Presidency and Bardwan Divisions and for Darjeeling are based on estimates. The figures for 1909-10 for Faridpur are based on information collected during survey operations conducted in that district.

Note.—A census is taken every five years in Government (raiayatwari) villages. The last quinquennial census was taken in 1914-15. In inam villages, there is no suitable agency for the work, and Collectors obtain information for these villages as best as they can; it is not known to what extent any census is made in them. Previous to 1909-10, no information was available regarding live-stock in permanently settled (zamindari) estates and in towns and cantonments which did not form part of any revenue village; but from that year statistics based on estimates are furnished for all these tracts.

(a) Constituted in 1910-11 out of the Cuddapah and North Arcot Districts.

Note.—The figures are collected once in five years. The last quinquennial census was taken in 1915-16. Prior to 1915-16 all animals belonging to a family were entered against the name of the head of the family even though the animals were temporarily absent from the village. Animals belonging to other villages were excluded, and those belonging to a roving grazer having no permanent residence were noted, but were not included in the village resources. In the census of 1915-16 all animals present in the village were recorded, although some of them might belong to other villages, as in the case of the population census. The figures are regularly tested by circle inspectors (kanungos). Stock statistics for the city of Bombay were collected for the first time in 1909-10.

(a) Represents figures for both East and West Khandesh.

Note.—The table is prepared quinquennially on a census in each district taken every five years. The last census, which was due in 1913-14 but could not be taken in that year owing to famine in some of the districts, was taken in 1914-15 in all the districts, except Almora, Garhwal, and the hill tracts of Naini Tal. In these latter districts the last census was taken in 1912.

Note.—The figures for years prior to 1913-14 are only estimates received from time to time on the basis of settlement records or reports of police enquiries. The figures for 1913-14 shown in the table for all the districts of the Province, except Hazaribagh, Ranchi, Palamau, and Manbhum, were arrived at by a census of live-stock held in these districts towards the end of 1913. For Palamau, Hazaribagh, and Ranchi the figures are based on information collected during survey operations; while the figures for Manbhum are based on police reports. Corrections were made in the figures for Hazaribagh in 1915-16 and for Palamau in 1917-18.

Note.—A census for the whole province is taken every fifth year in the first week of February. The last census was taken in 1914. All cattle in cantonments and municipalities as also those belonging to Government are included

(a) Owing to redistribution of territories consequent on the formation of the province of Delhi [vide footnote (a) on page 14] the figures for Rohtak and Gurgaon were revised in 1912-13

(b) See footnote on page 14

Note.—Annual returns of agricultural stock are prepared by village headmen, revenue surveyors, and *taikthugyis*, the enumeration taking place from end of February to middle of March in each year. The figures include all animals in towns and also those employed in each district by Government departments, such as transport, military, police, and by municipalities

(a) Estimated figures

Note.—The figures are collected annually, between the 1st January and the 15th March, by the patwaris in each village for the areas in their respective charges. The total figure is recorded in the tahsil by the kanungo in a village register. The patwari takes into account all animals including those temporarily sent elsewhere (e.g., for grazing), which belong to residents of the village, and excludes animals which are temporarily in the village for grazing or other purposes, but do not belong to residents. Stock in cities, large towns, cantonments, and in forest villages are included.

Note.—A census is made annually by the village officers. All cattle belonging to one owner are entered against his name, even though the animals are temporarily absent from the village. When an owner cultivates land in more than one village, the actual number in each particular village on the night of enumeration is entered in the statement for that village. Cattle belonging to other villages, but temporarily in the village for grazing, are not entered in the statement for that village.

Note.—The statistics are based on a cattle census taken every five years. The census is, however, not taken simultaneously in the different districts. In the six districts of the Assam valley and in the central and eastern sections of the North-East Frontier district the last census was taken in 1915. In Cachar it was taken in 1912, in the Garo Hills (plains portion only) in 1913, and in the temporarily settled portion of Sylhet in 1910. No statistics are available for tracts other than Jaintia Parganas in Sylhet, and for the hill tracts.

(a) For Jaintia Parganas only. The figures for 1904-05 include estimates for other tracts also, but such estimates are not available for 1909-10.

(b) Excluding permanently settled tracts

(c) Constructed in 1914-15 out of Lakhimpur

(d) No information

(a) Excludes Bihar and Orissa districts constituted into a separate province

Note.—The varieties of tenure are included as far as possible, under one or other of the following heads, namely, (1) raiyatwari, (2) zamindari, and village communities (temporarily settled), and (3) zamindari (permanently settled). Areas under forests are included under the prevailing tenure of the province. In the Central Provinces and Berar, however, areas under Government forests are shown separately.

Column 3.—Areas held revenue-free or at privileged rates are deducted, but the deduction need not be made where such areas are in any case less than an entire village and where there is any difficulty in estimating the corresponding deduction to be made in the population (column 11). In Madras, Bombay, and Berar all land on which a full assessment has not been leviable during the year (for instance, assessed unoccupied land) is classed for the purposes of this column as "area not fully assessed." Area should not be entered under this head merely because the assessment due from them has been suspended or remitted on account of short crops or for other special reasons.

Column 4.—This head is sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste, and should be either equal to or less than the net cropped area as shown in column 6 of Table II.

(§) The land revenue assessment necessarily differs from the land revenue collections which include collections on account of former balances and exclude so much of the assessment as has not been collected during the year.

* No details

† Includes 1,360,300 acres (in Dinajpur) for which details are not available

‡ Table made quinquennial after 1911-12

¶ Increase due to inclusion of certain Zamindari villages which were formerly included under Raiyatwari

Column 5.—Where the land revenue includes the zamindar's share, the net demand is entered, and the table states the payments due by the zamindars to Government, and not those due by raiyats to the zamindars. The actual realisable demand on account of the year is entered after excluding arrears for past years. This column includes all the heads classed as "Land Revenue" in the Civil Accounts. The heads are:—(1) ordinary revenue comprising fixed collections, revenue from canals in Sind, fluctuating collections (including nazarana), over collections (Bombay), surplus collections, collections from Government estates, kyun tax (Burma); (2) sale of Government estates; (3) sale proceeds of waste lands, and redemption of land tax; (4) redemption of summary settlement cess; (5) moturpha (house tax) collections; (6) assessment of alienated lands less quit rent; (7) recoveries on account of survey and settlement charges (Bengal); (8) rents, etc., of fisheries; (9) receipts for the improvement of Government estates; (10) 12 per cent on collections from Government estates (Bengal); and (11) miscellaneous, comprising receipts on account of land registration fees, receipts from quarries and minor mineral products in forests and lands not under the management of the Forest Department, water mills rent, huccoba tax (Sind), malikana or allowances to excluded proprietors, fines and forfeitures of revenue Courts (except in Bengal and Assam), receipts under Madras Act II of 1864, capitation tax (Burma), petroleum well revenue, jade and amber revenue, thathamada tax (Burma), receipts from ruby mines (Burma), recoveries in India of law charges in England on account of appeals from India, miscellaneous receipts, rents of railway class C land and rents of buildings situated on such lands.

Column 6.—The population is that of the last general census.

Entry 8.—As in entry 5, but only ordinary land revenue on fully assessed areas is entered.

Entry 9.—To be entry 8, divided by entry 4 (a).

Entry 10.—To be entry 8, divided by entry 4 (b).

* No details.

† Includes Rs15,19,026 for Dinajpur for which details are not available.

‡ Includes Rs15,18,959 for Linaipur for which details are not available.

The table is prepared quinquennially, and the figures were last collected in 1917-18

Column 1.—The following classification of estates has been adopted:—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government.

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors and estates leased to farmers for periods; and (b) all estates owned by Government as proprietor.

Column 4 (b) includes in certain cases fully assessed current fallows.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Land revenue assessed on fully assessed area [col. 4(a)].	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area. The table is prepared quinquennially. The figures were last collected in 1913-14

Column 3 (a).—In the case of raiyatwari tracts this column states the area of unoccupied assessed lands, of all unassessed poramboke, of minor inam lands in Government villages held rent-free or subject to quit-rent, and of forest lands, excluding portions of the first mentioned two classes occupied under "miscellaneous;" and in the case of zamindari tracts the areas of hills, porambokes, and minor inams are entered. The entire area of whole inam villages is deducted from this column

Column 3 (b).—Raiyatwari; includes the area of certain Agency tracts in Ganjam, Vizagapatam, and Godavari, and also the difference between the area by professional survey and the area according to village papers

Column 4 (a).—The figures for the raiyatwari tenures in this column are taken from village papers which differ in some cases from the resultant of preceding columns

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4 (a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE
		For total area	For cultivated area			Number of towns	Aggregate population

Column 4 (a).—Raiyatwari; states the total occupied area as stated in village papers

Column 4 (b).—For certain districts areas actually cultivated and for certain others estimates, or actuals supplemented by estimates, are shown in this column

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts

Column 8.—Shows only the "ordinary revenue," as defined in the Civil Accounts, on area fully assessed

Column 10.—The cultivated area is, in the case of raiyatwari and zamindari lands, the net cropped area out of the area given in column 4 (a)

Column 11 states the entire population of raiyatwari and zamindari villages, respectively

This return is prepared quinquennially

Column 1.—Lands held under special tenures, such as talukdari, mehwas, udhad-jamabandi narvadari, and bhagdari in Gujarat and khoti and izafat in the Konkan, are classed as "zamindari and village communities (temporarily settled)"

Column 3 (a) includes alienated area and the area held free of revenue or the revenue of which has been reduced by special agreement, and also the fully assessed unoccupied area

Column 3 (b) includes alienated cultivated and zamindari cultivated (estimated) land

Column 4 includes land under temporary cultivation, also pôt inâms paying full assessment

Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts. On the average of the last five years about 2.5 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc

Column 10.—The incidence is calculated from the occupied area, which, in the Presidency proper, is treated as the cultivated area for the purposes of this table, and the assessment on that area.

Column 11 includes population of pot inams and the like scattered areas, which cannot be distinguished from the population of the fully assessed area.

Column 12.—The incidence is based on the figures given in column 11 and those in column 8, plus the amount of full assessment on privileged lands held in fully assessed villages at less than that assessment.

The table is prepared quinquennially, and the figures were last collected in 1916-17

Columns 3 (a) and 3 (b) exclude small revenue-free plots, for which details are not forthcoming

Column 5—states (1) "ordinary revenue," comprising (a) fixed collections (including land revenue on account of resumed Gorait Jagirs), (b) fluctuating collection, (c) surplus collections, (d) collections from Government estates (including collections from Dudhi, Tarai, and Bhabar Estate, and receipt from Forest Estates); (2) sale of Government estates; (3) sale-proceeds of waste lands and redemption of land tax, (4) miscellaneous comprising (a) receipt from quarries and mineral products in forest and land not under the management of the Forest Department, (b) water mills rent, (c) malikanas or allowance to excluded proprietors, (d) fines and forfeitures of Revenue courts, (e) recoveries in India of law charges in England on account of appeals from India, (f) miscellaneous receipts, (i) patwari miscellaneous receipts (Revenue Record Room), (ii) mutation fees, (iii) mutation fines, (iv) sale of waste paper, (v) Partition fees, (g) Rents of Railway class "C" land and rents of building situated on such lands. On the average of the last five years about 1.68 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Column 6.—The total population of the province includes the population of the Benares State

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4 (a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Note.—No figures have been entered in columns 8 to 12 opposite "Lucknow, permanently settled," (page 237) as no portion of the permanently settled area has been fully assessed to land revenue.

Column 11 includes population of revenue-free lands when the area of such lands is less than an entire village. The inclusion does not materially affect the incidence entered in column 12.

Columns 13 and 14.—The figures are taken from the Census Reports of 1911.

Note.—The table is prepared quinquennially, and the figures were last collected in 1915-16, but some of the figures relating to land revenue were revised in 1917-18. The tenure in Ajmer-Merwara is all zamindari, and includes village communities in the case of temporarily settled areas
Column 1.—The khalsa area has been classed as "Zamindari and village communities (temporarily settled)" and the jagir and istamrari areas as "Zamindari (permanently settled)"
Column 4 includes in the case of the khalsa villages the assessed cultivated area, including assessed fallows
Column 5 states ordinary and miscellaneous land revenue appearing in the Civil Accounts
† Included under Ajmer

	Miscellaneous revenue	...	...	...	...	...	2,266		

The table is prepared quinquennially, and the figures were last collected in 1917

Column 1.—The following classification of estates has been adopted :—

(1) *Zamindari (permanently settled)* including estates managed for proprietors by Government;

(2) *Zamindari (temporarily settled)* comprising (a) all temporarily settled estates, namely, those settled for periods with proprietors, and estates leased to farmers for periods and (b) all estates owned by Government as proprietor

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts. On the average of the last five years about 0.16 per cent of the total revenue entered in this column was remitted on account of unoccupied lands, short crops, etc.

Note.—For tracts outside the surveyed area the figures are mostly based on estimates framed in the best manner possible

Column 1.—No areas are classed as zamindari, as no system of communal assessment prevails

Column 3 (a) shows grants under Appendices I and II of the Rules under the Upper Burma Land and Revenue Regulation

Column 3 (b) includes non-State lands in districts where no land revenue rates are yet imposed and where the *thathameda* rates have not yet been adjusted

Column 4 (a) shows figures of State and non-State lands assessed to land revenue, including current fallows which are not assessed to land revenue. This column also includes the areas of waste land grants of which the rates have been fixed in perpetuity

Column 5 states ordinary land revenue, *thathameda*, water rate rents of fisheries, and items under "Miscellaneous Land Revenue," appearing in the Civil Accounts.

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area [col. 4(a)]	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Column 3(a)—This column states jagir, izára, and palampat villages, all unassessed land, forest areas, village sites, roads, rivers, etc.

Column 4(a)—Pót kharáb lands are excluded from this column, which includes only occupied lands available for cultivation

Column 4(b) states the cultivated area in khalsa villages only

Column 5—The figures include the revenue derived from jagir, palampat, and izára villages. As regards the items of land revenue included, the practice has not been uniform, different districts having entered different items

Total revenue from land per head of population (cols. 5 and 6)	Land revenue assessed on fully assessed area (col. 4(a))	INCIDENCE PER ACRE OF LAND REVENUE (COL. 8) ON FULLY ASSESSED AREA (COL. 4)		Population of fully assessed area	Land revenue assessment per head of population of fully assessed area (cols. 8 and 11)	TOWNS OF OVER 10,000 INHABITANTS		DISTRICT AND NATURE OF TENURE

Column 1—Raiyatwari includes, besides raiyatwari tenures, all unsettled Government waste and forest lands and areas in which house-tax or poll-tax is levied; it also includes certain temporarily settled estates in Sylhet which were formerly (before 1902-03) included under Zamindari (temporarily settled). Zamindari (temporarily settled) includes, besides temporarily settled Zamindari estates, fee-simple grants, wholly or partially revenueless tenures, and grants under progressive assessment.

Column 5 includes all the items falling under the head "Land Revenue" in the Civil Accounts.

Ownership	2,746	2,981	3,629	3,003	2,131	158,486	151,099	153,458	158,704	149,357
Right of occupancy	...	...	...	...	...	17,872	17,777	21,323	18,089	16,951

Note—It is optional with local Governments to enter or omit transfers of lands held by tenants.
The entries under "by order of court" state not merely the transfers occasioned by debt, but all forms of transfer effected through the medium of a court. The word "court" in the entry "by order of court" should be held to include a revenue court.
Changes of entry due to succession, partitions, or simple mortgages, are not really transfers, and are excluded from the table, as also are redemptions of mortgage. All temporary transfers such as leases are also excluded, but mortgage with possession is treated as a transfer and entered in the table.

(a) The statement includes all legal transfers of property (1) by voluntary action of the owners and (2) by virtue of decrees of civil, and orders of revenue, courts. Transfers ordered by courts in cases of disputed succession, and those occasioned by debt incurred by the judgment-debtors, are included under the heading "by order of court." This heading also includes transfers ordered by civil courts from registered holders to decree-holders, of lands sold by civil courts in satisfaction of decrees, and of holdings sold by the revenue authorities for arrears of revenue.

(b) Transfers of property in land are not permitted in Manpur, except by sale and that only under special conditions.

(c) Not stated

Note.—Transfers by inheritance or non-permanent transfers, such as leases or usufructuary mortgages for short periods, are excluded but mortgages with possession are included, as also all transfers made under order of a court. Transfers of *malikana* rights, that is, rights to receive a portion of the profits of an estate not amounting to proprietary rights, have been excluded. Statistics of transfers of tenant-right are not given. Transfers by gift have been included.

Note.—Transfers of property in land were not regularly registered in Upper Burma until 1st January 1914. The information is collected by revenue officers. The statement includes cases in which land has been permanently transferred by gift, sale, or other transactions, for valuable consideration. The term "court" includes a revenue office as well as a civil court
(a) No information (b) Less than one acre (c) Details for districts not given

Note.—The figures against "proprietors" are filled up from returns compiled on the basis of mutation proceedings. These against "tenants" are based on statements furnished by patwaris in which all transfers are entered, including transfers by mortgage with possession, as well as transfers by sale, but excluding transfers by inheritance. The statement does not include leases or mortgages without possession.

Note.—The information is obtained from the Registration Department. The table includes all transfers effected by sale of fields under decree of a court (including a revenue court) either in execution of the decree or for recovery of arrears of land revenue. Private sales or recognised divisions of fields necessitating a change in the name of the registered occupant are entered under "by private contract or gift," as also are mortgages with possession. Transfers due to succession, by inheritance, simple mortgages, and leases are omitted.

The column "by order of court" includes transfers occasioned by debt incurred by judgment-debtors, as also all other transfers effected by order of courts, civil and revenue

APPENDICES

APPENDIX A

THE AVERAGE YIELD PER ACRE OF PRINCIPAL CROPS IN INDIA

A provisional return of the yield of principal crops cultivated in India was first compiled in 1892, from various statistical publications available at the time, such as agricultural and settlement reports, crop forecasts, gazetteers, replies to the enquiries of the Famine Commission, etc. To provide for the periodical revision of the estimates a system of experimental crop cuttings was prescribed by the Government of India, the results of which are reported by Local Governments and Administrations at the close of each quinquennium. The returns for the quinquennium ended 31st March 1917 have been received and scrutinised. These outturns per acre are of extreme importance since these will generally be used during the present quinquennium (*i.e.*, until 31st March 1922) in estimating the production of crops, for which forecasts are prepared.

2. The estimates are prepared in the following way. The estimate given is the average outturn on average soil in a year of average character, as deduced from the information obtained from experiments made during the period under review. When, therefore, this average is multiplied by the average area sown, it is believed to give as near an approximation as possible to the outturn of the crop in an *average* year. The Department of Agriculture or Land Records of each province has at its disposal provisional standard estimates of the average yield of land of average quality (usually under the two major heads of irrigated and unirrigated land) for the several crops in each district. The object of the experiments or investigations annually made is to test the accuracy of these estimates, and to enable the head of the Department in each province to revise his provincial estimates when necessary. Should it happen that the period has been one of unfavourable conditions or of exceptionally favourable conditions, which have affected the experiments reported, this would not necessarily involve the reduction or increase of the standard estimates for the district or for the province, unless there were other reasons for believing that, as estimates of average yield in an average year, they had been pitched too high or too low.

3. In 1913, on an examination of the returns of the quinquennium ending 1911-12, it was recognised that the results of experiments as conducted by the district revenue staff were generally unreliable. A change was accordingly made in the system. In 1915 the Government of India, in order to improve the returns, issued instructions to employ, as far as possible, the expert officers of the provincial Agricultural Department, for carrying out experiments on a well-ordered plan in each agricultural tract, and for the investigation of average crop outturns in the various provinces. It appears from the provincial reports that during the quinquennium under review experiments were regularly conducted by officers of the Agricultural Department in Madras, Bombay, and the United Provinces. In Bihar and Orissa crop tests by officers of the Agricultural Department were carried out on a small scale (as an experimental measure only) in a few districts. In Bengal the work was transferred from the district staff to the Agricultural Department, but owing to a reduction in the staff of the Department in consequence of financial stringency, the old system had to be reverted to. In the Punjab officers of the Agricultural Department were consulted in revising the standards, and it is stated that an improved system of conducting experiments has come into force from 1917. In Burma also new rules have been issued entrusting supervision of the experiments very largely to the Agricultural Department with effect from 1917-18. In Assam experiments were conducted according to revised rules framed in 1912 and slightly modified in 1915. In Mysore a system of checking the estimates by the results of experiments conducted by the Agricultural Department is, it is understood, to be introduced during the next quinquennium. No change in the system appears to have been made or contemplated in the remaining provinces.

4. It will thus be seen that in the majority of provinces, the orders of 1915 could not be fully carried out in the quinquennium under review. As a result of the experiments that were made, whether under the old or the new system, considerable changes have been made in the averages previously adopted, except in Bombay, Bihar and Orissa, and the Central Provinces and Berar. The changes

are generally in an upward direction. In Bengal the yield of winter rice has been raised from 983 to 1,036 lbs, and that of jute from 1,271 to 1,300 lbs. Barley in the United Provinces has been raised from 1,100 to 1,150 lbs, arhar from 750 to 800 lbs, and cotton from 160 to 170 lbs. In the Punjab wheat has been raised from 726 to 791 lbs, sugarcane from 1,686 to 1,933 lbs, and cotton from 118 to 135 lbs. Cotton in Sind has been raised from 125 to 170 lbs, and sugarcane from 4,233 to 8,142 lbs. In Assam the yield of autumn rice has been raised from 672 to 706 lbs, and that of sugarcane from 1,904 to 2,016 lbs. In the North-West Frontier Province wheat has been raised from 633 to 676 lbs, and sugarcane from 2,430 to 2,660 lbs. In a few instances the standards have been decreased. In Sind the yield of rapeseed has been put at 393 lbs; in Assam the yield of winter rice at 952 lbs, while the yield of jawar in the North-West Frontier Province is now estimated at 399 lbs.

5. The importance of accurate standards of average outturn cannot be exaggerated, since, as already noted, under the present system the estimates of yield in crop reports are based on these standards, and a small error of even one lb per acre may make a difference of thousands of tons in the estimated yield of a province. It has also to be remembered that the result of a single experiment, if not conducted with proper care, may vitiate the average for the district as well as for the province, since the district figure is calculated by averaging the outturns obtained from all the selected experiments in the district, and the provincial average is estimated by multiplying each district outturn by the area under the crop in each district and dividing the sum of the total outturns thus arrived at by the total area under the crop in the province. It is, therefore, extremely necessary that the instructions issued by the Government of India in 1915, referred to above, should be carried out to the fullest extent, as early as possible, where this has not already been done.

6. The statement below compares the average outturns of the major crops in the different provinces. The relative importance of each province in respect of each crop has also been shown by percentages representing the proportion of the total area under each crop in British India cultivated in each province. Tea has been included in this statement, although this crop is not dealt with in the quinquennial returns, the average outturns having been calculated from the special returns of tea production for the five years ending 1916.

(a) Irrigated. (b) Unirrigated.

The outturns of maize in Assam, of sugarcane in Sind, and of cotton in Ajmer-Merwara appear to be too high, as compared with other provinces, although the areas cultivated are insignificant. On the other hand, the outturns of linseed in the Central Provinces and of sesamum in the Central Provinces and Burma appear to be too low in spite of extensive areas being cultivated with the crops in these provinces.

7. In the following paragraphs the leading features of the provincial reports are summarised :—

Bengal.—In 1915 the work of conducting crop cutting experiments in Bengal was partially transferred from the district offices to the Agricultural Department, but owing, as already noted, to a reduction made in the staff of demonstrators attached to the Agricultural Department in consequence of financial stringency, the old system had to be reverted to. This transfer and retransfer of the work from the district staff to the Agricultural Department and back led to some confusion and resulted in fewer experiments being made in some districts than would otherwise have been undertaken. Nevertheless the total number of experiments made during the quinquennium under review with staple crops (rice, wheat, gram, linseed, rape and mustard, sesamum, sugarcane, and jute) was a record of 3,671, as against 2,814 in the previous quinquennium; and these experiments afforded sufficient data for a general revision of the standards previously adopted for the province. The average yield has been raised in the case of rice, sugarcane, and jute; while it has been reduced in the case of wheat, gram, rape and mustard, and also linseed. The important changes are the increase in the yield of winter rice from 983 to 1,036 lbs, of autumn rice from 807 to 871 lbs, and of jute from 1,271 lbs, to 1,300 lbs, and the reduction of the yield of wheat from 861 to 698 lbs. The returns do not distinguish between irrigated and unirrigated crops, the irrigated area being relatively very small in the province. A few experiments were also made with certain less important crops such as barley, maize, peas, *khesary*, *mung*, sunn hemp, and tobacco; but the data obtained were not sufficient to warrant the deduction of average yields per acre for the whole province.

Madras.—During the quinquennium under review experiments in Madras were conducted by the Agricultural Department, and it is stated that they may be taken as being on the whole more accurate than those conducted in former years by the officers of the Revenue Department. On the other hand, these are much fewer in number and in many cases are too few to admit of the results being accepted as a representative figure for any tract. It is further stated that the figures reported in the previous quinquennial returns, which were solely based on crop cutting experiments, have never been adopted in Madras for the purpose of calculating outturns in crop forecasts, season and crop reports, etc. For this purpose there exists a separate set of standards, which have been fixed and modified from time to time by the Board of Revenue, in consultation with the Director of Agriculture, on a consideration of the tabulated results of crop cutting experiments, the results obtained on Government farms, and, in the case of cotton, of the figures of total crop exported from certain areas. These standard figures have been reported (rightly) in the present return. The Director of Agriculture, however, remarks that these figures are in need of revision in many cases and that he has now under consideration this important question. For the above reason, no useful comparison can be made between the present and the previous figures, especially as a distinction was made between irrigated and unirrigated crops in the previous figures, whereas the present figures are averages for irrigated and unirrigated crops taken together; except in the case of sugarcane which is always an irrigated crop.

Bombay.—In Bombay the estimates of 1897 were prepared with great care, and the results of the experiments made in the two quinquennia ending 1901-02 and 1906-07 were not considered sufficiently reliable to justify any revision. In the quinquennium ending 1911-12, the system of crop cutting experiments conducted by the district staff was abolished, and a system of more scientifically conducted experiments on Government farms by officers of the Agricultural Department was substituted; but the results obtained on Government farms were too meagre to justify any revision of the provincial averages, although a few changes were made with great caution in the district figures. In the quinquennium under review a few changes have been made in the district figures, as a result of the experience gained by the Agricultural Department; and it is believed that the changes are in the right direction, although the matter is largely one of guess work. The only change made in the provincial averages is a very slight increase in the yield of cotton, namely, from 100 to 102 lbs, all other figures remaining unchanged. It is stated

that endeavours will be made during the next quinquennium to test other figures upon which it has not yet been possible to offer any definite opinion.

Sind.—The figures reported from Sind in the previous quinquennia were not the average outturns worked out from the yield of crops raised on different classes of lands and under various modes of irrigation, but were mostly the actual results of individual experiments (or mean figures where more experiments than one were made) by the settlement or divisional officers. The present return has also been prepared from similar data, but a distinction has been made between irrigated and unirrigated crops. The Commissioner remarks that in order to work out correct averages, a large number of experiments would be necessary for each crop under different modes of irrigation, and the aggregate cultivation under each mode of irrigation on different classes of lands would also have to be taken into account; but as these statistics are not yet available on a sufficiently large scale, there is no alternative but to accept the figures now communicated by the collectors. As compared with the previous figures the present estimates show an increase in the case of wheat, barley, gram, sugarcane, and cotton, and a decrease in the case of jawar, bajra, sesamum, and rapeseed. The most important changes are the increase in the average yield of barley from 1,076 to 1,279 lbs, that of gram from 476 to 604 lbs, of sugarcane from 4,233 to 8,142 lbs, and of cotton from 125 to 170 lbs; and the decrease in the yield of jawar from 1,396 to 866 lbs, of bajra from 971 to 624 lbs, and that of rapeseed from 602 to 393 lbs. The Commissioner states that it is not possible to explain these wide variations except that the increase in the case of sugarcane and cotton can be ascribed to a more regular supply of water following the many improvements in the canals. The figure for sugarcane (8,142 lbs) seems, however, to be extremely high. It is further stated that instructions have been issued to district officers to collect in future the data of outturn of normal (12-anna) crops raised on different classes of irrigation and to work out on a uniform system the average for the district by taking into account the area under each mode of irrigation.

United Provinces.—In the quinquennium under review experiments in the United Provinces were made regularly by officers of the Agricultural Department and some by settlement officers, in addition to those conducted by district officers. The results of these experiments have not necessitated a change in the previous standards except for barley, jawar, arhar, and cotton. The yield of barley has been raised from 1,100 to 1,150 lbs, that of arhar from 750 to 800 lbs, and that of cotton from 160 to 170 lbs. The yield of jawar, on the other hand, has been reduced from 650 to 600 lbs.

Bihar and Orissa.—In accordance with the Government of India Circular of 1915, referred to above, the execution of crop tests by officers of the Agricultural Department of Bihar and Orissa was started in that year as an experimental measure, and experiments were carried out on a small scale in seven districts as supplementary to those conducted by district officers. The crop tests conducted by the Departmental officers are stated to have shown better results than those conducted by district officers; but the information obtained by the small staff of the Department is not yet of sufficient volume to serve as an effective check on the figures returned by district officers. The experiments conducted by district officers, on the other hand, were, as usual, unreliable owing mainly to carelessness in the selection of typical plots, and the results of these experiments do not, therefore, justify any modification of the provisional standards previously adopted for the province on the basis of the estimates of 1892. In the consolidated tables for British India these unrevised standards have therefore been retained in the statement of provincial averages (Table No. 1), but in the detailed statement of district figures, the average outturns based upon the experiments conducted during the quinquennium under review have been shown for each district, irrigated and unirrigated crops being classified separately. The provincial Director remarks that the district officers' figures should be supplemented by the results of a larger number of experiments made by the trained staff of the Agricultural Department under the new system, before the present provincial standards can be safely revised.

Punjab.—The revision of 1912 in the Punjab was made on the basis of the overcautious estimates of settlement officers, and it was remarked

that the yields then fixed were in consequence too low. The results of the experiments made in the quinquennium under review have confirmed that opinion, and in the present revision these yields, as also the cautious estimates of settlement officers, have been regarded as minima. In consultation with district and settlement officers and the Principal of the Agricultural College, Lyallpur, and other officers of the Department of Agriculture, increases have been made where the results of crop experiments indicate that enhancement is required, provided that the number of experiments has been sufficient. The system of conducting crop experiments has been revised and greatly improved, but unfortunately the new system came into force only with the spring harvest of 1917, at least so far as experiments conducted by district officers were concerned. The present revision shows that a general increase in the provincial averages has taken place. The notable increases are in the yield of rice from 688 to 782 lbs, of wheat from 726 to 791 lbs, of barley from 716 to 809 lbs, of maize from 908 to 1,040 lbs, of sugarcane from 1,686 to 1,933 lbs, and of cotton from 118 to 135 lbs. The Punjab Government remarks "that the present normal yields, though possibly slightly on the low side, are fairly reasonable, and that though it is no doubt difficult to determine how far the results of particular crops in particular harvests vary from the normal, the estimates at least for the main crops are steadily becoming accurate."

Burma.—In the quinquennium under review crop cuttings in Burma were as usual carried out for the most part under the supervision of sub-divisional and township officers, with occasional assistance from the Superintendent of Land Records and the subordinate Land Records staff. On a consideration of the results of these experiments and of those made in the previous quinquennia, no change has been made in the previous provincial estimate for rice in Lower Burma; but in the case of Upper Burma the estimates for all the crops now reported exhibit considerable variations. The Director of Agriculture remarks that whatever be the value of the Lower Burma figures, in Upper Burma the number of experiments remains too small to justify confidence in the estimates. In order to show the main products only, the following deductions have, as usual, been made from the gross outturn of the crops, namely, for rice and jawar 33 per cent, and for cotton 70 per cent. The Local Government issued orders in 1916, in accordance with which new rules have been prescribed changing the whole system with effect from 1917-18, and entrusting supervision of the experiments very largely to the Agricultural Department. The results of the new system will be reported in the next return. It may be noted that the average outturns hitherto-ascertained by the Director of Agriculture on the basis of crop cutting experiments have never been utilized for the purposes of estimating yields in crop forecasts, season and crop reports, etc, for which there exists a distinct set of normal outturns framed and revised from time to time by the Commissioner of Settlements and Land Records, Burma, mainly on the basis of settlement records. These normal outturns, which are published in the provincial Season and Crop Report, have been shown in the appended Table (No. 8) of district averages underneath the figures of crop cutting experiments reported by the Director of Agriculture, and have also been taken into account in calculating the averages for British India in Table No. 1. It is very desirable that one set of standard outturns should be framed, and revised or verified from time to time, on a consideration of data available from all sources and in consultation with the expert officers of the provincial Agricultural Department.

Central Provinces and Berar.—In the revision of 1912 experiments in the Central Provinces and Berar were selected with great care and due attention was paid to seasonal peculiarities and to classes of soil. In the quinquennium under review, as a result of a large number of experiments made with the rice crop in the Nagpur division slight changes have been made in the figures for that crop for the districts of that division. It has not, however, been considered necessary or advisable to make any change in the provincial averages for any crop.

Assam.—In consequence of the reformation of the province of Assam revised rules for the conduct of crop cuttings were framed in 1912, which were slightly modified in 1915. In accordance with the revised rules experiments were

conducted on all the crops of the province, for which forecasts are made, and also on certain other crops, such as *matikalai* (*phaseolus radiatus*), maize, and potato. The number of experiments made was much larger than in the preceding quinquennium, and their results are stated to have been on the whole satisfactory. The only district in which no experiments were made is the Naga Hills where the staff is stated to be inadequate for the purpose. As a result of the experiments made, the averages have been revised in most cases, the most important changes being the reduction of the yield of winter rice from 1,008 to 952 lbs, and the increase in the yield of autumn rice from 672 to 706 lbs, and that of sugarcane from 1,904 to 2,016 lbs. In the case of cotton a deduction varying between 40 and 50 per cent has been made in order to obtain the yield of lint.

North-West Frontier Province.—In the quinquennium under review experiments in the North-West Frontier Province were made by the district staff (Sub-divisional Officers, Tahsildars, and Naib-Tahsildars) in the two selected districts of Peshawar and Dera Ismail Khan. The results obtained from these experiments have been carefully scrutinized by the Revenue Commissioner, and, in cases where the figures were excessive, especially in Dera Ismail Khan, they have been modified after comparison with the settlement results when the experiments were conducted and worked out under the Settlement Officer's own supervision. For the other districts the averages previously adopted on the basis of experiments framed by Settlement Officers have been repeated. The provincial averages have been raised for all the crops except rice, jawar, and maize. The important changes are the increase in the yield of wheat from 633 to 676 lbs, of barley from 876 to 907 lbs, and of sugarcane from 2,430 to 2,660 lbs, and the reduction of jawar from 436 to 399 lbs.

Ajmer-Merwara.—The figures reported by Ajmer-Merwara are based mainly on the results obtained in 1916-17. The yield of jawar, maize, and cotton has been raised, and that of barley lowered; the most important changes being the increase in the yield of jawar from 137 to 322 lbs, and that of cotton from 170 to 291 lbs. The reported yield of unginned cotton has been reduced by two-thirds to obtain the yield of cleaned cotton (lint), but the figure still appears to be high. It is remarked by the Commissioner that the results of crop experiments, as they are at present conducted in Ajmer-Merwara, are of little, if any, value as a basis for estimating the average yield of any crop on average soil in a year of average character.

Delhi.—The return received from Delhi relates to the new province as constituted in 1912. The reported figures do not call for any special remark.

Coorg.—The only experiments made in Coorg have, as usual, been on rice. The average yield has been slightly lowered from 1,483 to 1,425 lbs, which is still very high in comparison with the reported yield of other provinces. The comparatively high yield of rice in Coorg was ascribed, in the previous return, partly to special attention being paid to rice cultivation since the decline of the coffee industry, and partly to the rice lands of Coorg being watered by hill streams which contain much manurial matter. The slight decrease in the present return is stated to be probably due to the selection of the crop and not to a decline in the productive capacity of the soil or bad years.

Mysore.—As a result of the experiments made in the Mysore State during the quinquennium under review, the averages for all the crops, except sugarcane, have been raised, the most important increases being in the outturns of rice (from 841 to 1,185 lbs), ragi (from 581 to 728 lbs), and cotton (from 79 to 122 lbs). The yield of sugarcane has been reduced from 3,138 to 2,559 lbs. The present figures are based only on experiments conducted by the Revenue Department. It is stated that arrangements have been made for checking the figures by the results of experiments conducted by the Agricultural Department, and the Darbar hope in future to be able to furnish more accurate statistics.

AVERAGE YIELD OF CROPS

NOTE.—(1) Average yield of both irrigated and unirrigated land is ascertained by multiplying the yield of irrigated land by the irrigated area cropped, and the yield of unirrigated land multiplied by the unirrigated area cropped, and dividing the sum of these products by the total area cropped.
(2) The superseded figures of the previous quinquennia have been inserted merely to show the trend of the revision made in each period.
* The estimates for Bihar and Orissa are the standards adopted provisionally by the Agricultural Department of the province, which are partly based on the information collected in 1892. The results of the experiments for the period ending 1916-17, as recorded in table No. 6, are not considered sufficiently reliable to justify a revision of the provincial estimates.
† The averages for Burma for 1916-17 are based on the normal outturns per acre given in the Season and Crop Report of Burma for 1916-17

(a) There is no proper cultivation in the area, hence there is no land revenue.

(b) The area represent reserved forests, hence no revenue.

(c) The land transferred is chiefly occupied by P. W. Dept. Inspection bungalow, etc., and does not bring any revenue.

(d) Not available.

APPENDIX C

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA

- Agasi, agati, or avati* (*Sesbania grandiflora*)—A vegetable crop.
- Ajmud* (*Carum Roxburghianum*)—A kind of spice.
- Ajwan* (*Carum copticum*)—A kind of spice, "Bishop's-weed."
- Akurkura or jevandi* (*Chrysanthemum coronarium*)—A non-food crop.
- Amada or mamidi allam* (*Curcuma amada*)—A condiment.
- Ampazham* (*spondius magnifera*)—The hog plum.
- Arhar* (*Cajanus indicus*)—The pigeon pea.
- Arunelli* (*Phyllanthus distichus*)—Country star gooseberry.
- Bajra* (*Pennisetum typhoideum*)—The spiked millet.
- Bané* (Coorg)—Forest land granted for the service of the holding of rice-fields to which it is allotted, to be held free of revenue for grazing, leaf manure, firewood, and for timber required for the farm.
- Barbati* (*Vigna catjang*)—Asparagus, a food grain.
- Barti* (see Wudalu).
- Bel* (*Egle Marmelos*)—A fruit.
- Bhagdari* (see Narvadari).
- Bilimbi* (*Averrhoa Bilimbi*)—A fruit.
- Bimb* (*Cephalandra indica*)—A fruit.
- Chaplash* (*Artocarpus Chaplasha*)—A tree grown mainly for timber.
- Chayroot* (*Oldenlandia umbellata*)—A dye.
- Cheena* (*Panicum miliaceum*)—The common millet.
- Cheik* (*Coix lachryma-jobi*)—A food grain, "Job's Tear."
- Chikkudukayalu* (*Dolichos lablab*)—The Indian or popat bean.
- Cholam* (see jawar).
- Cholanathu* (*Andropogon sorghum*)—Fodder jawar.
- Chowli* (see Barbati).
- Cumbu* (see Bajra).
- Dani* (*Nipa fruticans*)—A soboliferous palm, the leaves of which are used for thatching purposes, also for matting.
- Dhaincha* (*Sesbania aculeata*)—A plant cultivated mainly for green manure.
- Dhatūra* (*Datura alba*)—A drug.
- Dividivi* (*Casalpinia coriara*)—A tanning material.
- Gajar*—Carrot.
- Garmal* (*Coleus barbatus*)—A fruit.
- Gondli* (see Kutki).
- Gorait* (United Provinces)—Village watchman.
- Henna* (*Lawsonia alba*)—A dye.
- Inám* (Madras)—Alienated villages or lands granted rent-free. *Whole inám* villages are entire villages held on such tenure; *minor ináms* are portions of villages, generally a number of fields, held on *inám* tenure.
- (Coorg)—A grant of land by Government as a reward for services rendered or for religious or charitable purposes.
- Isfagul* (*Plantago ovata*)—A drug.
- Istamrári* (Punjab, Ajmer-Merwara)—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- Izáfat* (Bombay)—A form of service tenure.
- Izára* (Berar)—Land leased under the waste-land rules on stipulated terms.
- Jagír* (Berar)—Alienated villages or lands granted as rewards for service either rent-free or on payment of a quit-rent; such lands are hereditary.
- (Ajmer-Merwara)—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Bombay)—Estates held hereditarily or for one or more generations on political considerations, no condition of service being attached to them.
- (Coorg)—Lands granted rent-free (1) to individuals on account of services rendered to the State by themselves or their ancestors, and (2) to some religious institutions.
- Jambo or naval*—Black plum.
- Jamna* (Coorg)—A tenure under which lands are held on half the ordinary assessment on condition that the holders should perform certain services to Government, if required, such as escorting Government treasure and rendering assistance to revenue officers on tour. These lands are inalienable without special sanction.

APPENDIX C—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

- Jawar* (*Sorghum vulgare*)—The great millet.
- Jenugulu*—Asparagus.
- Jinjili* (*Sesamum indicum*)—An oilseed.
- Jira*—Caraway.
- Jodi* (Madras)—Portion of the assessment reserved or left unalienated when lands were originally granted on favourable assessment. It is distinguished from quit-rent, which represents an additional charge (generally a certain proportion—one-eighth, one-fourth, one-half, or five-eighths—of the full assessment, *minus* the *jodi*) imposed when the tenures were enfranchised or converted into free-holds.
- Kalpazaru*—Kidney bean.
- Kangni* (*Panicum Italicum*)—Italian millet.
- Kamranga* (*Averrhoa Carambola*)—A fruit.
- Kanda* (*Dracontium*)—A vegetable crop.
- Kankrol* (*Momordica cochinchinensis*)—A vegetable crop.
- Karola* (*Momordica Charantia*)—A vegetable crop.
- Karuvapilai* (*Murraya Koenigii*)—A condiment.
- Kavali* (*Sterculia urens*)—The Indian katura, a fruit.
- Kavathu* (*Dioscorea alata*)—A tuber used as a food stuff.
- Khalsa* (Bombay)—Government occupancy or raiyatwari tenure.
- (Central Provinces)—Areas settled on malguzari or thekadari tenure, in contradistinction to zamindari.
- (Berar, Ajmer-Merwara)—Land paying full revenue to Government.
- Khatedar* (Berar)—A registered occupant whose name is entered by authority in the Government records as holding unalienated land.
- Khiraj* (Assam)—Land assessed to full revenue.
- Khoti* (Bombay)—A form of tenure, found chiefly in the Konkan, the holder of which is, in return for certain semi-proprietary rights, held responsible for payment of assessment on the area held.
- Kirni* (*Mimusops hexandra*)—A large tree cultivated chiefly in north-western India. It produces an olive-shaped yellow berry which is eaten chiefly during times of scarcity, and in the hot weather.
- Kodo* or *Kutki* (*Paspalum Scrobiculatum*)—A kind of millet.
- Korai*—The Indian matting sedge.
- Kclinji* (*Tephrosia purpurea*)—A drug.
- Koorka* (*Strobilanthes*)—A vegetable crop.
- Kuhudi* (*Panicum trypheron*)—A food grain.
- Kulthi* (*Dolichos biflorus*)—Horse gram.
- Kutki* (see *Kodo*).
- Kwin* (Burma)—An area averaging about one square mile selected as a survey unit on account of some natural features or administrative boundaries.
- Lakhiraj* (Assam)—Revenue-free land.
- Lobia* (see *Barbati*).
- Madder* (*Rubia tinctorum* and *R. cordifolia*)—A dye.
- Mahalkari* (Bombay)—A revenue and police officer in charge of a sub-division of a taluk.
- Makhan sim*—The sword bean.
- Malguzari* (Central Provinces)—A form of tenure, the holder of which is responsible for the payment of the revenue assessed on a village.
- Mamiatdar* (Bombay)—The chief revenue and police officer (native) in charge of a taluk.
- Mankachu* (*Alocasia indica*)—A root crop.
- Marua* (*Elusine coracana*)—A kind of millet.
- Marukkolundu* (*Artemisia vulgaris*)—The Indian worm wood.
- Mehwasi* (Bombay)—A proprietary tenure assessable to revenue at a lump sum.
- Muafi* (Manpur)—Any kind of land held revenue-free either for a fixed period or in perpetuity, but the term does not ordinarily apply to jagirs.
- Mung* (*Phaseolus Mungo*)—Green gram.

APPENDIX C—continued

VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—continued

- Munsarim* (Berar).—A head native revenue officer.
- Narradari, Bhagdari* (Bombay).—Forms of proprietary tenure involving joint responsibility for the assessment: the revenue in the former case being fixed in the lump, and in the latter distributed by rates over fields.
- Neem or Margosa* (*Melia azadirachta*).—A non-food crop.
- Neerali* (*Gynocordia odorata*).—An oilseed.
- Nela mulaka* (*Solanum xanthocarpum*).—The bogoda brinjal, a drug.
- Nisfkhiraj* (Assam).—Land liable to pay half the revenue which is ordinarily payable for the term of settlement.
- Odamula* (*Ochalandra Rheedii*).—A reed.
- Ol or zaminkand*.—The elephant foot, a root crop.
- Palampat* (Berar).—Land held on payment of a quit-rent, but not necessarily hereditary.
- Panchayat* (Bengal).—A committee of five respectable persons nominated or appointed by local officers of Government in a village or group of villages for the settlement of petty disputes among the people and for dealing with other small local matters, such as caste, occupation, sanitation, etc.
- Papay* (*Carica papaya*).—A fruit.
- Parpattigar* (Coorg).—A revenue officer in charge of a sub-division of a taluk.
- Parvar* (see Patol).
- Patel* (Coorg).—Village headman appointed by Government.
- Patol* (*Trichosanthes dioica*).—A vegetable crop.
- Peshkash* (Madras).—The fixed land revenue payable to Government on all permanently-settled estates.
- Pimakottai or pouna*.—The mast wood.
- Ponnagantikura* (*Alternanthera sessilis*).—A vegetable crop.
- Poramboke* (Madras).—Lands reserved for public or village communal purposes.
- Pôt inâms* (Bombay).—Lands sub-alienated in alienated villages.
- Pôt kharâb* (Berar).—The unculturable area included in a survey number.
- Puliyavara* (*Oxalis corniculata*).—A vegetable crop.
- Ragi* (see Marua).
- Randhuni* (see Ajmud).
- Rayatwari*.—State lands leased to cultivators for a fixed term. A form of tenure in which the settlement of revenue is made by Government with each individual occupant or cultivator of the land for a given term, without the intervention of a third party.
- Sabai grass* (*Ischaemum Augustifolium*).—A fibre plant.
- Sank-alu* (*Pachyrhizus angulatus*).—A root crop.
- Sapodilla* (*Achras Sapota*).—A fruit.
- Sebestan* (*Cordia Myxa*).—A fruit.
- Shanbôg* (Coorg).—A village accountant appointed by Government.
- Shrotriem* (Madras).—Village held on grant (originally to Brahmins), wholly or partially revenue-free.
- Siris tree or vagai* (*Albizzia Lebbek*).—A non-food crop.
- Sorrell* (*Rumex vesicarius*).—A vegetable crop.
- Sother*.—Radish.
- Swank* (*Panicum frumentaceum*).—A food grain.
- Talukdari* (Bombay).—A form of proprietary right in force in the northern districts of Bombay.
- Tejpat* (*Cinnamomum Tamala* and *C. obtusifolium*).—A spice.
- Thathameda* (Upper Burma).—Household tax.
- Thattan payara* (see Barbatî).
- Thekadar* (Central Provinces).—A farmer, a leaseholder, a middleman; one who receives the rents from the cultivators and pays a stipulated sum to the proprietor.
- Thetke grass* (*Imperata arundinacea*).—A small perennial grass used chiefly for thatching purposes.
- Thugyi* (Burma).—A village headman

APPENDIX C—*concluded*VERNACULAR TERMS USED IN VOLUME I OF AGRICULTURAL
STATISTICS OF INDIA—*concluded*

Til (*Sesamum indicum*).—An oilseed.

Uchhe (*Momordica muricata*).—A vegetable crop.

Udai (*Acacia eburnea*).—A thorny tree used as fuel or for fencing purposes.

Udhad-jamabandi (Bombay).—A proprietary tenure subject to fixed assessment.

Umbli (Coorg).—Lands granted on reduced rates to individuals on account of services rendered to the State by themselves or their ancestors.

Unda (*Pongamia glabra*).—An oil seed.

Urad (*Phaseolus radiatus*).—Black gram.

Wudalu or barti (*Panicum flavidum*).—A food grain.

Zamindar.—The holder of an estate on a fixed assessment under a deed of permanent ownership granted by Government.

——— (Central Provinces).—A chief of minor importance who, while usually holding a large and compact estate on privileged tenure, has been restricted to the rank of an ordinary subject.

Zamindari.—An estate held on a fixed assessment under a deed of permanent ownership granted by Government.

——— (United Provinces).—An undivided estate held in joint tenure.

Chrysanthemum, Akurkura, or Jevandi	<i>Chrysanthemum corona-</i> <i>rium.</i>	40. Miscellaneous non-food crops.
Cinchona	<i>Cinchona sp.</i>	33. Cinchona.
Cinnamon	<i>Cinnamomum zeylanicum</i>	18. Condiments and spices.
Citron or lime or lemon	<i>Citrus medica</i>	38. Fruits and Vegetables including root crops.
Cloves	<i>Eugenia caryophyllata</i> or <i>Caryophyllus aromaticus.</i>	18. Condiments and spices.
Coconut	<i>Cocos nucifera</i>	38. Fruits and Vegetables including root crops.
Coffee	<i>Coffea arabica</i>	30. Coffee.
Coriander	<i>Coriandrum sativum</i>	18. Condiments and spices.
Cotton	<i>Gossypium sp.</i>	21. Cotton.
Cress	<i>Lepidium sativum</i>	38. Fruits and Vegetables including root crops.
Cucumber	<i>Cucumis sativus.</i>	38. „ „ „
Cumbu (<i>see</i> Millet)		
Cumin	<i>Cuminum Cyminum</i>	18. Condiments and spices.
Custard Apple (<i>see</i> Apple)		
Dani	<i>Nipa fruticans</i>	40. Miscellaneous non-food crops.
Date palm (<i>see</i> Palm)		
Dhaincha	<i>Sesbania aculeata</i>	40. Miscellaneous non-food crops.
Dhatura	<i>Datura alba</i>	35. Drugs and Narcotics—others.
Dill or Sowa	<i>Peucedanum graveolens</i>	16. Oilseeds—others.
Dividivi	<i>Casalpinia coriaria</i>	28. Dyes and Tanning Materials—others.
Drumsticks or Horse-radish	<i>Moringa pterygosperma</i>	38. Fruits and Vegetables including root crops.
Elephant foot, Zaminkand or Ol	<i>Amorphophallus campanu-</i> <i>latus.</i>	38. „ „ „
Elephant yam	<i>Tryphonium trilobatum</i>	38. „ „ „
Fennel	<i>Foeniculum vulgare</i>	18. Condiments and spices.

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Fenugreek	<i>Trigonella foenum græcum</i> .	18. Condiments and spices.
Field Vetch (<i>see</i> Vetch)		
Fig	<i>Ficus Carica</i>	38. Fruits and Vegetables including root crops.
Flea-bane, purple	<i>Vernonia anthelmintica</i> .	35. Drugs and Narcotics— others.
Flowers		40. Miscellaneous non-food crops.
Gajar (<i>see</i> Carrot)		
Garlic	<i>Allium sativum</i>	18. Condiments and spices.
Garmal	<i>Coleus barbatus</i>	38. Fruits and Vegetables including root crops.
Gawar (<i>see</i> Vetch)		
Ginger	<i>Zingiber officinale</i>	18. Condiments and spices.
Goa bean (<i>see</i> Bean)		
Gondli (<i>see</i> Millet)		
Gooseberry, Cape—or tepari	<i>Physalis peruviana</i>	38. Fruits and Vegetables including root crops.
„ Country star or Arunelli	<i>Phyllanthus distichus</i>	38. „ „ „
Goose foot	<i>Chenopodium album</i>	38. Fruits and Vegetables including root crops.
Gourd, Snake	<i>Trichosanthes anguina</i>	38. „ „ „
„ Bottle	<i>Lagenaria vulgaris</i>	38. „ „ „
„ Towel	<i>Luffa acutangula</i>	38. „ „ „
Gourd, Red or melon pumpkin	<i>Cucurbita maxima</i>	38. „ „ „
Gourd Melon, white	<i>Benincasa cerifera</i>	38. „ „ „
Gram	<i>Cicer arietinum</i>	9. Gram.
„ Field	<i>Phaseolus trilobus</i>	10. Other food grains, etc.
„ Green or Mung	<i>Phaseolus Mungo</i>	10. „ „ „
„ Horse or Kulthi	<i>Dolichos biflorus</i>	10. „ „ „
„ Black or Urad (Mati kalai)	<i>Phaseolus radiatus</i>	10. „ „ „
Grape	<i>Vitis vinifera</i>	38. Fruits and Vegetables including root crops.
Groundnut	<i>Arachis hypogæa</i>	15. Groundnut.
Guava	<i>Psidium Guajava</i>	38. Fruits and Vegetables including root crops.
Guinea grass	<i>Panicum maximum</i>	37. Fodder crops.
Gumberry	<i>Cordia Rothii</i>	38. Fruits and Vegetables including root crops.
Hemp, Indian, or Ganja	<i>Cannabis sativa</i>	34. Indian Hemp.
„ Sunn	<i>Crotalaria juncea</i>	23. Fibres—others.
„ Deccan	<i>Hibiscus cannabinus</i>	23. „ „
„ Sisal	<i>Agave sisalana</i>	23. „ „
Henna	<i>Lawsonia alba</i>	28. Dyes and Tanning Materials—others.
Hibiscus, edible or bhindi	<i>Hibiscus esculentus</i>	38. Fruits and Vegetables including root crops.
Horse-radish (<i>see</i> Drumsticks)		
Indian Hemp (<i>see</i> Hemp)		
Indian worm wood (<i>see</i> Marukkolundu)		
Indigo	<i>Indigofera sumatrana</i> and <i>I. arrecta</i>	27. Indigo.
Isfagul	<i>Plantago ovata</i>	35. Drugs and Narcotics— others.
Jack fruit	<i>Artocarpus integrifolia</i>	38. Fruits and Vegetables including root crops.
Jambotree (<i>see</i> Plum, black)		
Jawar (<i>see</i> Millet)		
Jenugulu (<i>see</i> Barbat)		
Jevandi (<i>see</i> Chrysanthemum)		
Jinjili (<i>see</i> Sesamum)		
Jira (<i>see</i> Caraway)		
Job's Tear or Cheik	<i>Coix lachryma-jobi</i>	10. Other food grains, etc.

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Jujube	Zizyphus Jujuba	38. Fruits and Vegetables including root crops.
Jute	Corchorus sp.	22. Jute.
Kachu or Kachalu (<i>see</i> Arum)		
Kakri (<i>see</i> Melon)		
Kalpayaru (<i>see</i> Beans, Kidney)		
Kamranga	Averrhoa Carambola	38. Fruits and Vegetables including root crops.
Kanda	Dracontium	38. " "
Kangni (<i>see</i> Millet)		
Kankrol	Momordica cochinchinensis	38. Fruits and Vegetables including root crops.
Kaon (<i>see</i> Millet)		
Kapok	Eriodendron anfractuosum	23. Fibres—others.
Karola	Momordica Charantia	38. Fruits and Vegetables including root crops.
Karuvapilai	Murraya Koenigii	18. Condiments and spices.
Kavali or Indian Katura	Sterculia urens	38. Fruits and Vegetable including root crops.
Kavathu, pannikkavathu, pallakavathu, kolkavathu	Dioscorea alata	38. " " "
Kharbuja (<i>see</i> Melon)		
Khesari (<i>see</i> Vetch)		
Khurfa (<i>see</i> Purslane)		
Kidney bean (<i>see</i> Bean)		
Kirni	Mimusops hexandra	39. Miscellaneous food crops.
Kodo (<i>see</i> Millet)		
Korai (<i>see</i> Matting sedge, Indian)		
Kokam (<i>see</i> Mangosteen)		
Kolinji or vempali	Tephrosia purpurea	35. Drugs and Narcotics—others.
Koorka	Strobilanthes	38. Fruits and Vegetables including root crops.
Kuhudi	Panicum trypheron	10. Other food grains, etc.
Kulthi (<i>see</i> Gram)		
Kutki (<i>see</i> Millet)		
Lemon (<i>see</i> Citron)		
Lentils	Lens esculenta or Ervam lens	10. Other food grains, etc.
Lettuce	Lactuca Scariola	38. Fruits and Vegetables including root crops.
Lime (<i>see</i> Citron)		
Linseed	Linum usitatissimum	12. Linseed.
Lobia (<i>see</i> Barbat)		
Locust tree (<i>see</i> Carob)		
Lucerne	Medicago sativa	37. Fodder crops.
Madder	Rubia tinctorum and R. cordifolia	28. Dyes and Tanning Materials—others.
Mahua	Bassia latifolia and B. longifolia	39. Miscellaneous food crops.
Maize	Zea Mays	8. Maize.
Makhan Sim (<i>see</i> Beans, Sword)		
Mango	Mangifera indica	38. Fruits and Vegetables including root crops.
Mangosteen or Kokam	Garcinia indica	38. " " "
Mankachu	Alocasia indica	38. " " "
Margosa or Neem tree	Melia azadirachta	40. Miscellaneous non-food crops.
Marians	Bouea burmanica	38. Fruits and Vegetables including root crops.
Marjoram	Origanum vulgare	18. Condiments and spices.
Marua (<i>see</i> Millet)		
Marukkolundu or Indian wormwood	Artemisia vulgaris	40. Miscellaneous non-food crops.

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Mast wood	Calophyllum inophyllum .	16. Oilseeds—others.
Mati kalai (<i>see</i> Black gram)		
Matting sedge, Indian or Korai	Cyperus corymbosus, C. tegetum.	23. Fibres—others.
Medlar, Indian	Vangueria edulis .	38. Fruits and Vegetables including root crops.
Melon, Kharbuja	Cucumis Melo .	38. " " "
" Kakri	Cucumis Melo var. momordica .	38. " " "
" Musk	Cucurbita moschata .	38. " " "
" Water	Citrullus vulgaris .	38. " " "
" White Gourd (<i>see</i> Gourd)		
Metha (Fenugreek)	Trigonella foenum-græcum	18. Condiments and spices.
Millet, Common or Cheena	Panicum miliaceum .	10. Other food grains, etc.
" Great or jawar or cholum	Sorghum vulgare .	5. Cholum or Jawar.
" Italian, Kangni, or Kaon	Panicum Italicum or Setaria italica .	10. Other food grains, etc.
" Kodo or Varagu	Paspalum scrobiculatum .	10. " "
" Little, Kutki, or Gondli	Panicum miliare .	10. " "
" Marua or Ragi	Elusine Coracana .	7. Ragi or marua.
" Spiked, Bajra or Cumbu	Pennisetum typhoideum .	6. Cumbu or Bajra.
Mint or Pudina	Mentha arvensis .	18. Condiments and spices.
Morinda or Al	Morinda tinctoria .	28. Dyes and Tanning Materials—others.
Moth (<i>see</i> Bean)		
Mulberry	Morus indica .	40. Miscellaneous non-food crops.
Mung (<i>see</i> Gram)		
Mustard	Brassica sp. .	14. Rape and Mustard.
Naval (<i>see</i> Plum, black)		
Neem tree (<i>see</i> Margosa)		
Neerali	Gynocordia odorata .	16. Oilseeds—others.
Niger Seed or Sorguja	Guizotia abyssinica .	16. Oilseeds—others.
Nutmeg	Myristica fragrans .	18. Condiments and spices.
Oats	Avena sativa .	37. Fodder crops.
Odamula (reeds)	Ochlandra Rheedii .	40. Miscellaneous non-food crops.
Ol (<i>see</i> Elephant foot)		
Onion	Allium Cepa .	18. Condiments and spices.
Opium	Papaver somniferum .	29. Opium.
Orache, garden (<i>see</i> spinach)		
Oranges	Citrus Aurantium .	38. Fruits and Vegetables including root crops.
Palm, Date	Phoenix sylvestris .	20. Sugar—others.
" Palmyra	Borassus flabellifer .	20. " "
Papay	Carica papaya .	38. Fruits and Vegetables including root crops.
Parvar or Patol	Trichosanthes dioica .	38. " " "
Peach	Prunus persica .	38. " " "
Peas	Pisum sativum or Pisum arvense .	10. Other food grains, etc.
Peanut (<i>see</i> Groundnut)		
Pepper	Piper or Capsicum .	18. Condiments and spices.
" Black	Piper nigrum .	18. " " "
" Long	Piper longum .	18. " " "
Pigeon or bottle grass	Setaria glauca .	10. Other food grains, etc.
Pigeon pea (<i>see</i> Arhar)		
Pimakottai, Pouna (<i>see</i> Mastwood)		
Pine apple	Ananas sativa .	38. Fruits and Vegetables including root crops.
Plantain	Musa sapientum .	38. " " "
Plum, black, Jambo tree or Naval	Eugenia Jambolana .	38. " " "
" Hog, or Ampazham	Spondias mangifera .	38. " " "
Poi (<i>see</i> Spinach)		

APPENDIX D—continued

ALPHABETICAL LIST OF CROPS—contd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Pomegranate	<i>Punica granatum</i>	38. Fruits and Vegetables including root crops.
Pomelo	<i>Citrus decumana</i>	38. " " "
Ponnagantikura	<i>Alternanthera sessilis</i>	38. " " "
Potato	<i>Solanum tuberosum</i>	38. " " "
" Sweet	<i>Ipomoea Batatas, Batatas edulis.</i>	38. " " "
Pudina (<i>see</i> Mint)		
Puliyavara	<i>Oxalis corniculata</i>	38. Fruits and Vegetables including root crops.
Pumpkin	<i>Cucurbita pepo</i>	38. " " "
Pumpkin Melon (<i>see</i> Gourd, red)		
Radish or Sother	<i>Raphanus sativus</i>	38. Fruits and Vegetables including root crops.
Ragi (<i>see</i> Millet)		
Randhuni (<i>see</i> Ajmud)		
Rapeseed	<i>Brassica sp.</i>	14. Rape and Mustard.
Raspberry	<i>Rubus lasiocarpus</i>	38. Fruits and Vegetables including root crops.
Rhea	<i>Boehmeria nivea</i>	23. Fibres—others.
Rice	<i>Oryza sativa</i>	2. Rice.
Rose apple (<i>see</i> Apple)		
Roselle	<i>Hibiscus subdariffa</i>	38. Fruits and Vegetables including root crops.
Rubber (India)	<i>Hevea brasiliensis, manihot Glaziovii.</i>	40. Miscellaneous non-food crops.
Sabai grass	<i>Ischœmum augustifolium</i>	23. Fibres—others.
Safflower	<i>Carthamus tinctorius</i>	28. Dyes and Tanning Materials—others.
Saffron	<i>Crocus sativus</i>	28. " "
Sage	<i>Salvia officinalis</i>	18. Condiments and spices.
Sam tree or Chaplash	<i>Artocarpus Chaplasha</i>	40. Miscellaneous non-food crops.
Sank-alu	<i>Pachyrhizus angulatus</i>	38. Fruits and Vegetables including root crops.
Sapodilla	<i>Achras Sapota</i>	38. " " "
Sawan (<i>see</i> Swank)		
Sebestan	<i>Cordia myxa</i>	38. Fruits and Vegetables including root crops.
Senna	<i>Cassia angustifolia and C. ovata.</i>	35. Drugs and Narcotics—others.
Sesamum, til or jinjili	<i>Sesamum indicum</i>	13. Sesamum.
Shahjira (<i>see</i> Caraway, black)		
Shama (<i>see</i> Swank)		
Singhara or water caltrop	<i>Trapa bispinosa</i>	38. Fruits and Vegetables including root crops.
Siris tree or vagai	<i>Albizzia Lebbeck</i>	40. Miscellaneous non-food crops.
Sisal hemp (<i>see</i> Hemp)		
Soapnut or Kumkudu-Kaya	<i>Sapindus trifoliatus</i>	35. Drugs and Narcotics—others.
Sorguja (<i>see</i> Niger seed)		
Sorrell	<i>Rumex vesicarius</i>	38. Fruits and Vegetables including root crops.
Sowa (<i>see</i> Dill)		
Sother (<i>see</i> Radish)		
Soy bean (<i>see</i> Bean)		
Spelt wheat (<i>see</i> Wheat)		
Spinach	<i>Spinacea oleracea</i>	38. Fruits and Vegetables including root crops.
" Indian or poi	<i>Basella alba</i>	38. " " "
" Mountain, or Garden Orache	<i>Atriplex hortensis</i>	38. " " "
Strawberry	<i>Fragaria vesca</i>	38. " " "
Sugarcane	<i>Saccharum officinarum</i>	19. Sugarcane.

APPENDIX D—concluded

ALPHABETICAL LIST OF CROPS—concl'd.

NAME OF CROP		Heads of classification in Table III
English or Vernacular	Botanical	
Sunflower	Helianthus Annuus	16. Oilseeds—others.
Swallow-wort	Calotropis sp.	23. Fibres—others.
Swank, Sawan, or Shama	Panicum frumentaceum	10. Other food grains, etc.
Sweet flag	Acorus Calamus	35. Drugs and Narcotics—others.
Sweet potato (see Potato)		
Tamarind	Tamarindus indica	18. Condiments and spices.
„ Manila	Pithecolobium dulce	38. Fruits and Vegetables including root crops.
Taramira	Eruca sativa	14. Rape and Mustard.
Tea	Camellia Thea	31. Tea.
Tejpat	Cinnamonum Tamala and C. obtusifolium.	18. Condiments and spices.
Tepari (see Gooseberry)		
Thattan-payara (see Barbati)		
Thetkè (grass)	Imperata arundinacea	40. Miscellaneous non-food crops.
Til (see Sesamum)		
Tobacco	Nicotiana Tabacum and N. Rustica.	32. Tobacco.
Tomato	Lycopersicum esculentum	38. Fruits and Vegetables including root crops.
Tori, Toria	Brassica Napus	14. Rape and Mustard.
Turmeric	Curcuma longa	18. Condiments and spices.
Turnip	Brassica Rapa	38. Fruits and Vegetables including root crops.
Uchhe	Momordica muricata	38. „ „ „
Udai	Acacia eburnea	40. Miscellaneous non-food crops.
Unda	Pongamia glabra	16. Oilseeds—others.
Urad (see Gram)		
Varagu (see Millet)		
Vagai (see Siris tree)		
Vempali (see Kolinji)		
Vetch, Field or gawar	Cyamopsis psoralioiðes	37. Fodder crops.
„ Chickling or khesari	Lathyrus sativus	10. Other food grains, etc.
Water caltrop (see Singhara)		
„ melon (see Melon)		
Wheat	Triticum sativum	3. Wheat.
„ Buck	Fagopyrum esculentum	10. Other food grains, etc.
„ Spelt	Triticum sativum var Spelta.	3. Wheat.
Wood apple (see Apple)		
Wudalu or barti	Panicum flavidum	10. Other food grains, etc.
Yams	Dioscorea sp.	38. Fruits and Vegetables including root crops.
Zaminkand (see Elephant foot)

Agricultural Statistics of India

1917-18

VOLUME II—INDIAN STATES

Introductory Note

This volume deals with the Agricultural Statistics of Indian States. As General in the five previous issues, summary tables have been inserted to show the total figures relating to area, the classification of area, and the area under crops for each State or group of States, and the totals for all the reporting States. The total number of cattle as far as reported in each of the years 1905-06 to 1917-18 has also been included in the general summary table (No. 1). These statistics are defective for comparative purposes as additions have been made in the number of reporting States from time to time. Explanatory notes have been inserted at the foot of the tables. Two charts and an index for easy reference have been added to the volume. It should be noted that, for the reasons explained below, the agricultural statistics of Indian States are incomplete and are of far less accuracy than those of British Provinces published in Volume I. The question of the improvement of the statistics of Indian States has been taken up by the Government of India, and it is expected that more complete and accurate statistics for them will be available in the near future. As these States comprise one-third of the area of India, the importance of their statistics in the all-India returns can scarcely be over-estimated.

The total area of Indian States is approximately 497,000,000 acres (777,000 square miles), with a population of 72 millions according to the census of 1911. These are divided for the purposes of agricultural statistics into two main classes, namely, (1) States within the jurisdiction of Local Governments and Administrations, and (2) States having direct political relations with the Government of India.

(1) *States within the jurisdiction of Local Governments and Administrations.*—The total area of these States is 181,060,000 acres, with a population of about 27 millions. They are divided into the following main groups:—

	Area Thousand acres	Population Thousands
Bombay and Sind States	40,878	7,412
Madras States	6,802	4,812
Punjab States	24,511	4,213
Bihar and Orissa States	18,335	3,945
Central Provinces States	19,960	2,117
Burma States (including Shan States)	38,402	1,540
North-West Frontier Province States (including tribal areas)	10,330	1,379
United Provinces States	4,345	832
Bengal States	3,477	823
Assam States	7,970	346
Total	181,060	27,419

The total areas of all these States (with the exception of the Shan States in Burma and the tribal areas in the North-West Frontier Province) are included in the areas of the several British Provinces stated in column 2 of table I of Volume I (British India), but are shown separately in column 3 of that table in order to arrive at the net area of British territory (in column 5) dealt with in that volume. Of these States, agricultural statistics are at present

available only for the following twenty-eight States in the Madras Presidency and the Punjab, and are dealt with in this volume :—

	Area Thousand acres	Population Thousands
<i>Madras States—</i>		
Travancore	4,880	3,429
Cochin	903	918
Pudukkottai	754	412
Banganapalle	163	39
Sandur	102	14
<i>Punjab States—</i>		
Patiala	3,795	1,408
Jind	863	272
Nabha	620	249
Bahawalpur	12,700	781
Sirmur (Nahan)	632	139
Kalsia	122	56
Pataudi	34	20
Loharu	143	19
Dujana	57	25
Kapurthala	417	268
Malerkotla	107	71
Faridkot	412	130
Simla Hill States (comprising Bashahr, Jubbal, Theog, Kumbarsain, Khaneti, Bilaspur, Baghal, Ghund, Mehlog, Baghat, and Madhan)	3,231	276
Total	29,935	8,526

(2) *States having direct political relations with the Government of India.*—
These are divided into the following main groups :—

	Area Thousand acres	Population Thousands
Hyderabad	52,927	13,375
Baroda	5,236	2,033
Mysore	18,868	5,806
Kashmir	54,036	3,158
Rajputana States	82,552	10,530
Central India States	49,515	9,357
Baluchistan (Native)	51,462	420
Sikkim	1,804	88
Total	316,400	44,767

No agricultural statistics are at present available for Hyderabad,* Baroda,* Baluchistan (Native), and Sikkim. Of the remainder, returns are received only from the following eighteen States :—

	Area Thousand acres	Population Thousands
Mysore	18,868	5,806
Kashmir	54,036	3,158
<i>Rajputana States—</i>		
Jaipur	9,971	2,637
Bikaner	14,922	701
Marwar	22,410	2,058
Tonk	1,634	303
Alwar	2,037	792
Kishangarh	549	87
Bharatpur	1,263	559
Jhalawar	527	96
Kotah	3,638	659

* Arrangements are being made by the Hyderabad and Baroda States to prepare agricultural statistics for those States.

	Area Thousand acres	Population Thousands
<i>Central India States—</i>		
Gwalior	16,511	3,102
Indore	6,080	1,008
Bhopal	4,657	730
Rajgarh	613	127
Narsingarh	469	110
Barwani	754	109
Nagod	324	75
Total	159,263	22,097

The total area of all the forty-six reporting States named above amounts to 189,198,000 acres, with a population of nearly 31 millions. These States, therefore, represent 38 per cent of the total area, and 43 per cent of the total population, of all the Indian States.

The earliest years from which the returns of agricultural statistics have been prepared in these forty-six reporting States are noted below :—

Mysore	1886-87
Jaipur	1892-93
Gwalior	1896-97
Bikaner, Marwar, Tonk	1898-99
Alwar, Bharatpur, Kishangarh, Jhalawar, Kotah	1900-01
Indore, Rajgarh, Narsingarh, Nagod, Patiala, Jind, Nabha, Bahawalpur	1907-08-
Pudukkottai, Banganapalle, Sandur, Cochin, Travancore, Bhopal, Barwani, Sirmur, Kalsia, Pataudi, Loharu, Dujana, Kapurthala, Malerkotla, Faridkot, Simla Hill States (11 in number)	1908-09
Kashmir	1910-11

The returns for the different States relate to the years ending on the dates stated below, so far as information is now available :—

Bikaner, Sandur, Banganapalle	year ended 31st March
Indore	„ in June
Mysore, Gwalior, Nagod, Pudukkottai, Rajgarh, Barwani	„ 30th June
Travancore, Cochin	„ in August
Jaipur	„ 31st August
Kishangarh	„ 15th September
Marwar, Kotah, Jhalawar, Bhopal	„ 30th September
Tonk, Narsingarh, Bharatpur, Alwar	„ 31st October

From the total area of all the forty-six reporting States (189,198,000 acres), deduction must be made for 106,899,000 acres for which statistics are not available. These comprise chiefly unsurveyed areas and lands held on jagir, muafi, and other privileged tenures. The net area actually covered by these statistics is, therefore, only 82,299,000 acres by professional survey,* or 82,274,000 acres according to village papers.*

This area is classified, for the purposes of agricultural statistics, as shown in the margin. About 9,887,000 acres, or 12 per cent of the total, are occupied by forests; and the area not available for cultivation, that is, land absolutely barren, or unculturable, or covered by buildings, water, and roads, or otherwise appropriated to

	Thousand acres	Per cent
Forests	9,887	12.0
Not available for cultivation	19,075	23.2
Culturable waste other than fallow	13,682	16.6
Current fallows	6,613	8.1
Net area cropped	33,017	40.1
Total	82,274	100

* For explanation of the terms " professional survey " and " village papers, " see footnotes to Table I (page 6) of this Volume and the Report prefixed to Volume I

uses other than agriculture, amounts to 19,075,000 acres or 23.2 per cent. The balance, 53,312,000 acres or 64.8 per cent, represents the area available for cultivation. Of this, 13,682,000 acres, or 16.6 per cent of the total area, represent culturable waste, *i.e.*, land available for cultivation but not taken up, and 6,613,000 acres, or 8.1 per cent, were kept fallow in the year under report. The net area actually cropped in the year was thus 33,017,000 acres (40.1 per cent of the total area), which shows a decrease of 396,000 acres as compared with the preceding year. This net cropped area, however, excludes areas cropped more than once in the year. If areas cropped more than once are taken as separate areas for each crop, the gross area cropped in the year of report amounts to 37,173,000 acres, as against 36,530,000 acres in the preceding year.

Irrigation.

The total area irrigated in the reporting States during 1917-18 was 6,487,000 acres, as against 6,565,000 acres in the preceding year. Of this, 1,718,000 acres were irrigated from Government canals, 721,000 acres from private canals, 919,000 acres from tanks, 1,329,000 acres from wells, and the remaining 1,800,000 acres from other sources of irrigation. These figures, however, do not take into account areas cropped more than once during the year with the help of irrigation, but indicate the extent of land actually irrigated. If areas cropped more than once are counted as separate areas for each crop the gross area of irrigated crops amounts to 7,162,000 acres, against 6,983,000 acres in the preceding year. Of this area, 6,391,000 acres were under food crops.

Table III,
Area under crops.

The gross area cultivated with crops in the reporting States was, as stated above, 37 million acres in 1917-18, as against 36 million acres in the preceding

	Thousand acres	Per cent of total
Food-grains	27,873	76.0
Condiments and spices	297	.8
Sugar	160	.4
Fruits and vegetables	648	1.8
Miscellaneous food-crops	1,369	3.7
Total food-crops	30,347	82.7
Oilseeds	2,037	5.5
Fibres	1,797	4.9
Dyes	22	.1
Drugs and narcotics	277	.8
Fodder crops	1,310	3.5
Miscellaneous non-food crops.	904	2.5
Total non-food crops.	6,347	17.3

year, or an increase of 3 per cent. The different classes of crops and the area occupied by each, so far as details are available, are stated in the margin. Of the total cropped area, food crops occupied about 30,347,000 acres or 83 per cent and non-food crops about 6,347,000 acres or 17 per cent. Of the food-crops, food grains (cereals and pulses) occupied as much as 27,873,000 acres, or 76 per cent of the total cropped area, and other food crops (condiments and spices, sugar, fruits and vegetables, and miscellaneous food crops together) occupied some 2,474,000 acres, or only 7 per cent of the total. Of the non-

food crops, oilseeds occupied 2,037,000 acres or 5.5 per cent of the total cropped area, fibres such as cotton, hemp, etc., 1,797,000 acres or 4.9 per cent, and fodder crops 1,310,000 acres or 3.5 per cent. The other non-food crops, namely dyes, drugs and narcotics (tobacco, tea, coffee, opium, etc.), and miscellaneous non-food crops together, covered some 1,203,000 acres or 3.4 per cent of the total.

The area under food-grains (27,873,000 acres) showed an increase of

	Thousand acres		
	1916-17	1917-18	Increase + Decrease -
Rice	2,760	2,593	-167
Wheat	4,349	5,333	+ 984
Barley	. 965	1,337	+ 372
Jawar	4,947	3,329	-1,618
Bajra	3,232	2,648	-584
Ragi	2,405	2,380	-25
Maize	1,214	1,101	-113
Gram	4,002	4,115	+ 113
Other grains and pulses	3,850	5,037	+1,187

149,000 acres as compared

with the preceding year. The

actual increase or decrease

under each kind of grain is

stated in the marginal table.

The area under oilseeds (linseed, sesamum, rapeseed, mustard, etc.) increased by 49,000 acres or 2 per cent, that under fibres (cotton, hemp, etc.), by 152,000 acres or 9 per cent, and that under drugs and narcotics by 11,000 acres or 4 per cent, while the area under condiments and spices decreased by 5,000 acres or 1 per cent, and that under fruits and vegetables by 43,000 acres or 6 per cent. The area under sugar showed an increase of 43,000 acres or 37 per cent.

The total extent of land on which more than one crop was raised during the year was 4,156,000 acres, as against 3,118,000 acres in the preceding year.

Tables IV, V, and VI are very incomplete, as figures for these tables are not furnished by many of the reporting States. Table IV is prepared by only twenty States, namely, Mysore, Pudukkottai, Banganapalle, Cochin, Gwalior, Indore, Bhopal, Rājgarh, Narsingarh, Barwani, Nagod, Bikaner, Marwar, Jaipur, Kishangarh, Alwar, Bharatpur, Jhalawar, Tonk, and Kotah. According to the latest statistics, the total number of live-stock of the bovine class (bulls and bullocks, cows, buffaloes, and calves) in these twenty States is 14,554,000, that of the ovine class (sheep and goats) 9,139,000, and that of horses and ponies, mules and donkeys, and camels 457,000. The numbers of ploughs and carts are 2,408,000 and 576,000, respectively.

Table IV.
Live-stock.

Table V (Land revenue) is prepared by eighteen States, namely, Mysore, Pudukkottai, Banganapalle, Cochin, Gwalior, Indore, Bhopal, Rajgarh, Narsingarh, Barwani, Bikaner, Marwar, Jaipur, Alwar, Bharatpur, Jhalawar, Tonk, and Kotah; and Table VI (Transfers of land) is prepared by only five States, namely, Mysore, Banganapalle, Cochin, Barwani, and Alwar.

Table V.
Land Revenue.

Table VI.
Transfer of land.

The Appendix explains vernacular terms used in this volume, and the charts illustrate (1) the classification of the total area showing the proportion of cultivated and uncultivated lands, and (2) the total area cropped in 1917-18 with shares of food and non-food crops.

Note.—The entries in this table regarding classification of area and areas under food and non-food crops comprise figures for Mysore, Jaipur, Gwalior, Bikaner, Marwar, Tonk, Alwar, Kishangarh, Bharatpur, Jhalawar, and Kotah from 1905-06; to which were added those for Indore, Rajgarh, Narsingarh, Nagod, Patiala, Jind, Nabha, and Bahawalpur from 1907-08; for Pudukkottai, Banganapalle, Sandur, Cochin, Travancore, Bhopal, Barwani, Sirmur, Kalsia, Pataudi, Loharu, Dujana, Kapurthala, Malerkotla, Faridkot, and the Simla Hill States from 1908-09, and for Kashmir from 1910-11.

*The entries regarding cattle comprise Mysore, Jaipur, Gwalior, Bikaner, Marwar, Tonk, Alwar, Kishangarh, Bharatpur, Jhalawar, and Kotah from 1905-06; to which were added those for Indore, Rajgarh, and Narsingarh from 1907-08; for Bhopal, Barwani, and Nagod from 1908-09; for Banganapalle and Cochin from 1910-11; and for Pudukkottai from 1916-17. Detailed figures for the States for eight years are given in Table IV (pages 86-88).

(a) Excluding areas for which no returns are available

(b) Condiments and spices, fruits and vegetables, and miscellaneous food crops

(c) Cinchona, Indian hemp, other dyes, other drugs and narcotics, and miscellaneous non-food crops

(d) The total of food crops and non-food crops shown here does not agree with the total area cropped shown in Summary Table No. 4 for the reason stated in the footnote to that table (page 5)

Column 2.—The professional survey is that carried out by the Survey of India in Northern India, and by the corresponding departments in Southern India. In States where there has been no professional survey, the figures are based on the best information available

Column 3.—In this column is deducted the entire area for which the statistics required for Tables II and III are not forthcoming in whole or in part. This area comprises chiefly estates held on privileged tenures, which have not yet been surveyed and which possess at present no agency for the annual collection of agricultural statistics. As surveys extend and the organisation of village statistical establishments develops, the area in this column is reduced, and that entered in the next columns (4 and 5) and dealt with in Tables II and III is correspondingly increased

Columns 4 and 5.—Column 4 is a check on the accuracy of column 5. In the latter, "village papers" mean "the papers prepared by the village accountants." In States where no village papers exist, or where the source of information is the same for both the survey and the village papers, the figures in column 4 are necessarily repeated in column 5. The area in village papers may differ somewhat from that given by the Survey Department, (a) because, while the survey area is calculated in block, the area by village papers represents the added total of field and village areas, and (b) because the system followed as regards the inclusion or exclusion of areas covered by water, buildings, roads, and railroads is not always uniform in the two sets of returns

(a) Previous year's figure repeated [*vide* footnote (a) on page 14]

(b) Column 3 states the area of unsurveyed forests

1917-18	9,970,560	7,700,428	2,270,132	2,270,132

See explanations given in the footnotes (page 6)

(a) Column 2 states the area of the State as ascertained by revenue survey. Column 3 states the entire area of jagir villages
 (b) Column 2 excludes forest areas, the area of forest villages managed by the Forest Department, and about 6,980 acres of 6
 unsettled jagir villages
 (c) See footnote (a) on page 12.

* For three villages only

See explanations given in the footnotes (page 6)

- (a) Column 3 states the areas of jagir and other alienated lands
- (b) Column 2.—As there has been no revenue survey so far, this column states the area of the State according to the best information available. Column 3 states the areas of jagir and muafi villages, the boundaries of which have been demarcated, but for which the statistics required for other tables are not available. Columns 4 and 5.—In the absence of any revenue survey data, the figures in column 5 are repeated in column 4
- (c) Returns for 1910-11 not having been received, the figures for 1909-10 have been repeated
- (d) Column 3 states the area held by jagirdars and udakdars, as well as the muafi plots in khalsa villages for which no separate record is maintained

(a) *Column 2* states the area of the State according to Settlement records

(b) Statistics are furnished by eleven States of this group, namely, Peshawar, Jubbah, Theog, Kumbarsain, Khaneti, Bilaspur, Baghal, Ghund, Mehlog, Baghat, and Madhan, the last two but one from 1910-11 and the last one from 1911-12. These represent about 86 per cent of the aggregate area of all the States comprised in the group. The returns, however, relate only to the settled portions of the reporting States, except Bilaspur, Baghal, and Mehlog, for which complete returns have been received. *Column 2* states the area of the settled portions of the States named above, except Bilaspur, Baghal, and Mehlog, for which the whole area is included

(a) Column 2 states the area of the State as ascertained by revenue survey. Column 3 exhibits the area of jodi, kayam-gutta, and sarvamanayam villages, and jagirs for which the statistics required for the other tables are not available at present. Column 5.—The figures in column 4 are repeated

(b) Column 3 states the estimated areas of jagir, muafi, ubari, tanka, istamrar and such other villages as are still unsurveyed

(c) Column 2 states the whole area of the State, excluding the areas covered by the Indore Residency, the Mhow Cantonment and the Hrapur Thakurate. Column 3 states the areas of jagir, istamrar, and forest villages, and also of some of the outbandi villages

(d) Column 3 states the areas of jagir and such other villages as are still unsurveyed; it also includes the areas which formerly were parts of jagir villages, but which, after the completion of the settlement operations, either lapsed to or were resumed by the State

(e) Column 3 states the areas of jagir and such other villages as are still unsurveyed. It also includes the area of those khalsa villages which have not yet been regularly assessed; these are chiefly the latest acquisition to khalsa under the law of escheat. Columns 4 and 5.—The area by village papers does not differ from the area by survey, for, although differences occur under the different classes of soil, the total area of each village is the same in both cases

AREA

(a) Column 2 states only the khalsa area, forming about one-third of the whole area of the State. The whole area of the State according to the Census of 1911 is 9,970,560 acres, which is shown in table No. 5. Column 3 states the area of detached revenue-free plots situated in khalsa villages.

(b) Column 3 states the area of jagir villages.

(c) Columns 2 and 4 state the area of the State according to the professional survey of 1855. Column 5 states the area of the State according to the settlement records.

(d) Column 3 states the area of entire jagir and muafi villages, which have not yet been surveyed, and the detached revenue-free plots situated in khalsa villages.

(e) Column 2 states the whole area of the State according to the Census of 1911. Column 3 states the areas of Bhadarwa and Punch, certain unsettled areas and frontier tracts which are not directly looked after by the Revenue Department of the State, and also certain other areas for which returns are not available. Columns 4 and 5 entirely exclude the area of Bhadarwa (Jagir) and Punch and Frontier Ilagas.

(f) Details not available.

Column 2.—The definition of the term "forests" is as follows:—"Any land classed or administered as forest under any legal enactment dealing with forests." Any cultivated areas existing within such forests may be excluded and entered in column 6 (net area cropped), an explanation being given in a note

Column 3 includes all land absolutely barren, and also all land covered by buildings, water, roads, or otherwise appropriated to uses other than agriculture

Column 4 includes groves not classed in the cropped area. Areas under bamboos and thatching grass, when not forming parts of forest areas, are included in this column

Columns 8 to 13 state the area actually irrigated during the year, areas cropped more than once being counted once only

(a) The statistics collected in 1908-09 have been repeated up to 1912-13, as fresh information could not be collected owing to pressure of work connected with the revenue settlement of the State

(b) Column 2 states the area of reserved forests within surveyed villages

(c) Includes 8,215 acres in coffee estates

									1917-18

Columns 14 to 18 state the gross area of irrigated crops, areas cropped more than once being counted as separate areas for each crop. This accounts for the excess in some cases of the total area of crops irrigated (column 18) over the total area irrigated (column 13)

(a) Incomplete

CLASSIFICATION OF AREA

See explanations given in the footnotes (page 14)

(a) Column 2 states the areas of forests left unassessed. Forests in this State not having been demarcated, figures in columns 3 and 4 also include same forest areas. Column 4 states areas of land left uncultivated for over three years, of *bar* (grass lands) and of pasture lands. Column 5.—The maximum period for which land thrown out of cultivation is reckoned as fallow is three years

Column 2 states the areas of state and district forests and of plantations

Column 3 includes not only lands absolutely unfit for cultivation, but also lands reserved for pasture, and plantations intended for public use and therefore left unassessed. A large portion of the pasture lands is fit for cultivation, and is given out for cultivation from time to time under special orders, such lands when given out for cultivation being transferred from column 3 to 5 or 6 as the case may be

Column 4 states unoccupied assessed waste.

Column 5.—There is no system of fallows, that is, lands are not systematically left uncultivated for the purpose of giving them rest. Individuals occupy large areas and pay full assessment thereon, leaving portions uncultivated, generally for the use of their cattle. For purposes of account the difference between the areas of the lands occupied by individuals and of those actually cultivated by them is taken as fallow. The lands occupied and assessed are sometimes unfit for cultivation, having been taken up on full assessment merely for use as pasture, but the exact area of all such lands cannot be ascertained, although it cannot be large

(a) Included in column 3

Bharatpur—Column 2 includes grass preserves (locally called the State *Rundhs*) and hills. Column 4 includes areas out of cultivation or which have not been cultivated for the last four years or upwards, but excludes State grass preserves (*Rundhs*). Column 5—the maximum period for which land thrown out of cultivation is reckoned as fallow is three years. Column 8 includes area irrigated from the Bareta Bund, constructed by the State Public Works Department

Note—In this table are entered the areas actually sown, whether the crop comes to maturity or not, except in cases when fields, owing to the failure of the first sowings, have been devoted to other crops: in such cases the area first sown is omitted. In cases where two or more crops are grown together, an estimate is made of the area covered by each, and the areas so estimated are separately returned. The estimate is made by the village accountant, or is subsequently determined on formulæ prescribed by higher authorities

(a) See footnote (a) on page 49

(b) Includes millets, maize and gram

(c) In Travancore no accounts are kept regarding the area under each crop, and the figures shown in this table, are based on very rough estimates. Steps are being taken by the Darbar to introduce an improved system according to which accurate figures will be available in some cases

Note.—Animals in towns, cities, and cantonments are included where it is possible to secure their enumeration. Oxen and buffaloes not old enough for work or to produce young ones are classed as "young stock".

(a) A cattle census is taken by the patwaris every year after the kharif crop inspection in November. Animals in towns are included

(b) No information

Note.— Until 1898-99 statistics were collected every year by the shanbog and patel of each village by enquiry or inspection. Since that year a census is taken every five years as nearly as possible simultaneously throughout the State. The last census was taken in January 1916. Stock in municipalities are included.

*No information

Entry 2 (a) —Areas held revenue-free or at privileged rates should be deducted, but the deduction need not be made where such areas are in any case less than an entire village, and where there is any difficulty in estimating the corresponding deduction to be made in the population (head 10). Areas should not be entered in this column merely because the assessment due from them has been suspended or remitted on account of short crops, or for other special reasons

Entry 3.—This column should be sub-divided into (a) total fully assessed area for which returns are available, and (b) area cultivated out of the area given in head (a). The latter head should be equal to the former after deducting current fallows and fully assessed waste

† See explanation given in the footnote (page 100)

See explanations given in the footnotes (page 98)

* These are *khalsa* or state lands only. The whole area of the State according to the census of 1911 is stated in Table I—No. 5** *Alwar*.—The classes of tenure are zamindari and village communities, the former comprising *zamindari-bil-ijmal* and the latter *pattidari* and *bhaiyachara*. Item 1 states the area by village papers (column 5 of Table I). Item 2 (a) shows areas covered with forests (column 2 of Table II) which are wholly revenue-free.†† *Jhalawar*.—The whole area stated in this table is classed as “Khatedari” and “Watendari” equivalent to “raiyyatwari” and “zamindari” respectively. Item 1 excludes entire villages held by jagirdars and udakdars

Table V—continued

* No information

Entry 4.—Where land revenue includes the zamindar's share, the net demand should be entered, and the table should state the payments due by the zamindars to Government, not those by the raiyats to the zamindars. The actual realisable demand on account of the year should be entered, after excluding arrears for past years. This column should include all the heads classed as "Land Revenue" in the Civil Accounts

Entry 5.—The population in entry 5 is that of the last general census

* Entry 7.—As in entry 4 but only ordinary land revenue on fully assessed areas is to be entered.

† Narsingarh.—Item 1 states the net area by revenue survey as shown in column 4 of Table I. Item 2 (a) includes forest areas (column 2 of Table II) and unculturable (column 3 of Table II) and culturable land not possessed by any cultivator. Item 2 (b) states the area of minor muafis. Item 3 (b) includes fallow lands left uncultivated for three years or less as full cultivation rate is assessed on them

* No information

Column 2 states the net area by survey (column 4 of Table I)

Column 4 (a) includes area not fully assessed which cannot be separated from area fully assessed

Column 5 states "Land Revenue" as defined in the Civil Accounts, and includes cesses which cannot be separated from the land revenue

Column 8 states only ordinary land revenue with cesses

Columns 9 and 10.—The figures in these columns represent the incidence of land revenue on areas both fully and partially assessed

Column 11 includes population of area not fully assessed which cannot be separated from that of fully assessed area

Column 4 (b) states not only the area actually under crops, but also fallow lands as revenue rates are assessed on the total cultivated area, including fallows. Hence the area stated in this column exceeds the total area in Table III

Columns 5 and 6 relate only to Khalsa area, as statistics for these columns are not available for the whole area of the State

Column 1.—The State area leased to cultivators for a fixed term is returned as *raiayatwari*. The area leased out on condition of proprietary rights being given to lessees if they reclaimed land within a fixed term is returned as *zamindari—temporarily settled*; and the rest of the area (*i.e.*, the area remaining after deduction of the *raiayatwari* and the temporarily-settled *zamindari* areas from the total area), is entered as *zamindari—permanently settled*.

Column 3 includes muafi, chauth, and istimrar areas

Column 6.—The population stated is that of the last census

Column 11 shows the total population in cases where separate figures for areas fully and not fully assessed are not available

Note.—It is optional with the local authorities to enter or omit transfers of lands held by tenants. The following rules have been prescribed for the preparation of this return:—(1) Changes of entry due to succession, partitions, or simple mortgages are not really transfers and should be excluded from the table, as also should redemptions of mortgage. (2) All temporary transfers, such as leases, should also be excluded, but mortgage with possession should be treated as a transfer and entered in the table. (3) All transfers made by order of a Court should also be included in the table. (4) The word "Court" in the entry "by order of court" should be held to include a revenue Court.

(a) Mysore.—Only permanent transfers are included as by sale or gift, in which the parties concerned apply for and obtain transfers of revenue registry in the village accounts from which the table is compiled. Thus, changes of registry under orders of civil and revenue courts as well as those effected in consequence of the sale of land for arrears of Government revenue are included.

(b) Alwar.—Transfers by mortgage with possession, sale, and gift, both of proprietary and of occupancy rights, whether by order of court or by private contract, are shown in this table. Property confiscated by order of a criminal court, and holdings transferred by order of a civil or revenue court in satisfaction of money decrees or arrears of land revenue respectively are thus included.

APPENDIX

Vernacular terms used in the Explanatory Notes.

- Bhaiyachara* (Alwar).—Villages held by a number of families, by possession without reference to shares.
- Bir* (Narsingarh).—Grass lands.
- Bunds* (Alwar).—Embankments.
- Chauth* (Bharatpur).—Land paying one-fourth of the rental.
- Ilaku* (*Ilaga*).—An Estate or Dependency, a property.
- Inám* (Mysore).—Wholly or partially revenue-free tenure; *minor ináms* are plots of inám lands situated in a village, whether Government or inám.
- Istamrár* (Gwalior, Indore, Bharatpur).—A tenure which, though the revenue is assigned, is charged with a permanently fixed quit-rent.
- (Alwar).—A tenure which, though favourably assessed, is charged with a permanently fixed quit-rent.
- (Bharatpur).—Land paying a reduced permanently fixed *jama* (assessment).
- Jagir* (Mysore, Gwalior, Kishangarh, Kotah, Narsingarh).—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Indore, Barwani).—Land granted revenue-free on condition of military service or as a charitable endowment or in recognition of good services rendered to the State.
- (Bikaner).—Land granted revenue-free on condition of military service or as a charitable endowment.
- (Alwar).—Assignment of land revenue, with or without condition of military service and payment of commutation dues, granted in recognition of meritorious services to relations of the ruling chief or other high officials of the State.
- (Kishangarh).—Land granted revenue-free on condition of military service either actually rendered or fulfilled by a rateable money contribution.
- Jagirdar* (Jhalawar).—Holder of jagir land.
- Jodi* (Mysore).—A whole inám village paying quit-rent to Government.
- Kayangutta* (Mysore).—A whole village granted by the State on fixed money-rent.
- Khalsa* (Gwalior, Jaipur, Bikaner, Marwar, Bharatpur).—Land paying full revenue to the State.
- Khatedari* (Jhalawar).—Same as *raiyatwari*.
- Muafi* (Gwalior, Alwar, Kotah, Bharatpur, Kishangarh).—Land granted free of revenue.
- Out-bandi* (Indore).—Assessment of revenue calculated at a fixed rate per plough.
- Patel* (Mysore).—Village headman appointed by Government.
- Pattidari* (Alwar).—Villages held by a number of families, by shares, ancestral or customary.
- Patwari* (Narsingarh).—Village revenue officer or accountant.
- Raiyatwari* (Bharatpur).—State area leased to cultivators for a fixed term.
- Rundhs* (Bharatpur).—State grass preserves.
- Sarvamanayam* (Mysore).—An inám village, wholly revenue-free.
- Shanbóg* (Mysore).—A village accountant appointed by Government.
- Tanka* (Gwalior).—Estate held by certain families who were in power when the country was annexed and who were left in possession of their estates on payment of a fixed annual tribute, or *tanka*, bearing but a small proportion to the annual assets.
- Ubari* (Gwalior).—Land held at an abatement of the full land revenue.
- Udakdar* (Jhalawar).—Holder of a *Ubari* estate.
- Watendari* (Jhalawar).—Same as *Zamindari*.
- Zamindari* (Bharatpur).—Estate on a fixed assessment under a deed of permanent ownership granted by the State.
- Zamindari-bil-ijmal* (Alwar).—Villages held jointly by a body of owners.
